THE INTERNATIONAL FRATERNITY OF DELTA SIGMA PI

MEMORANDUM

TO THE HONORABLE BOARD OF THE INTERNATIONAL FRATERNITY OF DELTA SIGMA PI
FROM THE HONORABLE BOARD OF THE INTERNATIONAL FRATERNITY OF DELTA SIGMA PI
SUBJECT: A petition from the campus of Louisiana State University in New Orleans, Louisiana.

A petition of compliance with the high ideals of Delta Sigma Pi, and the spirit of the purpose and requirements of the Fraternity, the membership of the Fraternity, in particular, the approval, shall mean MU CHI SIGMA and this petition the committee.

AT LOUISIANA STATE UNIVERSITY IN NEW ORLEANS

TO THE INTERNATIONAL FRATERNITY OF DELTA SIGMA PI, and to all THE INTERNATIONAL FRATERNITY organization, and to secure faithfully the rules OF regulations set forth by the Fraternity.

Witness our signatures:

TO THE GRAND COUNCIL OF THE INTERNATIONAL
FRATERNITY OF DELTA SIGMA PI:

GENTLEMEN:

We, the undersigned members of Mu Chi Sigma, do hereby petition for a charter to establish a chapter of the International Fraternity of Delta Sigma Pi on the campus of Louisiana State University in New Orleans, Louisiana.

Organized in accordance with the high ideals of Delta Sigma Pi, and fully aware of the purposes, aims, and requirements of the Fraternity, the membership of Mu Chi Sigma Fraternity, in regular meeting assembled, voted unanimously to present this petition for consideration.

In seeking this affiliation, we pledge ourselves to uphold the Constitution and By-Laws of the International Fraternity of Delta Sigma Pi, and to adhere to the traditions of the organization, and to observe faithfully the rules and regulations set forth by the Fraternity.

Witness our signature:

LOUISIANA STATE UNIVERSITY IN NEW ORLEANS

LAKE FRONT

NEW ORLEANS 22, LA.

VICE PRESIDENT IN CHARGE

February 12, 1962

Mr. J. D. Thompson, Executive Director
International Fraternity of Delta Sigma Pi
The Central Office
330 South Campus Avenue
Oxford, Ohio

Dear Mr. Thompson:

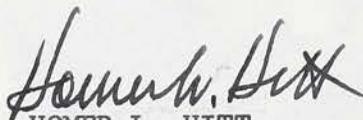

I have recently been informed that Mu Chi Sigma, our campus professional fraternity of Business Administration seniors, has submitted a petition for membership in Delta Sigma Pi. I am aware that the standards of Delta Sigma Pi are high, and that our local group will need high recommendations if its petition is to be favorably considered. In the firm belief that Mu Chi Sigma would be an asset to your international fraternity, and that Delta Sigma Pi would be an asset to LSUNO, I should like to add my personal endorsement to any affirmative appraisals which you might already have received.

LSUNO, while itself a new institution, awarding its first diplomas in June this year, is an integral part of Louisiana State University. It therefore has behind it a century of sound academic tradition, and has enjoyed full accreditation from the date of its opening. Our academic standards have been set by a young, energetic, and progressive faculty, which was attracted by an unusual opportunity for creative enterprise. They are high. They are firmly based upon a belief in excellence. The very fact that a student is a senior here may be taken as good evidence that he has proven himself capable of significant achievement in his chosen field, and that he has mastered a curriculum designed to produce a well-rounded, well-educated citizen.

The members of Mu Chi Sigma, in petitioning for national recognition, are demonstrating the sense of purpose and determination which has characterized this new institution, and which has resulted in its rapid growth and maturity. In less than four years our student body has evolved from a disorganized group of entering freshmen into a community which is conscious of itself and

proud of itself, governed by a Student Government Association, and including more than two dozen officially chartered campus organizations. The arrival of Delta Sigma Pi, I feel, would mark another milestone in the history of the school and in that of our Division of Business Administration. I am more than confident that the material we offer you is worthy of your traditions, and that in your use of it you would certainly make a worthy contribution to ours.

Sincerely,

HOMER L. HITT

Vice President in Charge

HLH:mb

Dr. Homer Hitt, Vice-President in Charge of
Louisiana State University in New Orleans.

J.K. 10/15/50

OFFICE OF THE DIRECTOR

February 14, 1962

Mr. J. D. Thompson, Executive Director
The International Fraternity
of Delta Sigma Pi
Central Office
330 South Campus Avenue
Oxford, Ohio

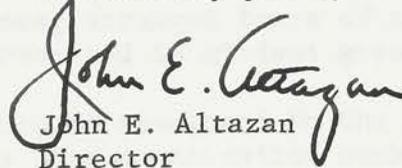

Dear Brother Thompson:

I should like to recommend that Mu Chi Sigma, the professional commerce fraternity at Louisiana State University in New Orleans, be given favorable consideration in its petition to affiliate with the International Fraternity of Delta Sigma Pi. The students who comprise this local group are outstanding young men. They have performed well in their studies and are certain to make significant contributions in the world of business.

I have been privileged to observe this organization from its beginning. Many of the men who started the local in 1959 are still members of the group. Their operation has been characterized by enthusiasm and effective leadership.

I feel certain that this is a group which would be worthy of the name Delta Sigma Pi.

