

TO THE BOARD OF DIRECTORS OF THE INTERNATIONAL FRATERNITY
DELTA SIGMA PI

Dear Board of Directors,

We, the members of the Lambda Kappa Lambda Colony of University of South Florida Polytechnic, do hereby petition for a Chapter Charter of the International Fraternity of Delta Sigma Pi. The Lambda Kappa Lambda Colony was established exclusively for the purpose of association of Delta Sigma Pi. Our Colony continues to maintain the values and standards that are put forward for the International Fraternity of Delta Sigma Pi.

In this petition, you will find evidence of our commitment to upholding your standards and values through community involvement, professionalism, and creating a strong brotherhood for years to come.

Lambda Kappa Lambda vow to uphold the rules, regulations, and standards of Delta Sigma Pi as set forth in the Bylaws in the pursuance of a Chapter Charter and future association with the Fraternity.

We express a sincere thank you for your consideration in making our desires come true in establishing a chapter status on our campus. Our signatures are to follow and show our commitment.

RE: USF Polytechnic Delta Sigma Pi Colony (Petition for Chapter Status)

To the Board:

I write to express my enthusiastic endorsement of USF Polytechnic's Delta Sigma Pi Colony and their petition to obtain chapter status. The colony and its outstanding student leaders have already made a tremendous, positive impact on our campus, and their ideals of academic excellence and community service are an ideal fit with our campus culture and strategic plan.

Our business students here at USFP have a rich tradition of excellence and have always been a source of pride. However, as the Delta Sigma Pi group has taken shape over the past couple of years, I have noticed an even greater level of prestige attached to the department and its students. Their spirit and commitment has been exemplary and contagious.

I urge you to respond favorably to their petition for chapter status. I know they will be a credit to your organization nationally as they have been to our institution already.

Sincerely,

A handwritten signature in black ink, appearing to read "Marshall R. Goodman". The signature is fluid and cursive.

Marshall R. Goodman
Vice President & CEO

cc: Melissa Cobb, President Delta Sigma Pi / USFP Colony
Prof. Charles O. Kroncke, Director, USFP Division of Business

To: Delta Sigma Pi Board of Directors

From: Charles O. Kroncke
Business Division Director

A handwritten signature in blue ink that reads "Charles O. Kroncke". The signature is written in a cursive style and is positioned over the printed name and title.

Re: USF Lakeland Chapter Status

Date: October 17, 2008

As a former business school Dean, I can attest to the value to a business school of having a Delta Sigma Pi chapter on campus. The fraternity spearheads numerous professional events and conferences that benefit their membership, but in addition they are superb university citizens - supporting our development efforts and providing community leadership.

The strategic plan for USF Polytechnic is to transform itself from an upper division undergrad campus into a comprehensive Masters institution with a polytechnic mission. Enrollment is anticipated to expand to 16,000 students within the next decade. One of the strongest areas of growth is expected to be in the business school. Having a local chapter of Delta Sigma Pi will add to the attractiveness of our campus and will help us realize these ambitious goals.

The current leadership of the Delta Sigma Pi colony at USF Polytechnic is very meritorious. They have grown the colony and are building an infrastructure that will assure sustainable future membership growth. Without a doubt, they are the most prominent and reliable student group on campus. Whenever a student presence at an event is desired, Delta Sigma Pi is the first group contacted.

The campus administration admires the work of the Delta Sigma Pi colony and supports their efforts in seeking to attain chapter status. In our judgment, the energy and enthusiasm they project is a source of inspiration for all our students. We strongly recommend that Delta Sigma Pi recognize their great work and reward them with the chapter status they seek.

October 17, 2008

Letter of Recommendation

This incredible group of students at USF Polytechnic has proven they're ready. They're ready to accept the responsibility of becoming a new chapter of the 101-year-old, tradition-bound business fraternity, DELTA SIGMA PI. They're ready to serve as ambassadors between the university, the fraternity, and the business community. They are ready to establish a new chapter for an imminent, new, larger campus and pass the torch to the next wave of students who will take the chapter to a higher level.

These students who petition you today for chapter status in Delta Sigma Pi have built a culture on this campus. They have incubated for two years, planning, executing and finding innovative ways to fulfill their fraternity obligations of fundraising, service, and professional activities. They also have weathered student apathy and lack of commitment. They have stumbled and had very little guidance early on. But I'm here to boast of their success as a colony and have seen how they grew as leaders and matured as decision makers and developed as communicators. They understand the key to keeping students involved and attracting new students, depends on the fraternity's image. Doing what they say they're going to do. Proof is in the results.

