

**A PETITION TO  
THE  
INTERNATIONAL FRATERNITY OF  
DELTA SIGMA PI**

**BY  
THE ORGANIZATION OF BUSINESS  
AND ECONOMICS  
OF  
MISSISSIPPI COLLEGE**

To The Grand Council of the International  
Fraternity of Delta Sigma Pi

Gentlemen:

We, the undersigned members of the Organization of  
Business and Economics, hereby earnestly petition for a  
charter to establish a chapter of the International Frater-  
nity of Delta Sigma Pi at the campus of Mississippi  
College, Clinton, Mississippi.

The Organization of Business and Economics was  
formed exclusively for the purpose of affiliation with  
Delta Sigma Pi Professional Fraternity. The present aims,  
purpose and requirements reflected in our Constitution  
and By-Laws were patterned after and are commensurate  
with the same high ideals of Delta Sigma Pi.

In pursuit of this affiliation, the members of the  
Organization of Business and Economics pledge to uphold  
the rules and regulations set forth in the Constitution  
and By-Laws of the International Fraternity of Delta  
Sigma Pi and further to observe its traditions and  
precepts.

PETITION

## CLINTON, MISSISSIPPI

Clinton--a city with a rich historical background has survived prosperity, depression, war's devastation, Reconstruction, Yellow Fever and the Clinton Riot.

Once the camping ground of the Choctaw Indian Tribe, Clinton is still a rich source of Indian artifacts as its expanding suburbs spread out over pasture lands and rolling hills where the first Americans followed and Indian path later to be called the Natchez Trace.

In 1828 , the town was surveyed, incorporated, and the name Clinton was selected for the growing community.

By the early thirties, Clinton was renowned as a commercial center and had become a fashionable health resort. Because of the establishment of several academies for boys and girls, Clinton was aptly designated the "Athens of Mississippi."

Clinton was ringed with hospitable and spacious homes with large land holdings. It was remarkable for its number of distinguished men: statesmen, doctors, lawyers, teachers, planters, preachers, and editors. It was a terminal point for the second railroad in the state, shipped 20,000 bales of cotton a year and was an important stage-coach stop on the Natchez Trace. Newspaper accounts of the thirties tell of "forty stores, five hotels, tow livery stables, a newspaper and a population of 3,500 to 5,000, surpassed in size only by the two Mississippi River ports of Vicksburg and Natchez.

With the coming of the strife of the Civil War, the "Mississippi College Rifles" was organized, composed of sixty college students, three professors and forty townsmen. This organization made a glorious record on the battlefields of the war and only eight returned.

A strategic area in the Vicksburg campaign, Clinton lay in the path of the armies of Generals Grant and Sherman during the Jackson-Raymond-Champion Hill-Vicksburg marches.

Grant stabled his horses in the lower part of the newly completed and beautiful chapel at the College. The upper story of the Chapel was used as a hospital for the wounded and dying. This beautiful building is still standing and has been completely reconditioned. One of the few remaining examples of early architecture, it is in constant use by students as it was one hundred years ago.

The close of the war found the town and its surrounding plantations devastated. Only the pleadings of Dr. and Mrs. Walter Hillman, New Englanders, distinguished teachers and owners of Central Female Institute, founded in 1853, saved their fine school from destruction by Union soldiers. This institution was later named Hillman College in their honor, and some of the buildings are still standing.

Clinton attained further prominence in 1875 as the locale of the famed Clinton Riot which indirectly brought to an end the "scallawag and carpetbagger" rule of Reconstruction days.

As Edward Blake, author and historian has said, "Staunch and courageous in its deeply rooted religious and academic atmosphere, progressive, beautiful, cultural, growing--these are some of the characteristics of Clinton."

MISSISSIPPI COLLEGE

PAST AND PRESENT

OFFICE OF THE PRESIDENT

March 2, 1964

Mr. Charles L. Farrar, Executive Secretary  
Delta Sigma Pi  
330 South Campus Avenue  
Oxford, Ohio

Dear Mr. Farrar:

Mr. John David Smith, a student leader in our Division of Business and Economics, has told me that a group of our students are petitioning for a local chapter of Delta Sigma Pi.

Our Division of Business and Economics is growing. The division has recently moved into Self Hall, a new building constructed exclusively for its use. We have 300 students majoring in business and economics with five full-time professors and seven part-time teachers. Two years ago the students organized an association which has been active in professional development and social activities. Dr. D. Gray Miley, head of the division, states that approximately fifty students have indicated an interest in becoming charter members of Delta Sigma Pi at Mississippi College. I believe that our division is ready for such an organization.

Respectfully,

R. A. McLemore, President

MISSISSIPPI COLLEGE

CLINTON, MISSISSIPPI

FOUNDED IN 1826

February 29, 1964

Mr. Charles L. Farrar  
Executive Secretary  
Delta Sigma Pi  
330 S. Campus Avenue  
Oxford, Ohio

Dear Mr. Farrar:

I am happy to support the application of our students for the location of a chapter of Delta Sigma Pi on the Mississippi College campus. Having been associated with Mississippi College for the last 22 years, I have had an opportunity to observe the growth of our Division of Business and Economics. In my opinion, the major gains that we have made in this field have been in quality rather than purely in numbers of students who have enrolled in the various courses.

Dr. D. Gray Miley, the holder of a Ph.D. degree in Economics from the University of Virginia, a former professor at Mississippi State University, and a man of unusual business experiences, has brought to his department a new appreciation for quality in business education. Additions to the staff which he has recommended have been people who are dedicated to the field of teaching and who share his view concerning high academic standards. The establishment of a chapter of Delta Sigma Pi will provide new incentives for our students and give them an opportunity for being brought in contact with many others of like interests. I would appreciate any help that you may be able to give to our students in this venture.

Yours sincerely,

Howard E. Spell  
Dean of the College

April 20, 1964

Grand Council  
Delta Sigma Pi

Gentlemen:

Approximately two months ago, I was fortunate enough to have the opportunity to present a short talk and film to the Organization of Business and Economics chapter at Mississippi College. We had a very good turn-out for this meeting with approximately 60 persons present. They showed a good response to the material presented and seemed to have a sincere interest in business and economics.

Sincerely,

James R. Keenan  
Account Executive

Grand Council  
Delta Sigma Pi  
Oxford, Ohio

Gentlemen:

It was my pleasure last year to address the Business and Economics Association at Mississippi College. They had asked for a talk relating to the qualifications employers seek in recruiting college graduates.

The group impressed me very favorably in comparison with other college groups. They dressed well and were well-mannered; they showed a keen interest and a desire for learning; they demonstrated good leadership and good organization.

I do not know your standards of expectation for student groups, but I am glad to testify my impressions of the quality of this group.

Sincerely yours,

*E. J. Cazenave Jr.*

# MISSISSIPPI COLLEGE

## I. PAST AND PRESENT

Mississippi College is one of the oldest and largest Baptist colleges in the United States. Chartered by the state legislature in 1826, it is the oldest institution of higher learning in Mississippi. Originally called Hampstead Academy and later Mississippi Academy, the college was named Mississippi College in 1830 and authorized "to confer...such degrees in the arts, sciences, and languages as are usually conferred in the most respectable colleges in the United States...."

In 1842 the Board of Trustees transferred the college to the Presbyterians of the state. The college prospered for a time under its new status, but encountered financial difficulties and was returned to the original owners in 1850. Later that same year, the Mississippi Baptist Convention purchased the college and began operation through a Board of Trustees. In 1851, the Baptists of the state launched a successful campaign to raise \$100,000 endowment. A beautiful chapel, completed and occupied in 1860, fortunately survived the ravages of the War Between the States.

A private institution, the college was for several years coeducational and in 1831 was perhaps the first such college in the United States to grant a degree to a woman. This Female Department was discontinued about 1850. Subsequently in 1853, a Central Female Institute, later renamed Hillman College, was established in Clinton. Mississippi College became coeducational again in 1942 when Hillman College was purchased and absorbed.

During the last fifty years, Mississippi College has grown and expanded in all areas. The enrollment has multiplied from 300 students in 1900 to 2,297 in 1961-62; the faculty and staff from seven to 171; the major buildings from three to 26; the endowment from slightly over \$100,000 to \$1,696,323.99 and classroom, library, and laboratory facilities have been greatly augmented. Today five undergraduate degrees are offered as well as a master of arts degree and a master of education degree.