Fraternally yours,

John E. Altazan
Director

JEA:mlr

LOUISIANA STATE UNIVERSITY IN NEW ORLEANS

DEPARTMENT OF ACCOUNTING

February 14, 1962

Mr. J. D. Thompson, Executive Director
International Fraternity of Delta Sigma Pi
The Central Office
330 South Campus Avenue
Oxford, Ohio

Dear Mr. Thompson:

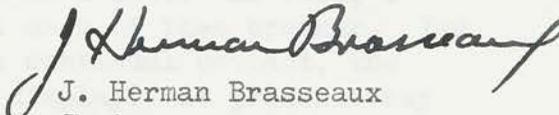

I have been asked to recommend Mu Chi Sigma Fraternity for membership in the International Fraternity of Delta Sigma Pi. I feel that I can do so without reservations because I have worked closely with Mu Chi Sigma since it was formed. Therefore, I am of the opinion that it is a fine organization that functions for the benefit of the University and its members.

I have been a member of Delta Sigma Pi for four years and am aware of its goals and ideals. In this respect I am of the opinion that a great degree of mutual benefit would result from your acceptance of Mu Chi Sigma. Delta Sigma Pi would benefit from having within its framework what I consider an exceptional organization and group of fine young men. Mu Chi Sigma would naturally benefit from its ties with a national organization especially in the areas of central leadership and job placement.

Mu Chi Sigma has been very active since its inception. They have arranged for business men to talk to the students in the Division of Business, arranged tours of many business firms, and been well represented in student government.

It has been a pleasure to recommend Mu Chi Sigma Fraternity for membership in a truly fine organization such as Delta Sigma Pi.

Fraternally yours,

J. Herman Brasseaux
Chairman

DEPARTMENT OF ACCOUNTING

February 10, 1962

Mr. J. D. Thompson, Executive Director
International Fraternity of Delta Sigma Pi
The Central Office
330 South Campus Avenue
Oxford, Ohio

Dear Brother Thompson:

I consider it an extreme pleasure to be given the opportunity to recommend Mu Chi Sigma Fraternity for membership in Delta Sigma Pi Fraternity.

Delta Sigma Pi is not an unknown organization to me since I have been a member for six years. In my own estimation Delta Sig was undoubtedly the finest organization to which I belonged as an undergraduate. I was a member of Delta Eta Chapter at Lamar State College of Technology in Beaumont, Texas. If you will refer to the Chapter Efficiency Ratings you will see that it was and is one of the most active chapters in the whole organization. I am pointing this out simply to show that I would not be interested in recommending or being a part of a poor chapter.

I feel, therefore, that I can say in all honesty and without reservations that Mu Chi Sigma and its members are at present an exceptional organization and would definitely be an asset to Delta Sigma Pi. Mu Chi Sigma is a new organization on a new campus that has already attained the status of a well functioning organization that is contributing to the development of the University, the Division of Business, the business community, and the individual members.

The individual members of Mu Chi Sigma leave nothing to be desired both as students and individuals. The fraternal spirit among them is very obvious upon first contact and is especially noticable in their desire to function as a unit. In fact, I would consider it a privilege to call each of them brother. You cannot possibly grasp, except through continual contact, the fine characteristics these young men display. At present they are being lead by an exceptional slate of officers and I would be surprised if this tradition did not continue.

DEPARTMENT OF ACCOUNTING

February 10, 1962

J. D. Thompson
Executive Director
International Fraternity of
Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio

Dear Brother Thompson:

I feel very fortunate in having been asked to recommend Mu Chi Sigma for installation as a chapter of the International Fraternity of Delta Sigma Pi.

The ideals and goals of Delta Sig are well known to me as I was an undergraduate member of the Delta Eta Chapter at Lamar State College of Technology in Beaumont, Texas, and I am now in the process of becoming a Life Member. Having Mu Chi Sigma as a chapter of Delta Sig, in my opinion, would be an asset to the Fraternity while, at the same time, Delta Sig would give to the men of Mu Chi Sigma the guidance and brotherhood that only a truly international fraternity can give.

Louisiana State University in New Orleans is a relatively new branch of the Louisiana State University system. Because of this, Mu Chi Sigma has been in existence only four years. During this time, however, the organization has shown tremendous development in both membership and activities. The leadership, especially during the present school year, has been exceptional. With many organizations existing in name only, it is gratifying to see such an organization as Mu Chi Sigma.

I take my fraternity ties very strongly and, without exception, it would be my privilege to be able to

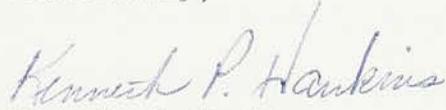

J. D. Thompson

-2-

February 10, 1962

call each member of Mu Chi Sigma "Brother". I hope you will give their petition for membership the utmost consideration.

Fraternally,

Kenneth P. Hankins
Instructor of Accounting

HISTORY OF NEW ORLEANS

New Orleans was founded in 1718... the map of... Orleans... Louisiana Territory... the city of... the chief engineer, Le Blond de la Tour...

HISTORY OF NEW ORLEANS

Spain and France... the Kingdom of England... the United States... the flag of the Government...

After having experienced a winter... the city... the houses... the population... the city...