These future business leaders are among the brightest and most enthusiastic students I have been fortunate to work with and come to know quite well. They have achieved their colony goals, developed their management and financial skills, organized and conducted professional events (mock interview workshops with outside businesses like corporate locals, Publix Supermarkets and Outback Steakhouse), community service and fundraising.

They have effectively met the challenge of establishing a colony for Delta Sigma Pi on a branch campus of USF whose main campus has 45,000 undergrads enrolled. With enrollment numbers growing each new semester at Lakeland's USF campus, the chapter will seek to increase its recruitment numbers in advance of the new campus due to be completed in 2010.

It is with pride and pleasure that I recommend the USF Lakeland/Polytechnic colony for installment as a full-fledged chapter of Delta Sigma Pi.

Sincerely,

A handwritten signature in black ink, appearing to read "Carol P. Osborne". The signature is fluid and cursive.

Carol P. Osborne
Business Faculty
Advisor, Delta Sigma Pi colony

Subject: USF Polytechnic Chapter Status

Date: October 20, 2008

Ladies and Gentlemen:

The purpose of this brief note is to request and provide support for the establishment of the USF Polytechnic colony of Delta Sigma Pi as a chapter in Delta Sigma Pi. Since its establishment as a colony in January of 2006, a series of students have worked very diligently in a difficult environment to make happen the activities needed to qualify for full chapter status.

For your information, USF Polytechnic is currently an upper division school only, not admitting freshman, but relying on transfer students. Our student body is not traditional and often has many other commitments so it is difficult to pull together a core of students with the time and energy to do the work that needs to be done to achieve chapter status.

I am sure other colleagues will catalog the many activities our group has managed to do and how they have also involved enough students to get to where they can apply for chapter status. The point I want to reiterate is that they have done this in a very difficult environment and have set up Delta Sigma Pi to be the core student group that prepares students for their future work life by getting them involved in related activities. It is absolutely amazing the progress that they have made, both our original founding colony members, many who are still active in some way and the current group who has moved the group along.

I sincerely appreciate the efforts made by Delta Sigma Pi headquarters and hope you will view our efforts here at USF Polytechnic as deserving of full chapter status.

October 14, 2008

To Whom It May Concern:

I am the Director of Student Affairs and Dean of Students at the University of South Florida Polytechnic where I have been working since June 2006. When I first arrived at USFP, Delta Sigma Pi was the only active student organization on campus. I am happy that our student organizations have grown over the past two years but wanted to share with you my experiences in working with Delta Sigma Pi.

After working in Student Affairs for over 12 years, Delta Sigma Pi is the only student organization that I have worked with that has worked this hard to achieve their ultimate goal of being an initiated chapter. Back in 2006, they struggled a bit with their events and communication. The leadership in the organization, at that time, although dedicated did not necessarily have the organizational skills to make Delta Sigma Pi the success that is has become over the past two years.

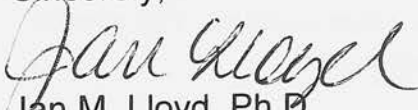

I have watched the organization grow tremendously by recruiting new students and being more assertive in their recruitment efforts. Before, I would contact them about having a table at one of our Student Life events. Now, they contact me and ask me when they can have a table for our events as well as orientation sessions. They have taken the initiative to do fundraisers and have been successful in their hard work. In addition, they have received funding from SGA for their student organization to attend national conferences so they have multiple sources of funds.

One aspect that impresses me the most is the dedication and support of the business faculty for Delta Sigma Pi. Most organizations have a single advisor who may or may not be active in working with that organization. All the business faculty **care** about the success of this organization and are helpful on many levels to support them.

I am so excited that Delta Sigma Pi has finally reached their goal of becoming an initiated chapter and I strongly support this organization. I highly recommend that you move forward in providing this wish for our student organization. They have worked hard and deserve such a wonderful honor.

Should you have any questions, feel free to contact me at jllloyd@poly.usf.edu or 863-667-7049. Thank you.