The college is accredited by the Southern Association of Colleges and Secondary Schools, National Association of Schools of Music, and the National Council for the Accreditation of Teacher Education. Membership is held in the Mississippi Association of Colleges, the Association of American Colleges, the American Association of University Women, American Council on Education, National Commission on Accreditation, the Council of Graduate Schools, the National Association of Business Teacher Training Institutions, the National Collegiate Athletic Association, and the American Association of Colleges for Teacher Education.

The Board of Trustees and administration have been concerned for the past five years with charting the course for the future development of the institution. Endeavoring to plan constructively, the college enlisted the counsel of Chancellor-Emeritus Goodrich C. White of Emory University through the auspices of the Association of American Colleges. In a series of conferences in 1958, Dr. White outlined steps which he thought would be advantageous. This program has served as our major guide.

Mississippi College requested permission to participate as one of the pilot colleges in the self-evaluation program of the Southern Association of Colleges and Secondary Schools. The study was conducted by the faculty during the 1958-59 session. This very thorough faculty study of our educational position was reviewed by a distinguished panel of southern educators headed by President Charles Davis of Winthrop College. These conferences enabled us to formulate long range plans for the future development of the college.

## II. AIMS OF THE COLLEGE

The faculty has stated (in a recent self-study) the purposes of the college:

To prepare each student for a life of maximum usefulness and enjoyment with full use of Christian principles.

To introduce the student to the arts, sciences, and philosophical thought.

To stimulate each individual to an awareness of the world in which he lives and his opportunities, relationships, and responsibilities in it.

To aid the student in choosing wisely his life's work and to offer him some professional and vocational training.

To inspire the student to seek the truth and to live virtuously.

And, in accepting our responsibility to our denomination, to strive intelligently to serve its noble purposes.

## III. INCREASE IN STUDENT ENROLLMENT

<u>Session</u>	<u>Fall Enrollment</u>	<u>Regular Session None Counted Twice</u>	<u>Including Summer School None Counted Twice</u>
1950-51	865	984	1190
1951-52	846	999	1197
1952-53	995	1171	1326
1953-54	1216	1411	1607
1954-55	1352	1606	1789
1955-56	1529	1785	2024
1956-57	1592	1740	2070
1957-58	1426	1665	1977
1958-59	1607	1839	2252
1959-60	1712	1952	2263
1960-61	1812	2033	2451
1961-62	1710	1895	2297
1962-63	1759		

The fall enrollment of Mississippi College increased from 995 in 1952-53 to 1759 in the fall of 1962-63; an increase of 76% in the decade. By way of comparison, the enrollment in the public institutions of higher learning in the state of Mississippi increased 82% in the same decade.

The prospect for a continued increase in enrollment is apparent from studies that have been made. Mississippi College has a potential enrollment of 3,000 by 1970-71. The location of the institution, its acceptable program, and the enthusiastic support of the Baptist denomination, are important factors in this possible increase of student population.

The enrollment of a capacity student body has not been difficult. Mississippi College has a special responsibility to the young people who are interested in and qualified for the program it maintains. Our policy of recruitment is to make known to the potential college enrollees the program of Mississippi College and encourage those who can profit most from the program to study here.

The Board of Trustees, administration, and faculty would like for Mississippi College to accept its responsibility for the education of its proportionate share of the young people of the state. The ability of the college to accept a continuing increase in enrollment is dependent upon its financial strength. The college is determined to maintain a quality program even if this requires a limitation of enrollment.

A more rigid program of selective admissions was introduced in 1958. This program has been gradually strengthened with benefits to the college. During this three year period, the mean score of entering freshmen on the ACE Test was raised from 39.3% to 46.2%. These scores are on the basis of norms for four-year liberal arts colleges.

Mississippi College has maintained a limited scholarship program to aid worthy students. In a total budget of \$1,024,925.00 for operational expenses, exclusive of auxiliary enterprises, \$11,625.00 was allotted for scholarship aid. This aid has been supplemented by a few private scholarships and loans under the National Defense Education Act.

The college is developing its counseling services to help students find the areas to which they can best devote their lives. This service has had an excellent beginning.

The counseling service also exists to promote student leadership. In the past five years, an effective student body program has been developed around the executive, legislative, and judicial branches of the organization. This program will continue to develop and provide students with an opportunity to gain maturing experiences.

#### IV. THE FACULTY AND STAFF

The recruitment and strengthening of a competent faculty is one of the major problems of Mississippi College. For many years a stable enrollment minimized the necessity for concentrating upon the improvement of faculty welfare. The increase in student enrollment, competition in the academic marketplace, and the retirement of many of the older faculty members has sharply focused the attention of the administration on the need for more attention to this area.

The college has established a goal of enlisting for its faculty outstanding young scholars. It has sought individuals in sympathy with its objectives. The difficulties inherent in the recruitment of a faculty have been reduced somewhat by the fact that Mississippi College has been a potent source of supply for college faculty personnel. There have been among our graduates many talented scholars who wish to work at Mississippi College. This factor rather than material inducements has enabled the college to maintain a creditable staff.

Beginning in 1956, the college administration and the Board of Trustees have concentrated upon the improvement of faculty salaries. An important factor in the encouragement of this development was the support of the Ford Foundation. The faculty salaries in 1962-63 averaged \$6,221.00. Faculty salaries at Mississippi College have been increased by 32% since 1957.

In addition to salaries, the Board of Trustees has been interested in fringe benefits. Mississippi College personnel are covered by social security. The college has developed as an additional protection a retirement program. This program is an independent one. The Board of Trustees has also maintained a health and life policy for the faculty on which the college pays twenty-five per cent of the premium.

## V. FINANCES

Mississippi College's record of thirty years of operation without a deficit has been accomplished by careful administration. In recent years the Board of Trustees has sought to increase the income of the college to permit an improvement in the quality of the program and an increase in the size of the student body. The success which has attended this effort is shown by the following statistics:

<u>Year Ending</u>	<u>Endowment Income</u>	<u>Per Cent</u>	<u>Tuition and Fees</u>	<u>Per Cent</u>	<u>Contributions Income</u>	<u>Per Cent</u>
7-31-55	\$49,781.50	10.7	\$312,711.70	67.5	\$100,938.85	21.8
7-31-56	57,133.66	10.0	422,492.72	73.8	92,462.49	16.2
7-31-57	59,385.32	10.0	422,605.27	71.5	114,267.66	19.5
5-31-58	55,763.15	10.3	368,645.35	68.5	114,754.64	21.2
5-31-59	60,518.29	7.8	511,965.39	66.3	199,991.53	25.9
5-31-60	63,129.26	8.0	526,043.28	66.7	200,000.00	25.3
5-31-61	66,341.25	7.3	573,722.68	63.3	265,901.04	29.3
5-31-62	84,650.78	8.0	741,757.01	69.8	235,786.14	22.2

In the winter of 1958-59, Mississippi College undertook a Development Program to raise additional funds for endowment and physical facilities. The goal was a minimum of \$500,000 and it netted in cash and pledges a total of \$574,726.99. This was supplemented by a loan of \$575,000 from the Housing and Home Finance Agency. These funds permitted an increase in the endowment, the construction of a student center, the renovation and redecoration of the former library building, and the purchase of attractive furnishings for the new Aven Fine Arts Building and the Leland Speed Library.

The Mississippi Baptist Convention has responded to the needs of the college by increasing its support funds. The college has received for current operations from the convention the following amounts:

<u>Year</u>	<u>Income Received from Convention</u>
1955-56	\$ 92,420.90
1956-57	112,192.66
1957-58	104,716.95
1958-59	171,607.21
1959-60	183,320.00
1960-61	180,821.00
1961-62	177,381.64

The Mississippi Baptist Convention has also aided the college in the development of its physical plant. In October, 1960, the convention completed a five-year program of capital gifts which brought to the college a total of \$417,047.37. The convention committed itself in 1959 to capital gifts of \$450,000 in the five-year period following November 1, 1960.

