Introduction:

Patrick Harrington, President of the
Business Club of Florida Atlantic
University

Welcome to Guests:

Dr. Gordon E. Bell, Assistant Dean
College of Business and Public
Administration

Guest Speaker:

Mr. Charles L. Farrar, Executive
Director of Delta Sigma Pi.

Closing Remarks:

Dr. James B. Montgomery and
Mr. Michael Pantya, Advisors

To the Grand Council of the International
Fraternity of Delta Sigma Pi

Gentlemen:

We, the undersigned members of the Business Club, hereby earnestly petition for a charter to establish a chapter of the International Fraternity of Delta Sigma Pi on the campus of Florida Atlantic University, Boca Raton, Florida.

The Business Club was formed for the purpose of affiliation with Delta Sigma Pi Professional Fraternity. The present aims, purposes, and requirements reflected in our Constitution and By-Laws were patterned after and are commensurate with the same high ideals of Delta Sigma Pi.

In pursuit of this affiliation, the members of the Business Club pledge to uphold the rules and regulations as set forth in the Constitution and By-Laws of the International Fraternity of Delta Sigma Pi and further to carry out its traditions and programs.

Witness our signatures:

Patrick M. Harrington
President

George Stephen Foster
Senior Vice President

Richard Herrens
Vice President

Fred B. Sheema
Secretary

Paul A. Bellant
Treasurer

David J. Bailey
Historian

HISTORY OF THE BUSINESS CLUB
OF FLORIDA ATLANTIC UNIVERSITY

Early in March of 1966, the Business Club of Florida Atlantic University was organized with the ultimate goal of affiliating with the International Fraternity of Delta Sigma Pi. The first meeting took place on March 2, with a turnout of fourteen men. At this initial meeting all of the students present expressed a desire to become affiliated with Delta Sigma Pi. The temporary officers elected at this meeting were as follows:

| | |
|----------------|---|
| President | Patrick Harrington |
| Vice President | John Holmes |
| Secretary | Paul Atkinson |
| Advisors | Dr. Robert Montgomery Mr. Michael Pantya |

After the original meeting, three more were held, during which time the Business Club drew up a constitution and became an officially recognized club of Florida Atlantic University. Official approval was then extended by all administration personnel and the Student Government Association. This was the only time a club had so swiftly received approval from all interests concerned. We were also the first officially recognized club on campus under the rules revision as approved by Student Government and University Administration as of May, 1966. On April 11, the last meeting of the Winter Term was held. At this meeting it was decided that the club would be active over the summer

term, and the following officers were elected:

| | |
|-----------------------|--------------------|
| President | Patrick Harrington |
| Senior Vice President | Paul Atkinson |
| Vice President | Stephen Foster |
| Secretary | Phillip Jones |
| Treasurer | Terry LaPlant |

It was less than a week after this meeting that the Business Club and the school suffered the loss of one of its most active workers with the death of Peter Schaffer. The Business Club owes a great deal to Pete for his work in its early organization.

All through the Summer Term, the Business Club kept on growing both in size and importance on campus. During the Summer Term, the Business Club took on the responsibility of maintaining the Accounting Records for the student newspaper, THE ATLANTIC SUN, and the Activities Calendar for the school. Also, the Business Club was responsible for the planning and staging of the highly successful weekly Student Dances. This was also a time for members of the Business Club to demonstrate the leadership qualities expected of future businessmen. Business Club members held posts as the Treasurer, three as Senators and many as committee members of the Student Government Association. The President of the Inter-Club Council, the President of the Flying Club, and the President of the Christian Science Religious Organization are also members. By the end of the Summer Term, the Business Club had become the most active organization of the

thirty-four clubs on campus.

The Business Club captured the attention of the student body at the start of the Fall Term. An Orientation Coffee was held at which approximately seven hundred students met the members of the various clubs on campus, heard the student leaders welcome them, and danced to a nationally known popular music group. The Business Club display received more applicants than any of the other tables. This was the most successful event ever held for the students on the Florida Atlantic University campus. For this we received the acclaim of the University Administration as evidenced by our becoming the first club to have a private office on campus.