Sincerely,

Jan M. Lloyd, Ph.D.
Dean of Students

Delta Sigma Pi Board of Directors
330 South Campus Avenue
Oxford, Ohio 45056-0230

Dear Ladies and Gentlemen:

I am writing to encourage you to grant chapter status to the current colony at the Lakeland campus of University of South Florida. I have been involved during the last two semesters with this group and can attest to the spirited and competent leadership of its officers, currently led by President Melissa Cobb, and the enthusiastic participation of its membership. The current total membership is 41 with the required 20 returning members (non-seniors), and I understand that all have paid \$15 in dues.

The professionalism and quality of the programs Delta Sigma Pi has presented recently have been phenomenal and extremely well received. I believe this explains the rise in the membership, as well as its standing in the university community. This colony has definitely “earned its stripes.” Some of the high-profile events Delta Sigma Pi sponsored this year alone include a mock interview event where students were instructed by and then got to practice with experienced interviewers from seven companies including Publix Supermarkets, Outback Steakhouse, and Target, and a resume workshop led by USF Career specialist Mary Mittag and Carol Osborne, Professor of Marketing. The workshop included actual critiquing of members’ resumes. Other events included a “how to climb the career ladder” seminar, a seminar on motivating employees given by me, a program on appropriate business attire, and a three-hour multi-course dinner at which member were taught the intricacies of business and dining etiquette. Members also toured Anheuser-Busch, Bernie Little Distribution. From my perspective, the group is providing opportunities to students, which are not provided by other sources. The events they have chosen to present have been both substantive and enjoyable.

The colony has also distinguished itself with a variety of community service projects including hosting bingo at a nursing home, gathering toys for needy children through Toys for Tots, painting a mural at Lighthouse ministries, a residential center serving the destitute, gathering food during Thanksgiving food drives, and cleaning city parks at Lakes Hollingsworth, Lake Parker and the beach at Ft. DeSoto.

The colony has raised funds in several ways including selling concessions at USF and Tampa Bay Buccaneers football games, selling candles and even selling Avon products.

Members of the colony have participated in conferences in every conference since it attained its colony status: Atlanta Fall 2006, Nashville Spring 2007, Atlanta Fall 2007, and Birmingham Spring 2008. Members attended courses in leadership skills, conflict resolution, management, and organizational skills.

I think it is very telling about the cohesiveness of this group that they often socialize together at events such as restaurant dinners and park picnics. I often see members on campus, wearing their Delta Sigma Pi t-shirts working together and helping each other; it is a very nice sight to see. I can also tell you that the group is most appreciative of the guest speakers who take their time with them, and details taken care of with diligence and forethought.

It is with the utmost confidence that I recommend the USF Lakeland colony to you for chapter status. If I can answer any questions or help in any other way, please do not hesitate to contact me.

Best Regards,

J. LENORA BRESLER

The Board of Directors
Delta Sigma Pi Fraternity
330 South Campus Avenue
Oxford, Ohio 45056

Dear Brothers:

It is my privilege to write this letter in support of the petition of the Lambda Kappa Lambda colony at the Lakeland campus of the University of South Florida. It was over a year ago that I relocated to Florida and was given the opportunity to work with this colony.

During that time, the colony has had personnel changes and multiple challenges. Two things that have never wavered is the strong support from the administration and a strong passion to affiliate with and accomplish the goals of our Fraternity. The school is non-traditional for us in several respects, but they have found innovative ways to leverage technology and flexibility to accomplish their goals. I would like to call attention to three things the colony does extremely well. First, they have a very strong and creative professional program. So much so, other chapters have expressed interest in borrowing ideas. Second, they have established a recurring fundraising opportunity at Raymond James Stadium which provides opportunity limited only by their desires. Again, they have offered local chapters to share in this bounty. Third, the colony has thrived on interaction with the Fraternity which is evidenced by their strong attendance at provincial events.

You can read the petition for yourself to see the many things they have accomplished. They have met the various requirements and have laid foundations to support a successful future. I encourage your positive vote in support of this petition.

With best fraternal regards,

Stephen L. A. Black
District Director
Auburndale, Florida 33823
slab2@aol.com

October 21, 2008

TO THE BOARD OF DIRECTORS OF DELTA SIGMA PI:

I am pleased to recommend the members of Lambda Kappa Lambda Colony at The University of South Florida - Polytechnic in Lakeland, Florida, for installation as a collegiate chapter in The International Fraternity of Delta Sigma Pi. This group of young men and women have met the requirements outlined in our Bylaws to establish a collegiate chapter and they are eager and anxious to become Deltasigs.