Mississippi College is receiving support through the Mississippi Foundation of Independent Colleges. Mississippi College became a member of this organization in 1958. It received from this foundation in 1961-62 a total of \$20,174.98. In addition to gifts through the foundation, Mississippi College has received contributions from the Esso Education Foundation, Coe Foundation, du Pont, Dow Chemical Company, Gulf Oil Company, Shell Companies Foundation, U. S. Steel Foundation, Southern Bell Telephone and Telegraph Company, Texaco, and approximately fifteen other foundations or companies.

Fifty-seven per cent of the gifts to the Development Program in 1959-60 were from alumni. Also, alumni established an annual giving program in 1960-61. This has become an important source of revenue.

Student fees were increased by twenty-five per cent in 1958 and by an added forty per cent in 1961. There was an increase of approximately twelve and one-half per cent in room rental in 1960-61 and from \$10 to \$15 in additional student fees. In relation to Mississippi's per capita income, Mississippi College students are paying a large proportion of the cost of their education. The budget for 1962-63 indicates that 72% of the college's educational and general income will be derived from student fees.

Under existing economic conditions, the major financial efforts of Mississippi College must be directed toward increasing the contributions income and increasing the endowment.

## VI. ALUMNI

The quality of instruction received by Mississippi College graduates is demonstrated by a survey taken of the Class of 1959. Over 35% of the class indicated their intention to attend graduate schools. The class furnished one of the two state candidates for the coveted Rhodes Scholarship. That same scholar was awarded a Fulbright Fellowship, a Woodrow Wilson Fellowship, and a Duke University Fellowship.

Members of the most recent graduating class were offered fellowships ranging from National Science Foundation grants to a Woodrow Wilson Fellowship.

Fifty-five Mississippi College alumni have served as college presidents. Twelve have headed chemistry divisions in American institutions of higher learning. Five alumni are currently serving as heads of English departments in colleges and universities. A Mississippi College graduate was president of the American Mathematical Society in 1957-58. The National Research Council of the National Academy of Sciences reported that 110 Mississippi College graduates had earned the Ph.D. or Ed.D. degrees. Approximately the same number have earned the Th.D. degree. Dr. Allan O. Pfister in A Report on the Baccalaureate Origins of College Faculties reported that Mississippi College ranked 161st among all the colleges and

universities in providing the baccalaureate training of faculty members in service in the United States in 1955-56. Mississippi College shared the rank of 20th with three other institutions among all the co-educational, liberal arts colleges of the country in new names listed in Volume 32 of Who's Who in America, and ranked 95th among the country's more than 1200 private higher educational institutions in total number of names listed.

Mississippi College furnishes ten per cent of the new teachers for the public schools of the state. The president and vice president of the Mississippi Education Association are alumni of the college. The director of the Jackson Public Schools, the largest school system in the state, reports that Mississippi College furnishes more of their faculty members than any other institution.

Mississippi College has maintained a nationally famous science department. A study by Dr. M. H. Trytten, of the Office of Scientific Education, National Research Council, reveals that Mississippi College ranked first among the liberal arts colleges of the southeastern states in the number of baccalaureate graduates achieving the chemistry doctorate. The same study showed that Mississippi College ranked sixth among universities and technical schools of the southeastern states in the number of baccalaureate graduates achieving the chemistry doctorate. The college ranked thirteenth among all of the liberal arts colleges in the United States and forty-third among the colleges, universities and technical institutions of the United States. Professor A. E. Wood, emeritus head of the Department of Chemistry, was awarded one of the six Manufacturing Chemists' Association College Teacher Awards in 1958 in appreciation of his great teaching.

It is not surprising then, to find that graduates of the college hold top scientific posts in such organizations as the Standard Oil Company of New Jersey, American Telephone and Telegraph Company, Shell Oil Company, and du Pont. Two of the top officers in the National Science Foundation are Mississippi College graduates as is the holder of a James B. Duke professorship. One of Columbia University Medical School's outstanding geneticists is an alumnus of the institution.

The college's alumni have been prominent in the field of business. The former chairman of the board of Royal Crown Cola Company is an alumnus of the college. Another alumnus has developed the broiler industry into one of the state's major businesses. A nationally-known industrial relations consultant is a graduate of Mississippi College. At the risk of exaggeration, it is difficult to find a major business enterprise in Mississippi that does not have an alumnus of the college in a key position.

In the field of government, Mississippi College proudly claims the governor of the state as one of its alumni. Five alumni of the college have served in the governor's office and several have served as members of the congressional delegation. Three members of the State Supreme Court and the Attorney General attended Mississippi College. One of the three federal judges in the state is an alumnus of the college. The individuals who have held less important political posts are numerous.

Approximately one-third of the ordained Baptist ministers in the state are Mississippi College alumni. The Executive Secretary of the Southern Baptist Sunday School Board is a Mississippi College graduate. In 1962, the executive secretaries of the state conventions of Arizona, California, Louisiana, Washington, and Oregon were alumni of the college. The president of one of the six Baptist seminaries and four of the 54 presidents of Baptist colleges are Mississippi College graduates. The college has 81 alumni serving as foreign missionaries.

Perhaps the greatest contribution of Mississippi College has been in the implanting of high ideals among students as well as providing them with quality training. The college's proudest contribution is the service that graduates have rendered as leaders and citizens in their respective communities.

## VII. DEVELOPMENT OF PLANT AND INCREASE OF ENDOWMENT

The development of facilities to enable Mississippi College to meet its opportunities is one of the problems of the Board of Trustees. In meeting this responsibility, the Board of Trustees had the advice of the faculty, a special alumni committee, and counsel from visiting specialists. It is particularly indebted to Olmsted Associates of Brookline, Massachusetts, for their suggestions. The program as outlined will enable the college to take care of 3,000 students.

In 1960, a program for the advancement of the college was proposed by the interested groups. It was expected it would require the decade of the sixties to realize this program.

*Adequate land acreage	\$ 85,000.00
* B. C. Rogers Student Center	780,000.00
* Cafeteria renovation for Women's Health and P. E. Building completed by fall of 1961	25,000.00
* Old Chapel--renovation completed by fall of 1962 for Bible and Philosophy and Chapel	130,000.00
* 174-bed dormitory completed by fall of 1962	550,000.00
* 190-bed dormitory completed by fall of 1962	550,000.00
** Self Hall for Business and Economics	400,000.00
** Renovation of Chrestman Hall	280,000.00
Science Building	500,000.00
Renovation of Provine Hall	300,000.00
Improvements and additions to plant	500,000.00
Field house	750,000.00
100 apartments for married students @ \$7,000 each, 1/2 by 1966, 1/2 by 1970	700,000.00
182-bed dormitory ready for occupancy by fall of 1967	550,000.00

\* Completed on or before December 31, 1962.

\*\* Work in progress, January, 1963.

Additional endowment (general)	\$ 1,700,000.00
Endowment (scholarships for ministerial students)	1,000,000.00
	<hr/>
Total	\$ 8,800,000.00

VIII. OPERATIONAL IMPROVEMENT

Mississippi College has consistently endeavored to improve the quality of its educational program. The provision of the necessary facilities is one part of this effort. The college is also endeavoring to provide increased income to take care of its projected enrollment. The increase in income will be of assistance in maintaining the high quality of educational program.

The enclosed charts of estimated faculty salaries and income projection are summaries in depth of the college's projected development. These projections are based upon anticipated economic development of the state and the consistency of the college in the control of the enrollment. They represent a challenge to our constituency that is in the realm of achievement.

## ESTIMATED FACULTY SALARIES

The Clarion-Ledger JACKSON DAILY NEWS 1  
Sunday, May 27, 1962 SECTION C

## Highest National Accreditation At MC

By NORMAN H. GOUGH

Accreditation by the highest national body on teacher education now belongs to Mississippi College. The National Council for Accreditation of Teacher Education informed the college this week that it had been granted full accreditation for the program of training for elementary and secondary teachers.

This is one of the most definite steps forward in the area of teacher education ever experienced by the college.

Mississippi College becomes the first private college in the states who have accepted accreditation. Membership means that any graduate of the college with a major in the proper field of education will be eligible for a teachers certificate in any of the 36 states who have accepted accreditation by NCATE as their guide for certification.