HISTORY OF NEW ORLEANS

New Orleans was founded in 1718 by Jean Baptiste Lemoyne, Sieur de Bienville, and named for the French regent, the duke of Orleans. Previous attempts had been made to establish a colony in Louisiana Territory, one by Bienville's brother, Pierre Lemoyne d'Iberville, who died of yellow fever before he could put his plan into operation. His brother merely carried out his plans. The original Vieux Carre, or old French City, was laid out by the colony's chief engineer, Le Blond de la Tour, in 60 squares, with streets 50 feet in width. "La Nouvelle Orleans" was made the seat of government for the colony in 1722. Since that time no less than six different flags have flown over New Orleans: the Fleur de Lys of France; the Castles and Lions of Spain; the Tricolor of Napoleon; the Stars and Stripes of the United States; and for a brief period in 1861, the strange new banner of the independent State of Louisiana, with the Fighting Flag of the Confederacy beside it.

After having experienced a rather severe overflowing of the Mississippi Riber in 1719, when the colony was flooded to the depth of several inches, the colonists threw up levees in 1722 as a means of protection. That year, however, a hurricane destroyed 30 of the 100 houses occupied by the 500 inhabitants. The houses were crude affairs, built of split cypress boards and roofed with cypress bark. The hurricane was followed by an outbreak of fever which took a heavy toll of lives, but the survivors rebuilt their homes, and other colonists came in to augment the population. Most of the newcomers were from France, but John Law of the Mississippi Company also sent over

some Germans. However, the number of new colonists was small, and by 1763, when the French turned the colony over to Spain, the population was estimated at less than 4,000.

It soon became evident that one of the real needs of the community was wives to make homes for the settlers, and the French government began sending over what were known as cassette girls -- girls who brought dowries in caskets, or cassettes. About the same time, the Catholic Church sent over teaching and missionary orders, and the cassette girls were placed under the care of the Ursuline nuns whose convent had been established that year - 1727.

By the Treaty of Paris, concluded with Great Britain in 1763, France ceded all of her possessions east of the Mississippi, except the isle of Orleans, to Britain. Later it developed that by the secret treaty of San Ildefonso, executed November 3, 1762, Louis XV had given the Isle of Orleans and all French possessions to his cousin, Charles III of Spain. The French king failed to notify the governor of the colony of its transfer until October, 1764. At that time the governor was directed to surrender it to a Spanish commission when the commission presented itself. This act on the part of their king greatly upset the French colonists. In 1766, Antonio de Ulloa, the first Spanish commissioner or governor, arrived to take possession for the Spanish king. His reception was decidedly cold. Revolt brewed for two years. In 1768 a petition was circulated demanding Ulloa's expulsion, and he was ousted by the Superior Council. In 1769, Count Alexander O'Reilly, lieutenant general of the Spanish armies, arrived with a fleet of 24 ships, anchored off New Orleans, and Spanish rule became an accomplished fact. Spain's possession

was confirmed in the Treaty of Paris in 1783, which granted free and open navigation on the Mississippi to the subjects of Great Britain and the United States.

In 1788, and again in 1794, large sections of the settlement were destroyed by fires, but they were rebuilt, this time with brick, and a far more substantial and more beautiful city emerged from the ruins. During this period, the Spanish governor, Almonaster y Rojas proved himself the greatest benefactor New Orleans had had. With his own funds he leased in perpetuity the squares flanking the Place d'Armes and on them erected a row of brick buildings to be used as shops and stores. He rebuilt the hospital, which had been destroyed by a hurricane, built a chapel for the Ursuline nuns, and also made possible completion of the St. Louis Cathedral in 1794, about as it looks today, except in the details of the towers and belfry. The hall of the Cabildo, or town hall, was presented to the community in 1795, and it was in this structure that the transfer of Louisiana from France to the United States took place. In 1801 Spain had ceded Louisiana back to France, and a demand arose in the United States for possession of the Port of New Orleans. With the purchase of Louisiana in 1803, New Orleans, then a place of 10,000 people, became American. In 1805 it was granted a charter, and that year the residents exercised the rights of suffrage for the first time.

Immediately after the purchase of Louisiana, the business of the port began to increase, and between 1803 and 1810 the population more than doubled. When the War of 1812 began, smugglers were doing a thriving undercover business. Baratavia Bay was a stronghold of the pirate brothers Lafitte. The British were anxious to secure this

important gateway to the rich Mississippi Valley, and sent an army under Major General Sir Edward M. Pakenham to lay siege to the city. It was met and defeated by Americans under General Andrew Jackson just below New Orleans on January 8, 1815.

During the next 40 or 50 years New Orleans experienced a rapid growth in business. The first steamboat had reached the city in 1810, and thereafter commerce on the Mississippi grew apace. However, for half a century the city was the center of adventurers and soldiers of fortune who had designs on the West and on Mexico and other Latin American Countries. In 1830 the second railroad in the United States was opened from New Orleans to Milneburg on Lake Pontchartrain, and between 1850 and 1854 New Orleans gained rail connections to both the East and the West.

An epidemic of yellow fever swept the city in the years 1853-1855, causing great loss of life and a serious falling off in trade. In 1857 business again reached a high peak, only to be followed by a financial panic which caused the ruin of many business houses.

In 1861, Louisiana seceded from the Union, and New Orleans became a center of military and naval operations. However, the mouth of the river was soon blocked by a Union fleet, and in 1862 the city was captured by federal naval and military forces under Admiral David G. Farragut and General Benjamin Butler. New Orleans was under Union control during the remainder of the Civil War. General Butler's rule was highly unpopular, but that of his successor was less objectionable. The city declined in population and wealth for a time after 1862, but a slow recovery followed. It remained the capital of the state until 1852, and was again the capital from 1865 to 1880. From

1867 until 1877, New Orleans was the stronghold of the "radical" or "carpetbag" government of Louisiana, and the old St. Louis Hotel was used as the state house. The corrupt Reconstructionists bankrupted the city and burdened it with debt, under which it struggled for many decades.