While the accomplishments of the Colony are described in detail elsewhere in this petition, I would like to highlight some of the events that have characterized Lambda Kappa Lambda Colony since their inception.

Community and University Service have been a priority for the Colony Members. From cleaning up Lake Hollingsworth to working with children at the First Baptist Home, the members of Lambda Kappa Lambda Colony have continuing worked to contribute to their campus and their community.

The quality and scope of their professional activities have been very impressive. Dress for Success Days, professional tours, and Mock Interview Sessions have been featured events for their campus and students.

University and Fraternity support for the Colony has been exemplary. Faculty Advisor and Deltasig Carol Osborne and District Director Stephen Black have worked closely with the Colony Officers to develop a well managed organization. In fact, Lambda Kappa Lambda Colony has become the leading organization on their campus. Much credit for this accomplishment must go to the Colony Officers and to their Advisor and District Directors.

The Colony has participated in three LEAD schools in Atlanta, Birmingham, and now Tampa. Their involvement in Delta Sigma Pi events has been excellent with 15 Colony Members planning to travel to this weekend's LEAD school.

I am honored to submit this recommendation for Lambda Kappa Lambda Colony.

Fraternally,
C. Dean Ferguson
South Atlantic Regional Vice President

The University of South Florida Polytechnic is the newest of four campuses in the University of South Florida system.

Located in Lakeland, Florida, USF Polytechnic is the state's only polytechnic university and provides upper level undergraduate and graduate students with an extraordinary opportunity to experience applied learning and research in a personalized setting: small class sizes, convenient locations, innovative programs and flexible formats.

USFP serves students from throughout west central Florida. Faculty members hold degrees from a variety of prestigious institutions, and many also have a wealth of professional experience outside of the classroom. Their commitment is to excellent teaching and practical research that will make a difference in the real world.

The polytechnic model emerged as a result of intense community engagement and was formalized in USFP's strategic plan, adopted in 2007. USFP students pursue degrees and certificates in over 20 degree programs and certificate programs and have learned to expect a multi-disciplinary focus, hands-on learning, real-world application, and a supportive campus community.

Since 1988, USFP has occupied a joint-use campus in Lakeland with Polk Community College and is now engaged in the process of building a new campus at the eastern intersection of I-4 and the Polk Parkway, between Lakeland and Auburndale at the heart of Florida's High Tech Corridor.

USFP's current campus is located within 20 minutes of the downtown districts of Lakeland, Winter Haven and Bartow and within an hour of international airports in Tampa and Orlando. Area residents enjoy easy access to metropolitan amenities such as world class entertainment, professional sports (NFL, MLB, NBA and NHL franchises, as well as a host of minor league teams), Big East athletics, varied shopping and dining options, and a superb quality of life. Polk County was recently named an "All-America County," the only county so designated in 2007.

Fast Facts

- 3,448 students (2007-2008)
- 64.6% female
- 26.3% minority
- 61% from Polk County
- Average age: 28
- Average class size: 20
- 64% part-time / 36% full-time

The University of South Florida Polytechnic was established as USF Lakeland in 1988 to serve the citizens of Polk, Highlands, Hardee and eastern Hillsborough counties in a regional setting. It has since evolved to become Florida's only polytechnic university. The University of South Florida is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; telephone 404.679.4500) to award degrees at the baccalaureate, master's, specialist, and doctoral levels, including the Doctor of Medicine.

The institution was initially accredited in 1965 and was last reviewed and reaffirmed in 2005. The institution is scheduled to receive its next reaffirmation of accreditation review in 2015.

1982: The state Legislature authorizes funds to begin planning of the USF Lakeland campus. After finding a high demand for the new educational facility, the presidents of Polk Community College and USF send a letter to Florida's Post-Secondary Education Planning Commission recommending a joint PCC-USF facility in Lakeland.

1986: Rather than hold groundbreaking ceremonies on the actual site, a 130-acre orange grove at the southeast corner of U.S. 98 and Winter Lake Rd., a dinner is held in the Lakeland Center with the theme "PCC/USF: An Idea That Sparks The Imagination." Dirt from the site is brought to the Lakeland Center and piled on a raised platform where a robot digs into the ground and says, "I dig PCC/USF Lakeland."