The NCATE is an organization whose sole purpose is to improve teacher education through accreditation. Only qualified institutions that apply voluntarily and are found by examination to meet established standards for the preparation of teachers are accredited by the Council.

Accreditation covers both the undergraduate and graduate programs of the college.

Strict criteria must be met before a college or university is accredited. The Council regards accreditation as adequate insurance of the general financial stability of the institution, the effectiveness of the administration, the adequacy of the general facilities, the appropriateness of the overall program including general education and subject matter majors, the general strength of the faculty, the faculty personnel policies of the institution, and the quality of instruction.

The strengthening of the teacher education program at Mississippi College has been one of the major goals of the Division of Education and Psychology. Under the leadership of Dr. J. W. Lee,

the division has experienced new growth within the past several years. Accreditation by NCATE has been a by-product of this growth.

The division has turned out many leading teachers throughout the state and the country through its teacher education program, but the need of a stronger program was evident in an effort to keep up with the changing times of society.

Many changes have taken place within the past year to assure a top notch teacher education program. A leading Nebraska educator said recently that tomorrow's teacher must be a truly superior person with a solid foundation of knowledge and intellectual toughness. Mississippi College desires to supply such teachers.

### MC ADDS LANGUAGE LABORATORY

A new \$6,000 language laboratory will be in operation at Mississippi College before the next fall semester.

Located on the third floor of Nelson Hall, the lab will provide the foreign language department with the latest equipment for instructional purposes.

Charles E. Martin, associate professor of foreign languages, said the lab will include thirty positions with a master position for the instructor.

The RCA equipment will allow the professor to listen in on each student individually or on the group as a whole. The student will also be able to converse with the professor without disturbing other individuals.

Martin also said that the lab would include two tape decks that would allow the students to record their progress from time to time.

A committee on teacher education was established this year to serve as a single agency for the preparation of teachers. Appointed by the president of the college, the committee is responsible for all changes in teacher education and for all policies relating thereto.

Its membership determines the undergraduate degree requirements essential for qualifying a student to receive endorsement for teacher education.

Rigid entrance requirements to the program have been instituted in an effort to provide our schools with better qualified instructors. Admittance to Mississippi College does not entitle a student to a curriculum in teacher education or to pursue courses therein.

Admission policies in teacher education at the college, as well as retention policies, are based on the premise that academic ability and achievement, health and physical fitness, personal and social qualities, are important factors in the preparation of teachers.

Students admitted to the teacher education program are subject to progressive evaluation as they proceed in their work.

Graduate students entering the program also must meet certain minimum qualifications and entrance to the Mississippi College graduate school does not assure entrance to the teacher education graduate program.

Selected admissions for entry into the teacher education curricula has enabled Mississippi College to produce teachers who are acceptable throughout the country.

A recent survey revealed that almost one-third of the students receiving the bachelor's degree at the college in 1961 are now teaching school in some section of the United States. The survey showed that 31.03 per cent of the graduating class are now in the

teaching profession, located from Florida to Alaska, and teaching all subjects from lower elementary grades to senior high school.

These figures were equal to the national average according to a comprehensive survey by the National Opinion Research Center at the University of Chicago. The center asked some 33,782 graduating seniors in 135 colleges and universities about their careers following graduating and found that 32 per cent intended to enter the teaching profession.

The Mississippi College survey also disclosed that the greater portion of those graduating with teaching certificates were employed within the state. Of the 108 students entering the teaching field, '86 were employed in Mississippi and 22 went outside the state for employment.

Another step taken to strengthen the teacher education program was the abolition of the secondary education major and the insertion of the requirement that all students seeking preparation for secondary teaching must have a major in a subject area.

The National Teachers' Examination will be required of all students in teacher education before granting a degree from Mississippi College. The college is the first institution in the state to make this test mandatory.

Mississippi College is moving forward in the field of teacher education. "The future demands more and better teachers, and the challenge lies squarely on our doorstep," says the dean of one of our large universities. Mississippi College has accepted the challenge and has removed it from her doorsteps and placed it into operation in a well-constructed teacher education program.

## SECOND IN STATE

# MC Graduate School Nationally Accepted

CLINTON — Mississippi College has been approved for full membership in the U. S. Council of Graduate Schools, according to joint announcement by Dr. R. A. McLemore, president, and Dr. Guy C. Mitchell, dean of the graduate school.

Mississippi College becomes the second in the state to be admitted to the highly selective group, the other member school being the University of Mississippi. Only 180 U. S. colleges and universities are members, including a number of universities offering the PhD degree.

Other members include Vanderbilt, Tulane, Louisiana State, Johns Hopkins, Emory, University of Florida, Duke, Southern Methodist, Rice and others.

The graduate school at Mississippi College has grown yearly since the college began graduate instruction on a systematized basis in 1950. Two graduate degrees are offered master of arts and master of education.

Of the 427 graduates during the 1960-61 school session, 79 received masters degrees.

During past years Mississippi College has attracted a large group of high school teachers from Mississippi and northern and central Louisiana to its graduate program.

Two special graduate institutes that were offered last summer will again be available this summer one for high school counselors labeled National Defense Counseling and Guidance Institute; the other the Coe Foundation-spon-

sored American Studies Seminar for high school history and social studies teachers.

Graduate work is available in education, social studies, English, history, botany, political science, economics, sociology, and physics, with limited offerings in chemistry, psychology, speech, and zoology.

## WITHIN STATE

# Mississippi College Tops In Who's Who

CLINTON, Miss. (Special) — Mississippi College ranks first in Mississippi among the private institutions of higher learning in the number of names included in Volume 32 of Who's Who in America.

Figures released this week by Arthur E. Nealy, educational director of A. N. Marquis Co., publishers of the volume, disclosed that Mississippi College led all other private institutions in the state in number of alumni listed.

The study by Nealy also revealed that Mississippi College ranked high on a national basis among private colleges and universities. The Baptist college was ranked 95th among the country's more than 1200 private higher educational institutions in number of names.

In a further breakdown of college classification, Mississippi College was 23rd among the country's private, coeducational, liberal arts colleges.

Taking its denominational relationship into account, the Clinton college ranked seventh in the country among educational institutions controlled by the Northern and Southern Baptist denominations.

Eight Mississippi College alumni were honored by having their biographies listed for the first time in volume 32 of Who's Who. Included in the latest volume of the widely recognized publication were Dr. Bowen C. Dees, Dr. Thomas D. Fontaine, Malcolm D. Gilchrist, Dr. John F. Latimer, Preston S. Stevens, Dr. Charles M. Tolbert, Dr. Wilfred C. Tyler, and Dr. D. M. Nelson, Jr.

The new edition also cited another distinguished alumnus, B. C. Rogers, for his philanthropy in supporting higher education. The student center building on the campus is named in his honor.

Nealy indicated that Mississippi College was preceded only by two of the large state universities in number of names in the new volume among all educational institutions in Mississippi.

Dr. R. A. McLemore, president of the college, in commenting on the high ranking, said, "We are very pleased with this fine showing. It bears out a fact we have long known, that Mississippi College provides a quality education that allows its alumni to compete favorably with those from many of the larger educational institutions."

# Third Of MC Grads Hold Teaching Posts

CLINTON — Almost one-third of the students receiving the bachelor's degree at Mississippi College in 1961 are now teaching school in some section of the United States.

According to information revealed in a survey by Dr. Guy L. Mitchell, dean of the graduate school and director of the Bureau of Appointments, 31.03 per cent of the graduating class are now in the teaching profession.

This percentage is equal to the national average according to figures released following a recent comprehensive survey by the National Opinion Research Center at the University of Chicago. The center asked some 33,782 graduating seniors in 135 colleges and universities about their careers following graduation and found that 32 per cent of the group intended to enter the teaching profession.

The 1961 graduating class produced 108 students who are now school teachers throughout the country, ranging in location from Florida to Alaska, and teaching 11 subjects from lower elementary grades to senior high school.

The survey showed that out of the 108 persons entering the teaching profession, 86 were employed in Mississippi schools and 22 went outside of the state for employment. A larger proportion of the elementary teachers went outside the state borders than did secondary school teachers. The states of Florida, Georgia, and Tennessee employed the largest number of these teachers.