With the freeing of the slaves there was no longer adequate labor to work the great cotton and sugar plantations and it was not until World War I that real prosperity began to return to the Crescent City. Disease-resistant sugarcane, imported from Java, built up the state's sugar industry, and oil was discovered in the state; but the thing that actually restored Louisiana to its old position of influence in world affairs was the price of 40 cents a pound to which cotton soared during the first World War.

In 1927, a great spring flood in the Mississippi River threatened New Orleans with disaster, but the city was saved by blasting the levee about 15 miles south of it. To prevent similar trouble in the future, the great Bonnet Carre Spillway 33 miles above the city was constructed to divert flood waters into Lake Pontchartrain in times of future danger. The spillway can be opened when the river rises to a dangerous level, and the diversion of water into Lake Pontchartrain will decrease the river stage at New Orleans by several feet.

The New Orleans of today is the third largest city in area in the United States. It is situated on the east bank of the Mississippi River, approximately 110 miles from its mouth, and on the lowest terrain in Louisiana. Its highest elevation (10 to 15 feet) is just behind the great levees on the river's bank; farther inland many parts of the city are below the mean level of the Gulf of Mexico. The

original town was laid out on a crescentlike curve in the river, hence its nickname of Crescent City.

New Orleans is without a doubt a city old in historic interest and tradition, yet eternally young in spirit, in its love of beauty, color, music, parades, carnivals, and that French "joie de vivre" which all its conflagrations, pestilence, wars, and dark aftermaths of wars have not been able to extinguish. New Orleans truly lives up to its designation as "America's Most Interesting City".

L S U N O

Its History

Louisiana State University in New Orleans was established by Act 60 of the 1956 Legislature, after New Orleans citizens had expressed a desire for a branch of the State University in their city, and after surveys by L S U and by the Louisiana Commission on Higher Education had confirmed a definite need for such an institution. On February 12, 1957, General Troy H. Middleton, President of L S U, instructed a university planning committee to prepare for a general commuters' college of the arts and sciences type, bearing in mind the probability that it soon would grow into a large metropolitan-type university. The committee planned a college which would open with a freshman class only, and which would add higher courses each year until it became a full four-year institution.

In April of 1957, the planning committee submitted a report to President Middleton, which contained the following statement: "The committee feels that if adequate funds are made available by the 1957 Legislature, L S U in New Orleans can be opened in September, 1960." The committee had made a thorough study of the problems involved in establishing this new branch of the University. Its estimate was based upon the best information available. Had hard work and good fortune not quickly outdistanced probability, L S U in New Orleans today would be a college of freshmen and sophomores. Instead, it now has seniors on the campus. This coming June it will award its first diplomas.

L S U N O's enrollment today exceeds 3,100. Its faculty has

grown from 63 to 148 since opening day in September, 1958, and its four academic divisions now offer a total of more than 230 different courses. Degree programs cover 21 major fields. The L S U N O Library boasts more than 100,000 volumes, and two imposing new buildings, recently completed, offer the first concrete evidence of its future beauty.

This rapid development was made possible, of course, by the acquisition of a splendid campus site on the shore of Lake Pontchartrain; a former naval air station, with facilities which could be readily converted into classrooms. It was made possible also by the energy and dedication of a faculty and staff, which found itself faced with a gravely underestimated challenge.

Greater New Orleans, with a population larger than that of the State's next 10 cities combined, was until 1958 the largest metropolitan area in the United States without state-supported higher education. That a need existed was obvious, and early surveys confirmed the fact that many students would attend a New Orleans state-supported college who otherwise wouldn't go to college at all. When L S U N O opened its gates, these surveys were proven correct. Students arrived in twice the numbers expected.

The two new buildings, along with a new central utilities plant, are the initial visible results of the campus master plan, submitted to the Board of Supervisors by the architects in February, 1959. This plan is an overall blueprint, outlining an orderly development of the 178 acre site, and providing for the gradual evolution of the obsolescent air base into one of the most modern, most attractive, most efficient university campuses in the nation.

"A contemporary expression of the Louisiana style of architecture" is the phrase most descriptive of the new facilities. The Liberal Arts Building, constructed at a cost of approximately \$2,000,000, is characterized by expansive overhangs and by broad exterior galleries the full length of its facades. Four-hundred-and-ten feet long by one-hundred-and-twenty feet wide, it houses numerous modern classrooms, language and psychology laboratories, and a special auditorium which will seat 200 students. In addition, it provides office space for 104 faculty members. Like the Science Building, it contains two open courtyards. These not only offer the advantage of more natural light in the classrooms, but they serve as pleasant outdoor lounges for study, rest, and meditation.

The three-million-dollar Science Building is one of the finest facilities in the South. It contains 38 instructional laboratories and 18 classrooms for use in the fields of chemistry, physics, mathematics, biology, engineering, and geology. Designed with a certain amount of flexibility, it will be devoted entirely to physics and chemistry when future science facilities are constructed. Unique in its design are the faculty offices, which are combined with individual research laboratories. These enable the teacher to give instruction to individual students while continuing his own research projects.