1988: USF Lakeland begins classes on Jan. 6, providing public higher education through the master's degree level for the first time in Polk County. The first of eight buildings, the Curtis Peterson Academic Center (named in honor of the state senator who was instrumental in obtaining funding) opens on the PCC/USF Lakeland campus.

1989: Nearly 2,000 students attend classes on the PCC/USF Lakeland campus (1,486 PCC students and 487 USF students). With enrollment surpassing expectations there is pressure for a second building.

1991: A second academic building (known as the Learning Center) opens. It features a large joint-use library, learning labs, general classrooms, computer classrooms and faculty offices.

2003: The Florida Legislature approves funding of a third academic building on the PCC/USF Lakeland campus. The effort was spearheaded by State Senator J.D. Alexander.

2004: Ground is broken for the \$32 million Lakeland Technology Building and renovation of the two existing academic buildings.

2007: The Lakeland Technology Building opens for classes. PCC and USF continue to expand the educational opportunities available to the community. USF Lakeland also goes beyond the walls of the primary campus and provides many full degree programs at various off-campus sites.

2008: USF Polytechnic receives its new name and serves over 2,500 students. USFP offers over 20 complete undergraduate and graduate degrees through the divisions of Applied Arts and Sciences, Business, and Education. The campus also supports a variety of individual classes, electives, web-based courses, certificate programs and program partnerships with the main campus in Tampa.

Location:

LAC - Lakeland Academic Center **1000 building** (orange room signs)

LLC - Lakeland Learning Center **2000 building** (green room signs)

LTB - Lakeland Technology Building **1000s** on first floor, **2000s** on second floor

USF Polytechnic is located at the heart of Florida's High Tech Corridor, a region that boasts multiple universities and colleges and thousands of dynamic private sector enterprises.

Approximately 8.5 million people live within a 100-mile radius of the USF Polytechnic campus, and the Tampa-Orlando corridor represents one of the nation's largest and fastest growing mega-regions. The communities of Tampa Bay (to the west) and Orlando and central Florida (to the east) boast extraordinary economic, cultural, recreational, and demographic diversity, contributing to the vibrancy of the USFP community. In recent years, the region has experienced exponential growth, establishing itself as a top contender for business relocation and corporate expansion for companies worldwide.

Photos of Campus

Division of Business

USF Polytechnic's business program offers undergraduate and graduate education that ranks among the state's most affordable, accredited, and comprehensive degrees awarded. In an era where college costs are constantly rising, our low tuition and high quality education provide superior value. Students learn the fundamentals of business, which include principles of finance, management, marketing, and the essential framework of financial accounting and technology. Upon this base of knowledge, students then pursue their academic interests by selecting a specific course of study related to their career goals.

The Business Division offers bachelor's degrees in marketing and general business and a master's in business administration. At USF Polytechnic, our goals include developing students' critical- thinking and decision-making skills. Each business course gives students the tools to develop strategies for organizations by emphasizing best practices, ethics, and a macro-environmental perspective. The faculty includes academically qualified, active researchers in finance, management and marketing along with professionally qualified instructors in accounting and marketing actively engaged with clients. Each faculty member is committed to delivering a quality AACSB International (The Association to Advance Collegiate Schools of Business) education and brings a unique perspective to the classroom to ensure USF Polytechnic students maximize their abilities as they learn the foundation of business.

The faculty lay the foundation of business knowledge and enhance students' comprehension through upper-level courses using applied experience with actual clients, simulations and case studies. The hands-on approach to education offers students a progressive learning environment and prepares them for business careers at a high level. This depth of instruction helps students to develop the professional skills, especially speech and writing abilities, most valued in the business world.

Students deciding to study at USFP will certainly be placed in a unique academic community that will stimulate and sustain the growth of high technology between Tampa and Orlando and occupy an unprecedented niche in Florida's cluster of accredited colleges and universities. A USF Polytechnic business education may be the best investment toward a student's career goals.

General Business Administration, BS

The bachelor of science degree in general business administration is broad and encompasses many aspects of the business world to better prepare graduates for the future. At USF Polytechnic, this degree is designed to provide general knowledge in all business disciplines but allows students to tailor the program to fit their interests and gain more in-depth knowledge by selecting two concentrations. The concentrations available at USF Polytechnic are accounting, finance, management, and marketing.