More than half (52.92 per cent) of the 1961 graduates majored or minored in education—counting both undergraduate and graduate students. Besides the 108 who actually accepted teaching positions, 51 others qualified to teach but elected to enter other fields of work, became or continued to be housewives, entered the armed forces, or departed for graduate schools.

Of the Mississippi College graduates actually entering the teaching positions, 40 were elementary majors and 68 were students accepting high school teaching responsibilities.

In a more detailed breakdown of the 68 high school teachers, eleven were English teachers with nine others teaching English and one other subject; eleven were instructors in mathematics with one teaching an additional subject; eight were coaches and teachers of other subjects; nine were social studies teachers, with three having additional subjects; six were business education teachers; three were art instructors; two were home economics teachers; two were instructing music; and there was one each librarian, special education teacher, history and driver education, history and French, Latin, girls physical education, and science.

One of the more interesting facts revealed by the Bureau of Appointments survey was the large number of math students entering the critical field of mathematics instruction. The number in the '61 class more than

tripled the number that have entered this field in recent years.

# Mississippi College Ranks Among Top According To Education Commission

Mississippi College has again ranked among the top of Southern Baptist colleges and universities in total number of graduates according to a report in the latest issue of the "Southern Baptist Educator."

The report, compiled by the Education Commission of the Southern Baptist Convention in cooperation with the Southern Association of Baptist Colleges and Schools, showed that Mississippi College ranked fifth among the 33 Baptist institutions in 1962 graduates.

Of these 33 senior colleges operated under denominational control, only Baylor University in Texas, Wake Forest College in North Carolina, Howard College in Alabama, and the University of Richmond in Virginia produced more '62 graduates than did Mississippi College.

The report showed Baylor with 1,223 graduates, Wake Forest with 495, Howard with 442, University of Richmond with 419, and Mississippi College with 406.

Of the 406 receiving degrees from Mississippi College, 65 students received the master of arts or master of education degree while 342 were awarded one of the five un-

dergraduate degrees offered by the college.

The Education Commission report revealed that Mississippi College was seventh in net enrollment among Baptist colleges and universities as of October 1, 1962.

Baylor heads the net enrollment list with a student population of 6,283. Trailing the big Texas University were Wake Forest with 2,915, Howard with 2,173, University of Richmond with 2,145, Stetson University with 1,760, Hardin-Simmons University with 1,699, and Mississippi College with 1,690.

The 33 Southern Baptist senior colleges had a net enrollment total of 39,041 as of October 1, an increase of 1,183 over the same period last year. The total enrollment, which includes non-credit, extension, and correspondence classes, was 47,222.

The total number of 1962 graduates for the combined colleges was 7,195, as compared to 6,555 in 1961.

Mississippi College is the second oldest educational institution supported by Baptists, being founded in 1826, and ranks as the oldest senior college in Mississippi.

April 11, 1962

## M.C. Given NSF Grant

CLINTON — Mississippi College has received a major grant of \$15,740 from the National Science Foundation in Washington, D.C., for another in-service institute in science and mathematics for secondary school teachers in 1962-63.

The large grant will enable Mississippi College to offer this in-service institute for the fourth consecutive year and allow teachers to obtain supplemental training during out-of-school hours. Dr. Archie H. Germany, chairman of the Division of Science and Mathematics, will again serve as director of the foundation supported institute. The institute enables teachers

to obtain additional knowledge of the subject matter of science and mathematics as well as to become acquainted with important new textual and laboratory materials developed by study groups concerned with the improvement of course content materials. Courses will be offered in the fields of math, chemistry and biology.

Fifty-five secondary teachers have participated in this year's program at Mississippi College, with some commuting as far away as towns in central Louisiana. Three hours of graduate credit is given upon completion of this institute.

All instructional costs will be paid by the National Science Foundation and no tuition or other fees will be assessed to the participating students. The grant also

includes provision for each participant's transportation costs to the weekly class meetings, plus a book allowance.

To qualify for selection to the institute, Dr. Germany stated that a participant must currently be teaching science or mathematics in junior or senior high school within commuting distance from Mississippi College, hold a bachelor's degree from an accredited college or university, and meet

Wednesday, April 11, 1962

graduate school admission requirements.

Applications are currently being received for the 1962-63 session. Complete information on the in-service institute may be obtained by writing to Dr. Germany at Mississippi College, Clinton, Miss.

# Education Our Best Weapon For Defense Against False Doctrines

A noteworthy project in state higher education is the American Studies Seminar for high school teachers being sponsored for the second consecutive year by Mississippi College. Its purpose is to bring 40 selected teachers back to college for a five-week refresher course in American history, literature and philosophy.

Mississippi College officials tell us the response to the first American Studies Seminar was enthusiastic and highly favorable. All high school teachers participating last year felt that it gave them a better understanding of our American heritage and will enable them to do a better job of passing these ideals on to the young Mississippians they teach.

The seminar is sponsored through a \$10,000 grant from the Coe Foundation. The 1962 course begins July 12 and extends to August 18. All studies will be presented on the graduate level. Qualified participants may receive six hours of graduate credit toward the master's degree for successful completion of the seminar.

Program of study will include courses in Our American Democratic Heritage, The Shaping of an American Tradition in Literature, and The Philosophical Bases for American Culture. Each participant will be required to take the course in American

History. Evening sessions will feature lectures by outstanding authors on American literature. Business, civic and professional leaders will lecture and lead panel discussions on related subjects.

High school teachers interested in applying for the Seminar fellowships should contact their local school principal. The full fellowships cover all expenses of tuition, books, meals and lodging for the five-week program. Selection of fellows will be made on the basis of experience, interest in the field and aptitude for advanced study.

Seminar sponsors remind that our strongest defense against the threat of false ideologies in the United States is a positive program of education to make young and old alike aware of the traditional values that have made our Republic a world leader.

The influence of this special Mississippi College program will be felt in many classrooms and many young Mississippians will be helped thereby to capture the true spirit of their great heritage.

Other colleges and universities can render great public service by stressing this vital phase of education through special courses and programs along the lines offered by the fine institution of higher learning at Clinton.

**LARGE GRANT**—Mississippi College in Clinton has received a \$100,000 gift from the Self Foundation of Marks, Miss., for the construction of a new business and economics building. Members of the foundation are, left to right: P. M. B. Self, founder of Riverside Industries, and his two sons, William King Self, center, president of the firm, and Henry C. Self, vice-president. The new business building will be known as Self Hall.—M. C. Photo

# MC \$100,000 Grant By Self Foundation

## Will Be Used To Build Business Ed Building

CLINTON — The Self Foundation of Marks, Miss., today announced a grant of \$100,000 to Mississippi College in Clinton for the construction of a building for business and economics.

The building, a \$400,000 structure, will be named Self Hall.

The grant will be accompanied by a loan of \$150,000 from the foundation to enable the immediate construction of the building. Completion of the new hall is scheduled for the summer of 1963.

Active in philanthropy for the past 12 years, the Self Founda-

tion is composed of P. M. B. Self and his two sons, William King Self and Henry C. Self.

In announcing the grant, William King Self said, "We hope this grant will encourage the establishment of a superior school of business and economics at Mississippi College to provide our state with an increasing supply of capable management personnel."

The Self family has demonstrated its business leadership in Mississippi for over 50 years. To-

day the family is engaged in a wide range of business interests including manufacturing, farming, banking, lumber, and retail merchandising.

Under the name of Riverside Industries, the family operates a complex of plants and sales outlets supplying fertilizer, feed, seed, herbicides, and insecticides to farmers in the Mid-South area.

P. M. B. Self, founder of Riverside Industries, has turned over the active management of the operations to his sons William King, who serves as president of Riverside, and Henry, who is vice-president.

A former Mississippi College student, P. M. B. Self began his business career in Marks in 1904 as youngster of twenty-one with \$800 in savings in his pocket to start a small general store for the town's 400 residents. His business acumen and genuine interest in the welfare of his neighbors gave the momentum for that modest county store to grow into a statewide industry.

An active Baptist, Mr. Self has served as chairman of the board of deacons in the local church and as chairman of the Board of Trustees of the Baptist Memorial Hospital in Memphis. He has been active in civic affairs as president of the Marks School Board for 31 years and in the Delta Council. He was also president of the Coldwater-Tallahatchie Flood Control Association.