All utilities in these buildings; including heating, air conditioning, water, power, and lighting; are controlled pneumatically from a central control tower, where an operator keeps watch by means of closed-circuit TV. This facility, while hardly an expression of traditional Louisiana style, is certainly an example of the most up-to-date architectural trends in mild-climate areas like New Orleans. It is not a

building at all. The motors, pumps, boilers, electrical gear, gas burners, refrigeration machinery, and all accessories are weather-proof, and are placed in a convenient radial pattern around the control tower. Then the plant needs expanding, additional equipment can be installed in its proper place, enlarging the outdoor circle. The central location of this equipment greatly facilitates maintenance.

Phase One of the L S U N O construction program calls for six more new buildings by 1964, in addition to those now in use, plus site development, athletic fields, and parking areas. The estimated cost of this phase is \$22,000,000. Phase Two will add seven additional buildings by 1970, when the enrollment is expected to reach 10,000.

L S U N O's true progress, however, is not measured by the academic standards which it has developed and maintained, and which will determine the quality of its graduates. Established as a modified liberal arts college with a Division of Liberal Arts, a Division of Sciences, and a Division of Business Administration, it was fully accredited from the beginning. It was fully accredited because it was an integral part of L S U, and even though it was the newest campus in the nation it enjoyed the prestige of a century of high academic tradition. L S U N O has lived up to that tradition. While it expects to continue to grow, and to continue to enrich its program, even the holders of its very first diplomas will have every reason to be proud.

The specific yardstick used by Dr. Homer L. Hitt, L S U N O's Vice President in Charge, is that of excellence. "We are well aware," he has said, "of our obligation as a tax-supported institution, to

offer college training to the largest number possible, but our prime concern is the excellence of our product. Should we ever permit quantity to affect adversely our quality, we should be guilty of disservice to New Orleans, to Louisiana, and to our entire society."

The prospect of a new institution in the making and the challenge of a rare opportunity for pursuing personal ideas has proved attractive to scholars from all parts of the country, and L S U N O has collected a very high-caliber faculty. The typical L S U N O faculty member is young and progressive, is engaged in research, and is cognizant of the necessity for new approaches to the constantly changing problems of modern education. He is up-to-date in his knowledge, and he is accustomed to the accelerating pace imposed by new discoveries. Evidence of faculty quality is the fact that the Division of Sciences alone holds research grants totalling more than \$150,000. These grants have come from Federal Government agencies, national scientific institutes, and local and national public health societies.

Students too have been the recipients of grants, principally for work as assistants in faculty research projects. Taught early in their careers to work with the finest research-type equipment, and to develop scholarly attitudes, L S U N O juniors and seniors have been accepted already for admission to medical schools, and some have published papers in national academic journals. Honors sections in various courses have encouraged a high degree of achievement by those who are especially talented or especially well prepared, and they have led to the organization of a special Honors Society. This society has published its own magazine, which is a collection of scholarly

papers written by its members. Its current plans are to publish it each semester and to offer prizes for outstanding articles.

Other publications indicative of growing maturity are "The Driftwood," a weekly campus newspaper, and "The Beachcomber," a campus literary magazine. Other activities reflecting a wide range of cultural interests are a Workshop Theater, a Fine Arts Society, fine arts exhibitions, visiting lecturer programs, and programs by visiting entertainers.