Students prefer intimate class sizes where they can interact with their professor and classmates while gaining depth from the lecture topic through exchange and discussion. The learning environment throughout the program includes an accent on applied learning where students produce projects akin to real world work experiences. Assignments may include developing business plans for local area business owners, who welcome the USF Polytechnic student's perspective as they grow and manage their companies.

Marketing, BS

Marketing defines the process by which organizations satisfy customers' needs and wants by offering products and services. Marketing serves a key role in all organizations, inspiring the mission, driving the brand, determining which market to compete in, and communicating with the target customer.

At USF Polytechnic, the bachelor of science in marketing focuses on advocacy for consumers, understanding their needs, and developing meaningful relationships with them. Students will pay particular attention to the marketing mix (product, price, place, promotion) and how marketers create value for individuals and organizations. Students will cover topics in marketing ethics throughout their coursework, covering the societal marketing concept and best practices in advertising, pricing, product quality, and more. The program provides students with real world skills that will greatly increase their ability to succeed in our rapidly evolving knowledge-based economy.

Students prefer intimate class sizes where they can interact with their professors and classmates while gaining depth from the lecture topic through exchange and discussion. The learning environment throughout the marketing program includes an accent on applied learning where students produce projects akin to real world work experiences. Among these projects are marketing plans, international marketing plans, ad campaigns, sales proposals, marketing research plans, and promotional plans. Additionally, assignments include business plans for local area business owners, who welcome the USF Polytechnic student's perspective as they grow and manage their companies.

USF's College of Business is accredited by AACSB International - The Association to Advance Collegiate Schools of Business. AACSB International is the premiere accrediting agency for bachelor's, master's, and doctoral degree programs in business administration and accounting, and as such is the most widely recognized and sought-after endorsement of business schools. As of December 2007, AACSB International accredits 554 business and 168 accounting programs worldwide. Less than one-third of U.S. business school programs and only 15 percent of business school programs worldwide meet the rigorous standards for AACSB accreditation

NAME: DR. CHARLES KRONCKE, Ph. D.

BUSINESS DIVISION DEAN FOR USF POLYTECHNIC

EMAIL: CKRONCKE@POLY.USF.EDU

POSITION: VISITING PROFESSOR, FINANCE

Charles O. Kroncke is a visiting professor of finance and the division director for business programs. He has a Ph.D. in business administration from the University of Minnesota, an M.B.A. from the University of Pittsburgh, and a B.S. in economics and business from St. John's University (Minnesota). Dr. Kroncke's academic career includes appointments as business school dean at Auburn University, the University of Texas-Dallas, St. John's University (NY), and the University of Wisconsin-Milwaukee. Prior to these positions, he was professor of finance and associate dean at the University of Wisconsin-Madison.

Charles has extensive board experience in the investment and banking industry, has raised venture capital, provided expert witness testimony, and consults with several universities and corporations. His research interests are in the areas of insurance, finance, real estate, and the economic analysis of public policy issues. He published a textbook on managerial finance and numerous articles in academic and professional journals including the Journal of Risk and Insurance, Risk Management and Insurance Review, the Journal of Financial and Quantitative Analysis, Financial Management, the Journal of Financial Education, and the International Review of Economics Education.

NAME: MRS. CAROL P. OSBORNE, MBA

DSP POSITION: COLONY ADVISOR

EMAIL: [COSBORNE@POLY.USF.EDU](mailto:cosborne@poly.usf.edu)

POSITION: INSTRUCTOR, MARKETING

With 20 years actively working in marketing, branding, advertising, promotions, and marketing research, Carol Osborne has ventured along a classical career path from advertising account service, an MBA, and corporate marketing to consulting and teaching marketing at USF. She compiled 12 successful years at Cox Target Media, six as Vice President of Marketing, a subsidiary of the nation's eighth largest media company, Cox Enterprises, Atlanta.

Her depth of experience includes media advertising, database marketing, affinity programs and cause marketing. Key accomplishments credited throughout her career include work in public relations, media strategy, promotional partnerships and marketing communications. Ms. Osborne has extensive knowledge cultivating image and building consumer awareness among local and national audiences.