William King Self now directs the wide-spread operations of Riverside, but finds time to actively participate in other business, civic, and church organizations. He is a director of the Southern Bell Telephone and Telegraph Company and is listed in Who's Who in America. He is a member of the state A and I Board, the Chicago Board of Trade, the Young President's Organization, the Newcomer Society, and president of the National Soybean Processors Association.

Riverside's vice-president Henry C. Self also supervises large farming interests in Quitman

County. He is vice-president of the Board of Trustees of the Baptist Memorial Hospital in Memphis, president of the Big 3 Lumber Company, president of Marks Seed Company, a director of the Delta Council, and a troop committeeman with the Boy Scouts.

According to Mississippi College President R. A. McLemore, Self Hall will be a three-story brick structure housing the Division of Business and Economics. Among other modern classroom facilities, the new building will be designed to house a computer center for instruction and research.

The architectural firm of Mattingly and Biggers of Jackson will plan the building.

The acceptance of the gift and authorization for the loan of \$150,000 was approved at a special called session of the Mississippi Baptist Convention board on the college campus last Thursday. The board, acting ad interim for the entire state Baptist Convention, voted unanimous approval of the resolution.

## Self One Of Mississippi And South's Top Leaders

**CLINTON** — The naming of the new business building at Mississippi College for P. M. B. Self is most appropriate. It honors a man who has been one of the most successful men in Mississippi and the South.

Mr. Self, founder of the Riverside Industries in Marks, believes in the philosophy "Make the people around you prosperous, and you will prosper yourself". This simple statement has been his success formula.

Mr. Self first became known in Mississippi circles while attending Mississippi College. After several terms at the Baptist college he ran for, and was elected, sergeant at arms of the Mississippi State Senate of 1904, defeating twelve other candidates for the position. This victory meant much to the young college student as this was the first Senate session in the New Capitol building.

The salary for the Senate job was \$4.00 a day for 100 day term.

From this amount he saved \$196 which, with a slight stretch of the imagination, was used as the original capital of Riverside Industries. More money was needed, however.

He then borrowed \$430 from his grandmother, demonstrating another principal of American business: If you show you can handle money, you can always borrow more. He sold his horse and some other possessions and ended up with a grand total of \$800.

He tucked this money away in his pocket and journeyed to the "Mississippi Bottom" to the little town of Marks and opened a

general country store, supplying the various needs of a farming community. Ten years later he bought his first piece of land, the forerunner of many thousands of acres of farmland he was soon to own.

That same year he made his first venture into industry, establishing a cotton gin. He immediately saw that industry to support agriculture needed more money, but the money was not available. So in 1917, along with several others, he started the Citizens Bank and Trust Company of Marks. The bank opened with \$25,000 in capital and \$2,500 surplus. It survived the inflation period of the 20's and the financial setbacks of the early 30's and today has a total capital account of more than \$900,000 and resources of nearly \$6 million.

In 1940 he realized the need for another oil mill in northwest Mississippi, and setting aside facts that oil mills were not profitable, he built the Riverside Oil Mill at a cost of \$300,000. It prospered almost from the beginning because it filled a need—a need of the farmers and a need of jobs for other members of the Self household.

P. M. B. Self knew that a progressive community needed non-business enterprises as well as industry and commerce. With the same enthusiasm that he entered business, he entered into civic and religious activities. He helped organize the Marks Baptist Church and served as chairman of the Board of Deacons for many years; he was a long-time

member and chairman of the Board of Trustees of the Baptist Memorial Hospital in Memphis, the largest Baptist Hospital in the world; he served as president of the Board of Trustees of the Marks School District for 31 years; he served as a director of the Delta Council and as president of the Coldwater-Tallahatchie Flood Control Association; and has been active in many other organizations.

Success in business was not the sole goal for Mr. Self. He wanted a successful family and he has seen his wish come true. Married to Sallie King of Okolona in 1910,

the Sells have five children: William King, Riverside's president; Henry C., vice - president; Miriam (Mrs. Hill Blalock); Marjorie (Mrs. William Crabill); and Evelyn (Mrs. Paschal Holcomb). The two sons and a son-in-law now operate Riverside Industries, giving Mr. Self time to manage other interests.

Success in business and success in family. From a modest country general store to a statewide agriculture business. These have been the goals attained by P. M. B. Self. He desires to see other young Mississippians do the same. The business school which he and his sons are establishing at Mississippi College will help train the successful businessmen of tomorrow. It will be another mark of achievement for a man who has meant much to the economy of his native state.

## MISSISSIPPI COLLEGE

### CAMPUS

This building, completed in 1928, provides a large gathering place for administrative offices, classrooms, laboratories, and faculty offices. Named for President Sterling D. Nelson, the building rises as the central building of the campus.

### NELSON HALL

This building completed in 1948, provides a large auditorium plus administrative offices, classrooms, laboratories, and faculty offices. Named for President Emeritus D.M. Nelson, the building rises as the central building of the campus.

OLD CHAPEL

Originally constructed over a century ago, the Old Chapel has been completely renovated for the use of the Division of Religion. Symbolic of the richest Mississippi College tradition, the Old Chapel contains a small auditorium for religious services plus modern classrooms and faculty offices.

The Library also houses the Mississippi Baptist Historical Collection with storage vaults for rare documents. Provided by the Island Board Society, the building was completed in 1990.

### LELAND SPEED LIBRARY

This building is airconditioned and equipped to house 110,000 volumes. Spacious reading rooms, classrooms, offices, and study carrels for graduate students make it a hub of academic work. The library also houses the Mississippi Baptist Historical Commission with storage vaults for rare documents. Furnished by the Leland Speed family, the building was completed in 1959.

This building was constructed in 1959. The four story structure offers complete facilities for the departments of music, art, speech, and drama. In addition to classrooms and practice room space, the building has a recital hall, lecture hall with a seating capacity of over 100.

AVEN FINE ARTS BUILDING

This building was constructed in 1959. The four story structure offers complete facilities for the departments of music, art, speech, and drama. In addition to classroom and practice room space, the building has a recital auditorium with a seating capacity of over 300.

PROVINE HALL

This building provides lecture and classroom facilities for the Division of Science and Mathematics.

### B.C. ROGERS STUDENT CENTER

Completed in 1960, the airconditioned center contains cafeteria facilities, a coffee shop, banquet rooms, recreation and lounge areas, the college book store, student body offices, alumni offices, conference rooms, and student religious activities offices.

SELF HALL: THE NEWLY COMPLETED HOME OF THE DIVISION  
OF BUSINESS AND ECONOMICS

## MISSISSIPPI COLLEGE BUSINESS AND ECONOMICS DEPARTMENT

The Business Department at Mississippi College began in 1923 when Mr. O. H. Little organized a few classes, purchased his own equipment and collected fees from the students for his salary. In those days the college granted credit for business courses but did not pay the salary of the instructor. At this time and for many years later the college did not feel business courses should be a part of a liberal arts education. We are glad that time and conditions have changed these views and today the Division of Business and Economics holds a respectable position in the curriculum.

After seven years Mr. Little left and the department was taken over by Mr. George Marion Rogers in 1930. And even he was leadened with the responsibility of buying his own equipment and collecting fees from the students. A few typewriters and a couple of adding machines composed his tools for teaching. He worked under these conditions until his death in 1945.

For the next two years Mr. Walter McGuffee and Mr. C. H. Farnsworth, assisted by Miss Eleanor Grace Polk of the Clinton High School, had charge of the Business Department. At this time it was made a regular department and the teachers placed on the payroll. Several new courses were added during this time.

In 1948 Miss Frances Skulley came to Mississippi College and has remained until the present time. From that time the staff has grown from two full-time and several part-time teachers to six full-time teachers and five part-time teachers in 1960. The number of courses since 1948 has increased from twenty-three to forty-three. There were four major departments: General Business, Accounting, Business Education, and Secretarial. The Economics Department became a part of the Division in 1959.