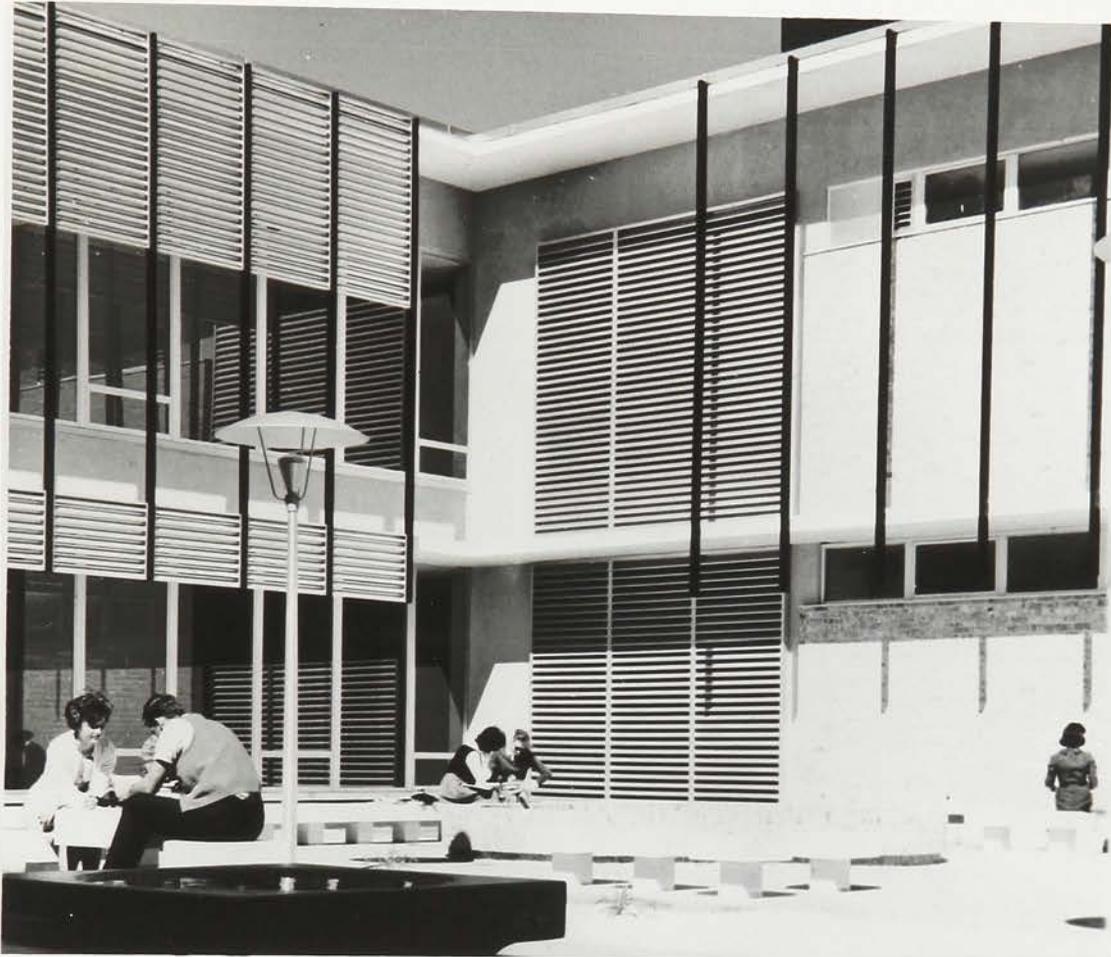

L S U N O has an active Student Government Association, various student service organizations, six social fraternities, and four sororities. The campus was recently the site of two important conventions, that of the Louisiana Council of Teachers of English, and that of the American Studies Association of the Lower Mississippi.

With a new Junior Division, established just this year for the better administration of its growing numbers of freshmen, L S U N O is now looking forward towards future possibilities; such as a Graduate Division, an Evening Division, and a Division of Engineering. From the original concept of a commuters' college, it is increasingly confident that it will evolve into a large and relatively complete metropolitan-type university, bringing all the well-rounded richness of its parent campus to the students of New Orleans. In a recent address to the L S U N O faculty, L S U President-Elect John Hunter stressed the fact that a nation's wealth lies in the potential of its succeeding generations of youth. L S U N O sees its mission in the developing of that potential, by further extending educational opportunity to all.