Ms. Osborne named a "Woman to Watch" by Advertising Age in 2000, currently consults for a local broadcast affiliate, a national magazine publisher, a media buying firm and a food marketing association. She was named a "favorite professor" in 2004 by 1,200 graduating seniors surveyed at USF Tampa, among four professors in fields outside business.

NAME: DR. RICHARD PLANK, Ph. D.

EMAIL: RPLANK@POLY.USF.EDU

POSITION: ASSOCIATE PROFESSOR, MARKETING

Richard E. Plank, graduated from Governor Livingston Regional High School in 1965 having been born and raised in Mountainside, New Jersey. He spent almost 10 years in medium technology engineered products industrial companies in various positions in buying, selling and marketing, prior to entering a PhD program. He has been teaching full or part time since 1976. He has taught at Rutgers, University of Massachusetts, and Western Michigan University among others. He is married has three children and two grandchildren and races sports cars and plays golf as hobbies.

Lambda Kappa Lambda Colony
University of South Florida Polytechnic

Lambda Kappa Lambda Colony of Delta Sigma Pi was established in the Spring Term of 2006. It started out with a group of students at the guidance of Mrs. Carol P. Osborne as their Faculty Brother. It would take the next year to start spreading the word about Delta Sigma Pi.

During the first year, they were able to establish the Delta Sigma Pi as the first student organization on the University of South Florida Polytechnic campus. That in itself is a huge accomplishment due to the uniqueness of this type of campus that only enrolls juniors and seniors.

In 2007, is where the colony started increasing their recruitment by attending the Universities Orientations, Transfer Days, and Back to School Week Events. These events have shown them that if they can interest a potential member before they even start classes they have a higher turn around rate in members.

They have established recurring professional events that students anticipate each term for Delta Sigma Pi to present and host. Their members have established a close relationship with the University Staff to help out with their events on a moments notice. This opportunity has created relationships with local organizations that will shed future growth and development in the community.

The fundraising program is that they are open to ideas that accommodate all members in one aspect to another. They have created relationships with selling Avon products, Home Interior Products, and working football games in the concession with Levy Restaurants at Raymond James Stadium.

Lambda Kappa Lambda views the opportunities in the future as endless. They utilize conference calls for executive weekly meetings;

establish a discussion board for minutes to be interactive with fellow colony members that miss a meeting for one circumstance or another.

Their colony has dealt with many challenges over the past two years, but is currently experiencing the lost of a fallen colony brother and it is by far the most humbling experience. They are deeply saddened by the lost but feel the magnitude of Delta Sigma Pi and what this fraternity is about.

As you read the following pages and see all that Lambda Kappa Lambda has accomplished, know that this is only the beginning. They know that there are requirements that are set by the fraternity but know that their goal is to set the standard higher and to achieve greater things than they can only imagine.

Delta Sigma Pi

Lambda Kappa Lambda

Community Service Events

In the spring of 2006, the colony painted a tropical themed mural for artist Jeremy Mann. An outline was placed on the wall of the Lighthouse Ministries in Lakeland and the colony filled it in. The Lighthouse Ministries reach out to the less fortunate and needy individuals of the local communities in Polk County.

In the fall of 2006, the colony, participated in a clean up of Fort Desoto. The colony partnered with the University of Florida, Gainesville Chapter we walked down the beach shore picking up trash and debris to help beautify the beach.

On October 5, 2007, the colony, participate in a car show as a community service event. The colony partnered with the junior League of Lakeland. The colony set up a booth and sold raffle tickets to help bring in donations for school supplies for the local school board to give to the poor and less fortunate school children of the county.

For the month of November 2007, the colony, as part of a community service event, had a canned food drive. Canned foods were donated by students of University of South Florida Polytechnic then the food was donated to the poor and less fortunate of the county so that they could enjoy a Thanksgiving dinner.

For the month of December 2007, the colony, participated in the Toys for Tots as part of a community service event. The colony collected toys from students and faculty at University of South Florida Polytechnic and then the toys were donated to the less fortunate children of the county so they could have gifts on Christmas.

On January 26, 2008, the colony, as a community event went to the Oakbridge Nursing home and played bingo with the residents. This was an event to interact and spend time with the elderly of the community.

On January 28, 2008, the colony, as part of a community service event escorted members of the Lakeland Economic Development Council to where the presentation was being held. Many of the people has not been to University of South Florida Polytechnic so they appreciated having Delta Sigma Pi Members giving them directions on where to go and make sure that they made it to the right place.