There has been a steady increase in the number of graduates from the department. The following table, as determined by the number of graduates, reflects this growth:

1947-----14	1953-----28	1959-----39
1948-----21	1954-----33	1960-----70
1949-----31	1955-----39	1961-----72
1950-----42	1956-----62	1962-----59
1951-----27	1957-----70	1963-----56
1952-----34	1958-----56	1964-----58

The Business Department was located in the basement of Chrestman Hall, one of the boy's dormitories, until 1949 when Nelson Hall was built. It was moved to the third floor of that building and remained there until February of 1964. At this time Self Hall was constructed and now the Division of Business and Economics is enjoying its new, modern facilities. Self Hall is a modern three story, air-conditioned building. It has an auditorium with a seating capacity of 255, large reading room and lounge, teaching laboratories, classrooms and private faculty offices. This building, grounds, and equipment are valued at \$545,000.00. It contains an IBM Computer Center which the entire college will use. Training for the business students will also be available. The value of this equipment is estimated at \$175,000.00. Approximately \$13,000 is invested in typewriters, calculators, adding machines, duplication machines, and transcribing machines.

Self Hall was made possible by a substantial gift from the Self Foundation, Marks, Mississippi, and by a gift of land from the Latimer Family, Clinton, Mississippi.

In 1959 Dr. D. G. Miley joined the staff and was made head of the Division of Business and Economics. The other full-time members of the staff at this time are Mr. Albert Craven, Mrs. Iva Ball Jackson, Miss Frances Skulley, and Mr. Lawrence Smith. There are six part-time teachers this year.

The following people have at one time or another been a member of the teaching staff and have helped to strengthen the department: Mr. Harry Howell, Mr. William Geer, Mr. Henry Nash, Dr. W. M. Caskey, Mr. William Thornton, Miss Jane Sullivan (Mrs. George Ladner), and Miss Mabel Baldwin.

Since 1950 there have been 50 business majors to continue their graduate education in many of the universities throughout the nation. Twelve of the graduates have received the Certified Public Accountant's certificate, four of these with no advanced training.

The graduates are successful as presidents of two of the branch banks in this area; two graduates are in the state legislature; four are missionaries; twenty are now doing full-time Christian work; one has become a medical doctor. The largest number of the graduates are holding prominent jobs in business and industry. Still others are teaching business subjects and many are in secretarial positions. We continue to get good reports on our former students and only as they succeed do we feel we succeed.

THE ORGANIZATION OF BUSINESS AND ECONOMICS  
Mississippi College  
Clinton, Mississippi

James Thomson  
Executive Director  
Delta Sigma Pi  
330 South Campus Avenue  
Oxford, Ohio

Dear Mr. Thomson:

On behalf of the Organization of Business and Economics, I would like to review some of our activities over the past two years for the benefit of the Grand Council and yourself. Included in our petition is a very brief summary in Dr. Miley's letter of recommendation; however, we are sorry we over looked giving you a more exact account of our progress.

The Organization of Business and Economics has been in operation for two years, dating from 1961 of our fall semester. From that time the organization has made steady progress under the leadership of Dr. D. Gray Miley. Since the beginning of our organization, the purpose has been to bring together the students of business and economics in both social activities and educational opportunities, through the use of many renown speakers in fields of economics, politics, and social work. Some of these speakers have been: Representative Russel Davis of the Mississippi House of Representatives, Lawrence Chaffin of the Mississippi Economic Council for the Chamber of Commerce, and Clarence Lott of the Southern Bell Telephone Company, to mention just a few of persons and their positions.

Activities for this year included: Spring Spectrum, a school-wide variety musical sponsored by our organization to raise the money for installation next year. This was not only a financial success; but, brought mass recognition for our organization and our plans for affiliation with Delta Sigma Pi.

Officers of the first organization were: President; Dean Lyles; Vice-President, Charles Langford; Secretary, James Westbrook; Treasurer, Pete Costas; and Reporter, Denny Keverne. Officers of the second year were: President, Pete Costas; Vice-President, Denny Keverne; Secretary, Larry Johnston; and Treasurer, Jerry Laesser. Officers of the present organization are: President, Jerry Laesser; First Vice-President, Larry Johnston; Second Vice-President, Jon David Smith; Secretary, Donnie Daniels; Treasurer, Carl Fountain; Historian, Roger Speed; and Chancellor, Charles Cartee.

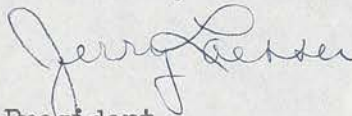

This includes some of the data of our past organization and some of its activities; however, we have bigger plans for next year, starting with an information booth at our fall registration and two informal social affairs to become acquainted with new students and transfer students, to insure the continuance of our chapter for many years to come. Upon acceptance by the Grand Council, we then plan for an installation service at one of the hotels here in Jackson. So you can see, we are planning on growing and have shown in the past the activity essential to make this growth possible.

I hope that this information will help in making you and the Grand Council more familiar with our organization and its activities and history.

Please let me know if we can start planning for next year's installation, as soon as you receive the result of the Grand Council.

Yours Truly

President

P.S. Enclosed is a list of the addresses of our members for the summer, if you can send information or the Deltasig to them it would be greatly appreciated.

DR. D. GRAY MILEY

Chairman, Division of Business and Economics

February 28, 1954

DR. D. GRAY MILEY

Chairman, Division of Business and Economics

Dr. Miley was born November 11, 1910, at Plant City, Florida. He graduated from the Plant City High School and then went on to college at the University of Florida, Gainesville, Florida. He received his B.S.A. degree in agricultural economics with a minor in economics. Dr. Miley continued his study at the University of Florida, receiving his M.S.A. in agricultural economics with minors in economics and agronomy. After receiving his Masters Degree, Dr. Miley attended the University of Virginia, Charlottesville, Virginia. Here he received his Ph.D. in Economics with a minor in statistics and marketing.

After graduation, Dr. Miley became Junior Statistician for Federal Land Bank, Columbia, South Carolina. Following this he was Extension Economist at the University of Florida, Assistant Professor of Economics at the Virginia Polytechnic Institute, Associate Professor of Agricultural Economics at Mississippi State University, and Managing Director of Panther Burn Company, Leland, Mississippi.

Dr. Miley is a member of the Southern Economic Association, America Farm Economic Association, and served for eight years as member of Production Economics Advisory Committee for the United States Department of Agriculture. He is listed in Who's Who in American Men of Science, has published several research bulletins and articles in professional journals, and served as member of Advisory Committee on Economic Research of Jackson Chamber of Commerce.

Very truly yours,

MISSISSIPPI COLLEGE

FOUNDED IN 1826

CLINTON, MISSISSIPPI

February 28, 1964

Mr. Charles L. Farrar  
Executive Secretary  
Delta Sigma Pi  
330 South Campus Avenue  
Oxford, Ohio

Dear Mr. Farrar:

I should like to recommend that the Grand Council of Delta Sigma Pi give serious consideration to the petition for charter by students in the Division of Business and Economics at Mississippi College.

During the past two years students majoring in this division have maintained a very active association. The leadership for the association's activities has come from the students themselves. The programs which have been sponsored have all been exceptionally good. Outstanding business leaders from this area of the state have been invited to speak to the students majoring in the division. In addition to the work in professional development, the student organization has sponsored several well-planned social activities. As an outgrowth of this very fine record, the students are now ready to petition for a chapter of Delta Sigma Pi. I believe the development so far justifies the granting of a charter at the earliest possible date.

The leadership being provided by the student group at the present time is exceptionally good. The enthusiasm is excellent, and I believe the success of a chapter is assured. One major contributing factor to this continued growth and development has been the completion of a completely new building especially designed for the teaching of business and economics. We occupied this building about three weeks ago and are finding that it meets all the needs for the further development of an outstanding division of business and economics. The building provides ample office space, reading room, seminar room, classrooms, machine and accounting laboratories, as well as a complete electronic computer center.

The students have responded in a most excellent way and are taking it on themselves to plan and execute every detail necessary to secure a charter for the establishment of a chapter of Delta Sigma Pi.

I would like to repeat again that I am convinced that they are ready for this development, and I would like to see a charter granted at the earliest possible time.

Very truly yours,

D. Gray Miley, Chairman  
Division of Business and Economics

MR. ROBERT L. CHAFFIN

Professor of Business and Economics

Mr. Chaffin is a graduate of Georgia State College, Atlanta, Georgia, receiving his B.S.C. in Economics. He later attended the Teachers College of Columbia University, New York, New York receiving his M.A. In 1955 Mr. Chaffin received his M.B.A. in Economics from the University of Chicago.