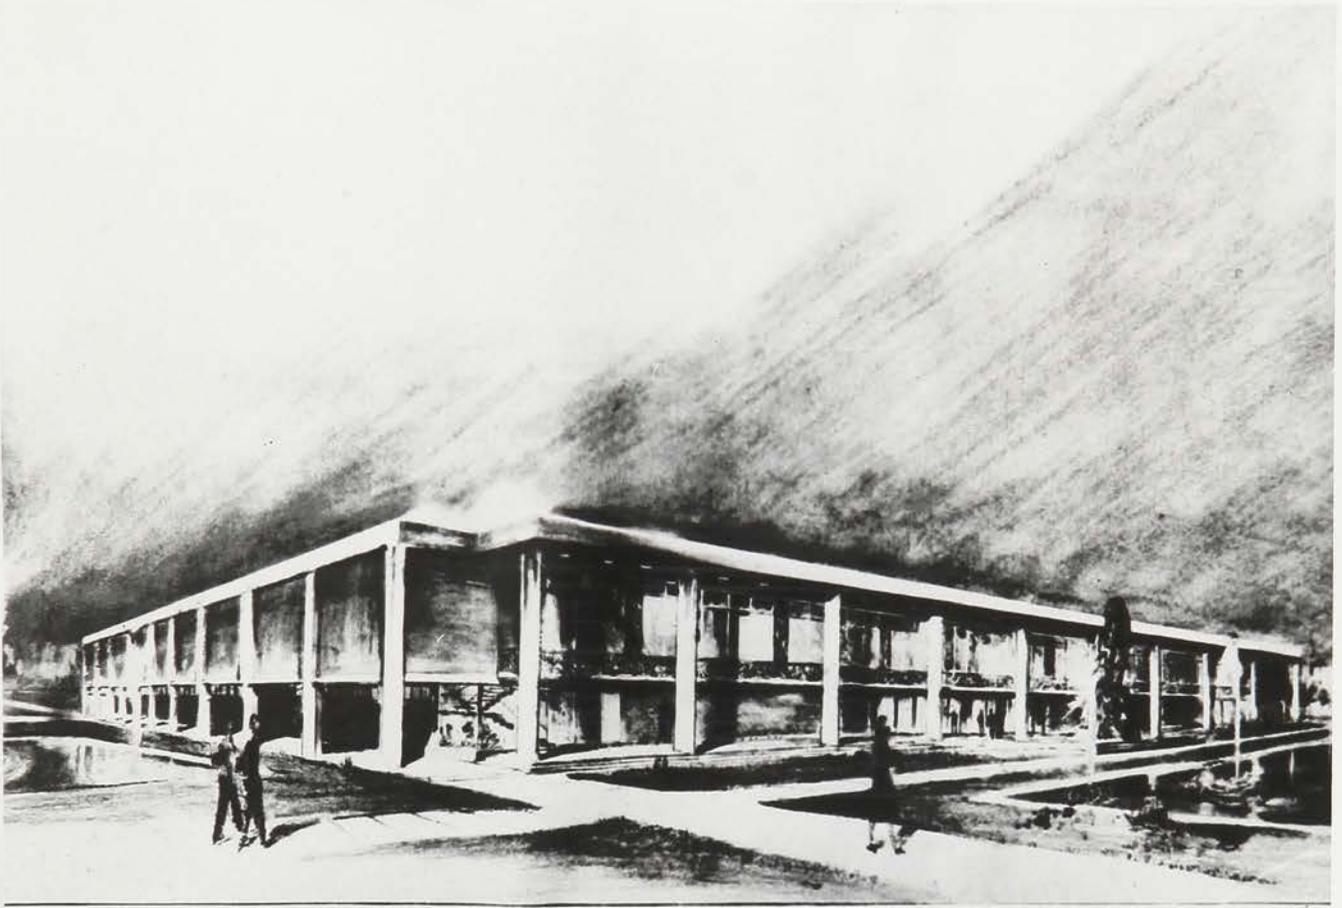

Liberal Arts Building

which houses the Division of Business Administration

Science Building Courtyard

Part of LSUNO's future lies in its new library. Above is an artist's sketch of how the new Library will look when completed.

HISTORY OF THE DIVISION OF BUSINESS ADMINISTRATION

In 1946, the Division of Business Administration was established as a part of the Office of the Director of the National Bureau of Economic Research. It was created by the merger of the Division of Business Administration, the Division of Social Sciences, the Division of Economics, and the Division of Commerce Studies. Its establishment was a result of the reorganization of the National Bureau of Economic Research, which was then part of the Federal Reserve Board.

On July 1, 1959, the Division of Business Administration was combined with the Division of Social Sciences to form the Division of Social and Behavioral Sciences and the name of the Division of Commerce Studies was changed to the Division of Business Administration, with Dr. Alec Kilgus as Director.

The Division of Business Administration has been engaged in a variety of research and study programs.

HISTORY OF THE

DIVISION OF BUSINESS ADMINISTRATION

- (1) General Business Administration
- (2) Accounting
- (3) Business Administration - Law
- (4) Economics
- (5) Finance
- (6) Management
- (7) Marketing
- (8) Statistical Methods

The Division of Business Administration has been engaged in a variety of research and study programs. It has been particularly active in the study of the history of business administration, and has published a number of articles and books on this subject. The Division has also been engaged in a variety of other research and study programs, including the study of the history of business administration, the study of the history of business administration, and the study of the history of business administration.

HISTORY OF THE DIVISION OF BUSINESS ADMINISTRATION

In its original conception, L S U N O was designed to be a college of the arts and sciences type. In line with this, there were to be four senior Academic divisions: A Division of Humanities, a Division of Social Sciences, a Division of Sciences, and a Division of Commerce studies. By establishing these academic divisions, the planners of L S U N O thought they would best accomplish their aims.

On July 1, 1959, the Division of Humanities was combined with the Division of Social Sciences to form the Division of Liberal Arts and the name of the Division of Commerce Studies was changed to the Division of Business Administration with Dr. John Altazan as Director.

The Division of Business Administration now offers eight programs of study. These eight programs are:

- (1) General Business Administration
- (2) Accounting
- (3) Business Administration - Law
- (4) Economics
- (5) Finance
- (6) Management
- (7) Marketing
- (8) Secretarial Science

Students who complete one of the programs enumerated above, receive a Bachelor of Science degree in the program which they chose.

All programs are designed so as to give the students a good background in courses in their particular program of study as well as courses in other programs.

FACULTY MEMBERS

Economics Professors

Seated: Dr. John Altazan, Director of the Division of Business Administration. Standing, left to right: Dr. William Blachman, Dr. James R. Bobo, and Dr. Jerry P. Simpson.

Accounting Professors

Left to Right: Seated - Dr. Frank Ross, Dr. J. Herman Brasseaux,
Director of the Department of Accounting, Mr. Kenneth Hankins.

Standing: Mr. F. J. Valiente, Mr. Louis E. Mullen, and Mr. Eugene Nini

Mr. Albert S. Perry, Instructor in Business Law,
Income Tax Accounting and Insurance

Left to Right: Mr. David Whitney and Dr. John Reinecke,
Professors of Management and Marketing.

Left to Right: Miss Martha Willms, Instructor in Secretarial Science; Dr. Herbert Madrus, Assistant Professor of Secretarial Science.

HISTORY OF MU CHI SIGMA

In the first semester of the fall term of 1950, a group of interested business administration students under the leadership of Dr. Wm. Adams organized a professional business society. The organization for the organization was the Men's Professional Commerce Society. This society's primary function, as defined by the founders, was to promote a closer affiliation between the students in the college of business and the outside business world.

In the fall of 1950, Mr. Charles Furrer, Executive Secretary of Delta Sigma Pi, visited with members of the Men's Professional Commerce Society. Mr. Furrer outlined the many advantages of affiliating with Delta Sigma Pi.

HISTORY OF MU CHI SIGMA

During the fall semester of 1951, Mr. Charles Furrer, Executive Secretary of Delta Sigma Pi, visited with members of the Men's Professional Commerce Society. Mr. Furrer outlined the many advantages of affiliating with Delta Sigma Pi. Mr. Furrer explained the advantages of Delta Sigma Pi and then answered all questions posed by the members.

On December 11, 1951, the members voted to petition Delta Sigma Pi for affiliation.

On December 11, 1951, the members learned that the Administration of I. S. U. S. C. requires that all formal organizations who seek affiliation with national organizations had to comply with certain requirements.