On February 14, 2008, the colony collected Valentines Day cards from students of the University of South Florida Polytechnic. The cards were given to the Polk County School Board and then were distributed to the elementary school children in the county.

On February 16, 2008, the colony, participated in a clean up of Lake Hollingsworth as a community service event. The colony members picked up the trash around Lake Hollingsworth. To do our part in sustaining the beauty of Lakeland.

On March 15, 2008, the colony, participated in a clean up at Lake Parker. This was a community service event where colony members picked up the trash around the lake to make Lake Parker beautiful. After we picked up trash we ate and played games.

From April 1-22, 2008, the colony, set up box in the Student Government office at University of South Florida Polytechnic to collect items for the Talbot House Ministries of Lakeland Inc. The colony partnered with Suzuki of Lakeland and collected toiletries, food, bedding, and clothing. The items were used to help support the poor and homeless of the community.

To start off your community service events for the new term on September 13, 2008 the colony, participated in a clean-up around the shores of Lake Hollingsworth. The colony members and one guest, a son of a colony member, walked around the lake and picked up all different types of trash.

On October 6, 2008 the University of South Florida Polytechnic held a homecoming celebration for the students and community of the surrounding area. As a community service event four of the colony members helped by giving directions to event participants and by giving out favors to the event participants.

On October 18, 2008 three members of the colony and one guest participated in a walk to fight breast cancer. The event was held in Lakeland, FL around Lake Hollingsworth. We walked for three miles to help with the fight against breast cancer.

Professional Events

The Lambda Kappa Lambda started doing professional events during Fall of 2007. Those events consisted of the following:

September 26, 2007 – Resume Workshop with Carol P. Osborne and Mary Mattag as co-leaders reviewing students resumes. There were 3 members and 7 guests present for the event.

October 10, 2007 – Mock Interview Session, Several different local organizations came out to interview students as if they were to be interviewing a job with that organization. An example of the organizations where: Publix, Winter Haven Hospital, Outback Steakhouse Corporation, and Target. There were 40 members and 10 guests present.

November 27, 2007 – Guest Speaker J. Lenora Bresler with Bresler Training. Mrs. Bresler taught our members leadership tools for their personal and professional growth. There were 10 members and 5 guest present.

Upcoming Fall 2008 Professional Events

October 28, 2008 – Interview Mock Session

November 17, 2008 – Business Etiquette Dinner at Mario's Italian Restaurant

November 18, 2008 – Guest Speaker

December 2, 2008 – Business Tour

January 21, 2008 – Business Etiquette Dinner (Taken place at Red Rose Inn and Suites Dinning Room, Plant City, Florida) This event was open to all students, faculty, and general public. The guest speaker was J. Lenora Bresler, a popular public speaker, professor, and local attorney from Lakeland, Florida. Members and Guests were taught the proper way to dine in a professional environment. There were 12 members and 32 guests present at this event.

March 1, 2008 – Guest Speaker Paige Myers with Premier Design Jewelry. Mrs. Myers shared with our colony the marketing plan for Premier Design Jewelry. She described the career opportunities that are available through her organization. This also started a fundraiser in selling jewelry. There were 16 members and 1 guest in attendance.

April 7, 2008 – Mock Interview Session II, Several different local organizations came out to interview students as if they were to be interviewing a job with that organization. An example of the organizations where: Publix, Winter Haven Hospital, GEICO, City of Lakeland, The Cassidy Organization and Bond Clinic. There were 31 members and 9 guests present.

April 8, 2008 – Guest Speaker Diana Buerger with The Buerger Law Firm in Bartow, Florida. Ms. Buerger shared with our colony the her views on professionalism and leadership. There were 20 members and 4 guest in attendance.

April 14, 2008 – Business Tour at AquaCal located in St. Petersburg, Florida. During the tour, the members learned how heating pumps are manufactured from the raw materials into the final product. There were 4 members present for this tour.

Fundraiser Events

Lambda Kappa Lambda has had several fundraisers on the last two years. The members have done the following:

- Sold Avon
- Sold Home Interior Candles
- Worked Concession Stands at several USF Football Games and Tampa Bay Buccaneers Football Games
- Sold Premier Jewelry
- Fishing Tournament

Upcoming Fundraising Events will consist of more football games, Golf Tournament, and selling Avon.