Mr Chaffin is manager of the Economic Research Division of the Jackson Chamber of Commerce and Research Director of the Central Mississippi Development District. He has been employed as an Economist for the First Federal Savings and Loan Associates of Chicago. Also, he has been an Assistant and Associate Professor of Economics at Georgia State College.

Mr. Chaffin is a member of the American Economic Association, Southern Economic Association, Regional Science Association, American Chamber of Commerce Executives, American Chamber of Commerce Researchers Association(Charter Member), Delta Mu Delta, and Who's Who in the South and Southwest.

MR. ALBERT L. CRAVEN

Head of the Department of Accounting

Mr. Craven was born and raised in Newton, Mississippi. He received his B.A. degree in Commerce and Mathematics from Louisiana College in 1953. In 1954 he received his M.B.A. in Accounting from the University of Mississippi. He then worked as senior accountant with Arthur Andersen & Co. from 1954 to 1957. In 1960, Mr. Craven obtained his C.P.A. license. As of now he is working on his Ph.D. at the University of Alabama.

Mr. Craven is very active in numerous organizations. he is a member of the Clinton Lion's Club, past president of the Clinton Elementary School P.T.A. Also, he is a member of the American Institute of Certified Public Accountants, Mississippi Society of Certified Public Accountants, American Accounting Association, American Association of University Professors, American Finance Association and he is listed in Who's Who in the South and Southwest. Mr. Craven is a member of Alpha Chi, Beta Gamma Sigma, Beta Alpha Psi and Fi Gamma Mu.

MRS. IVA BALL JACKSON

Head of the Department of Business Education

Mrs. Iva Ball Jackson (Mrs. Fletcher Jackson, Jr.) is a graduate of the Greene County Agricultural High School, Leakesville, Mississippi. After graduation she attended the University of Southern Mississippi for four years and received her B.S. Degree with a major in History and one minor in Social Science and one in Agriculture.

For four summer terms she attended Bowling Green College of Commerce to complete her major in Business Education. She received her Master of Business Education Degree from the University of Mississippi. Since that time she has taken courses in economics from the University of Alabama and the University of Mississippi. She has done graduate work at Mississippi State University and at the University of Denver.

Her years of high school teaching were at the Greene County Agricultural High School in Mississippi, Neely High School in Mississippi, Climax High School in Georgia, and Macon High school in Mississippi.

In 1954 Mrs. Jackson came from the Macon High School, Macon Mississippi, to Mississippi College as an Assistant Professor in Business Education. Six years ago she became an Associate Professor, and for the past three years she has been serving as Head of the Business Education Department of the Division of Business and Economics.

MISS. FRANCES SKULLEY

Head of the Department of Secretarial Science

Miss Frances Skulley is a graduate of the Canton High School, Canton, Mississippi. She attended Whitworth College, Brookhaven, Mississippi for one year and then attended Bowling Green College of Commerce, Bowling Green, Kentucky, where she received her B.A. degree in Business Administration. She received her M.A. degree in Business Education from the University of Michigan, Ann Arbor, Michigan. She has done additional work at the University of Chicago, University of Colorado, Columbia University and UCLA.

Her teaching experiences consist of five years high school teaching at Purvis, Mississippi, Eudora, Arkansas, and Andalusia, Alabama. She taught ten years at Copiah-Lincoln Junior College, Wesson, Mississippi and served as head of the department at that time. For the last seventeen years she has taught business subjects at Mississippi College, Clinton, Mississippi. For twelve of the seventeen years she was acting-head of the department of Business Administration. At the present time she is teaching in the Accounting Department, Business Education Department and serving as head of the Secretarial Department.

Miss Skulley has taken advantage of her summer vacations for travel and work in other parts of the country. She has taught at the Charron-Williams Business School in Miami, Florida and the Gardner School of Business at Silver Springs, Maryland. She has worked for a Steel Company in New York City. Another summer she toured Europe with a college group. She has visited in Canada and Mexico. She received a scholarship from Delta Kappa Gamma to attend summer school and the same summer was the recipient of a scholarship to attend the Family Finance workshop at UCLA in Los Angeles, California.

She is state representative for the Southern Business Education Association. She holds membership in the Mississippi Business Education Association, American Association of University Women, Delta Kappa Gamma, and National Business Education Association. She is listed in Who's Who in American Education.

#### VI. LAWRENCE C. SMITH

Associate Professor of Business Administration

Mr. Smith is a native Mississippian, born in Westville, Franklin County. He graduated from Duke High School via the U.S.S. examination. Also he had had various experiences in pulpwood, logging, and oil field work. Mr. Smith was inducted into the U.S. Army to serve during the Korean Conflict, where he attained the rank of 2nd Lt. Upon his release from the Army he entered Clark Memorial College at Newton, Mississippi, to study post-collegiate work that prepared him to pass the U.S.S. examination.

During the following three years he was married, spent one year in the oil-shore oil fields of South Louisiana, two years at Armstrong Tire & Rubber Co. at Natchez, Mississippi and attended Whitworth College at Columbus, Mississippi. He later graduated with distinction from Mississippi College with a double major in Economics and Business Administration. Mr. Smith was awarded a teaching assistantship at the University of Southern Mississippi and earned a Master of Science degree there in August 1955. In the summer of 1963 he began a program leading to a Ph.D. degree in Economics at the University of Mississippi.

MR. LAWRENCE C. SMITH

Associate Professor of Business Administration

Mr. Smith is a native Mississippian, born in Meadville, Franklin County. He graduated from Bude High School via the G.E.D. examination. Also he has had various experiences in pulpwood, logging, and oil field work. Mr. Smith was inducted into the U.S. Army to serve during the Korean Conflict, where he attained the rank of E-4. Upon his release from the Army he entered Clarke Memorial College at Newton, Mississippi, to study sub-collegiate work that prepared him to pass the G.E.D. examination.

During the following three years he was married, spent one year in the off-shore oil fields of South Louisiana, two years at Armstrong Tire & Rubber Co. at Natchez, Mississippi and attended Whitworth College at Brookhaven, Mississippi. He later graduated with distinction from Mississippi College with a double major in Economics and Business Administration. Mr. Smith was awarded a teaching assistantship at the University of Southern Mississippi and earned a Master of Science degree there in August 1962. In the summer of 1963 he began a program leading to a Ph.D. degree in Economics at the University of Mississippi.

# MISSISSIPPI COLLEGE

CLINTON, MISSISSIPPI

FOUNDED IN 1826

February 28, 1964

Mr. Charles L. Farrar  
Executive Secretary  
Delta Sigma Pi  
330 South Campus Avenue  
Oxford, Ohio

Dear Mr. Farrar:

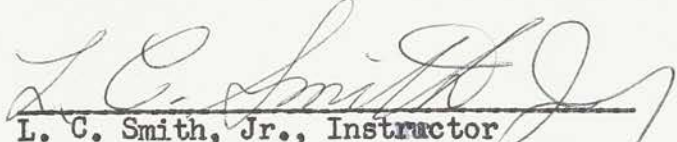

I have been a member of the faculty at Mississippi College for two years. The size of our school makes it possible for us to get to know our students personally.

I did some undergraduate work at Mississippi College as long as five years ago. As a result, I know many of the former graduates personally and have been in touch with them. I would say that certainly the success of the average graduate of our business school has been outstanding.

This semester we moved into a new business building furnished with modern equipment including a complete computer center. We are the second institution in the State of Mississippi so fortunate to have these facilities.

The enthusiasm of our students has been almost unbelievable. I am convinced, beyond any doubt, that our present student body is deserving, and would do justice to any professional organization, and that the facilities, quality of education, and reputation of our former graduates will continue to attract the quality students who would do justice to your organization far beyond the foreseeable future.

Sincerely,

---

L. C. Smith, Jr., Instructor  
Division of Business and Economics

LCSjr:ds

MR. JOHN S. TOWNSEND

Instructor of Business Administration

Mr. Townsend is a graduate of the University of Mississippi with a B.B.A. in Marketing. He also is a graduate of the Army Intelligence School. Mr. Townsend is an instructor in the night school and also a salesman for the Townsend Paper Company.