On this same day, December 11, 1951, the members of the Men's Professional Commerce Society voted to change the name of the organization

HISTORY OF MU CHI SIGMA

In the first semester of the existence of L S U N O, a group of interested business administration students under the leadership of Dr. John Altazan organized a professional business society. The name chosen for the organization was the Men's Professional Commerce Society. This society's primary function, as outlined by the founders, was to promote a closer affiliation between the students in the college of business and the outside business world.

In the Fall of 1959, Mr. Charles Farrar, Executive Secretary of Delta Sigma Pi, visited with members of the Men's Professional Commerce Society. Mr. Farrar outlined to these members the advantages of belonging to Delta Sigma Pi.

During the next two years, the possibility of affiliating with Delta Sigma Pi was discussed many times. Finally, in October of 1961, Mr. Connie Mack McCoy, Field Secretary of Delta Sigma Pi, along with Mr. Max Barnett, District Director of Delta Sigma Pi, visited the L S U N O campus and talked with the members of the Men's Professional Commerce Society. Mr. McCoy and Mr. Barnett explained the advantages of Delta Sigma Pi and then answered all questions posed by the members.

On December 11, 1961 the members voted to petition Delta Sigma Pi for affiliation.

On December 18, 1961, the members learned that the Administration of L S U N O required that all local organizations who sought affiliation with national organizations had to complete certain requirements.

On this same day, December 18, 1961, the members of the Men's Professional Commerce Society voted to change the name of the organiza-

tion to Mu Chi Sigma in order to fill one of the requirements necessary for affiliation with Delta Sigma Pi.

On January 15, 1962, Mu Chi Sigma adopted a constitution and a set of by-laws that were the same as those of Delta Sigma Pi. In accordance with their new constitution the members of Mu Chi Sigma elected Mike Rouchon as President, Andrew Flores as Senior Vice-President, Frank W. Wright as Junior Vice-President, Mike Wilson as Treasurer, Robert Cricchio as Secretary, Peter Pericone as Historian, and Mylis Vidrine as Publicity Manager. Dr. John Altazan was unanimously designated as Faculty Advisor.

On January 30, 1962, Mr. Edgar E. Burks, the Director of Student Services, notified Mu Chi Sigma that its request for permission to petition Delta Sigma Pi had been approved by the Administration and Mu Chi Sigma had its complete approval to proceed with its petition for affiliation with Delta Sigma Pi.

Commerce Club Considers Tie With Business Fraternity

The members of the Commerce Club are considering a petition to Delta Sigma Pi, a business fraternity, for affiliation with the club. The club has been active in sponsoring the club and has been successful in its efforts. A petition for affiliation has been prepared and will be presented to the faculty advisor, Dr. John Altazan, for his approval. The club has been successful in its efforts to secure the necessary funds for the petition. The club has been successful in its efforts to secure the necessary funds for the petition. The club has been successful in its efforts to secure the necessary funds for the petition.

THE MEMBERS OF THE LSUNO Commerce Club pictured at a recent meeting.

Commerce Club Considers Tie With Business Fraternity

The members of LSUNO's Commerce Club are considering an affiliation with the national Delta Sigma Pi Business Fraternity. This will mean more recognition for the club and more business advantages for its members.

A re-organization program is also underway. A series of programs has been planned to acquaint the members with business and civic responsibilities. Mr. Thomas Early, Jr. will be the first

guest speaker. His topic will be concerned with the local political scene. There will be other guest speakers engaged periodically to speak about matters pertinent to the club.

All interested commerce students are invited to join the Commerce Club. For further information about membership or coming events see Michael Rouchon, Andrew Flores, Robert Cricchi or Mike Wilson.

REFINERY PLAYS HOST FOR COMMERCE CLUB

The LSUNO Commerce Club toured the Esso refinery in Baton Rouge last week. It was one of the first such tours planned by the organization.

The club left the campus at 9:00 a.m. Thursday and returned at 6:00 p.m.

Upon their arrival at the refinery, they were given a brief orientation by Mr. Leonard Watt, and immediately afterward, saw a short documentary film entitled "The Unseen Dividend".

The Commerce students viewed a large portion of the refinery during their visit. After the film, they inspected the IBM data processing equipment used by the company in their accounting procedures. Then everyone visited the company cafeteria for lunch.

Following the meal, Mr. Watt conducted a tour of the plant. All were informed as to how finished products are refined from crude oil. The speed and efficiency with which motor oil was refined presented a good example of modern automation. Cans of oil were filled, sealed, and packed in exceptional quantities by a relatively small number of men.

The plant itself was very modern and surprisingly clean. Up-to-date equipment and a closed television circuit seemed to account for the smoothness of operations. The attitudes and politeness of the employees were also high.

The tour was well organized and enjoyed. Dr. Altazan and Mr. Reinecke of the Commerce Division were in charge of the 35 individuals who went.

Traffic Court Commerce Talk Subject

The Commerce Club sponsored a program on traffic tickets, Tuesday, Nov. 20, at 12:00 in the Liberal Arts Building.

Dr. John Altazan, chairman of the Commerce Division, introduced the following guest speakers to those present:

Judge David Mac Hauer — judge of Traffic Court, Division B, in New Orleans.

Mr. I. Bernard Salomon — prosecuting attorney of the New Orleans Traffic Court, Division B.

Captain Gowan Duffy — in charge of the traffic division of the New Orleans Police Department.

Each gentleman made a presentation for ten or fifteen minutes on the general problems of traffic and the enforcement of traffic laws in the city of New Orleans.

Melville Wolfson, who served as program chairman, held a question and answer session after the speeches.