On September 21, election of officers for the Fall Term was held. Elected to guide the Business Club in its future endeavors were:

| | |
|-----------------------|----------------------|
| President | Patrick Harrington |
| Senior Vice President | Stephen Foster |
| Vice President | Dick Herring |
| Secretary | Fred Sheeman |
| Treasurer | Terry LaPlant |
| Chancellor | Wayne Pulsipher |
| Sgt at Arms | John Gordon Thompson |
| Historian | David Bailey |

With the Fall Term under way, the Business Club is presently working on its fall projects. A Rush-Smoker was held and prospective members were interviewed and acquainted with the club's purposes and goals. These prospective members were put before the club and those receiving

unanimous approval by the members were accepted on September 28. At this meeting the club was given the total responsibility for the sale of tickets to the Florida Atlantic University Scholarship Benefit. This will be an American Football League game between the Miami Dolphins and the Boston Patriots to be held November 27. The pledge project will be a self-perpetuating survey and computer analysis to be taken of all registering students in each school term. The names of the students interested in a particular organization are turned over to the respective clubs on campus. We accept this role as being a major benefit to the school. A tour of the Radio Corporation of America plant in West Palm Beach, Florida was selected as our October field trip. Several distinguished speakers were announced for the month of October. They include Dr. John W. Sullivan, Dean of the College of Business and Public Administration at Florida Atlantic University, and Mr. Ernest White, past President of the Beta Etti Chapter of Delta Sigma Pi, University of Florida.

For the past six months we have been corresponding with Delta Sigma Pi with the goal of establishing a chapter on this campus. We are anxiously awaiting the October 11 visit of Mr. Charles Farrar. We hope to show him why we feel qualified to represent Delta Sigma Pi on the Florida Atlantic University campus.

This is the story of the Business Club to the present time. It shows that with leadership and hard work, a group of college students organized with the goal of becoming a chapter of Delta Sigma Pi.

THE HISTORY OF BOCA RATON

Congressman Boca Raton was founded as a settlement about 1763, 725 years ago. The Spaniards and pirates of the 16th and 17th centuries chose it as a base from which to attack sailors and pirates the Spanish main.

From the time of the brave and incredibly brave Spanish conquistadores who, with sword and pike, hacked and jabbed both jungle and human enemies into submission, history has pursued this a succession over the years. It is probable that at no other time in history has such a relatively small area of land, in such relatively short periods such such strife. In all, eight different flags have flown over the area.

BOCA RATON

On various Florida maps, the name Boca de Ratones appears, which means "entrance of the reef of sharp pointed rocks."

G. M. Richards, the first white settler of Boca Raton, was a rival opponent of the Henry M. Flagler interests, and first saw the location in 1896. His home was on the east side of what is now the Florida Inland Waterway. In 1897 Mr. Richards laid out the first plot of Boca Raton, comprising of 1,000 acres. In the years that followed Boca Raton became a busy pineapple center, and at one time shipped approximately 10,000 crates of this delicious fruit annually to western cities. Sherry competition was felt from the Cubans, and eventually turned to truck farming which became the chief occupation of the few settlers from 1905 to 1910.

THE HISTORY OF BOCA RATON

Progressive Boca Raton was favored as a dwelling place more than 725 years ago. The buccaneers and pirates of the 16th and 17th centuries chose it as a lair from which to attack galleons that plied the Spanish main.

From the time of the brash, hardy and incredibly brave Spanish Conquistadores who, with sword and pike, hacked and jabbed both jungle and human enemies into submission, history has swirled like a maelstrom over the state. It is probable that at no other time in history has such a relatively small area of land, in such relatively short period seen such strife. In all, eight different flags have flown over the area.

On ancient Florida maps, the name Boca de Ratones appears, which means "entrance of the reef of sharp pointed rocks."

T. M. Richards, the first white settler of Boca Raton, was civil engineer of the Henry M. Flagler interests, and first saw the town-site in 1896. His home was on the east side of what is now the Florida Inland Waterway. In 1897 Mr. Richards laid out the first plat of Boca Raton, consisting of 1,000 acres. In the years that followed Boca Raton became a busy pineapple center, and at one time shipped approximately 10,000 crates of this delicious fruit annually to northern cities. Sharp competition was felt from the Cubans, and settlers turned to truck farming which became the chief occupation of the few settlers from 1905 to 1920.

Lafayette Cook, father-in-law of Boca Raton's early settler, J. C. Mitchell, is credited with starting the town.

To a small town on this coast, in the first years of the twentieth century, came one of the strangest and most gifted geniuses ever to appear on the American scene. His name was Addison Mizner. His corporation bought Cook's holdings, adding several thousand more acres. Mizner then undertook construction of a city that would be "the most beautiful city in the world," Mizner was a genius and his travels took him to most sections of the United States and civilized areas of the world. Without formal training in architecture, he created beautiful American architecture by blending the best features of the Moorish and Spanish buildings he had seen. Placed in the Florida setting of sea, palms, and sun, his structures received world-wide acclaim. Soon Boca Raton became a boom city. More than \$30,000,000 worth of lots were sold nationwide and the Cloister Inn, a 100-room hotel, was opened. Collapse of the Florida land boom ended Mizner's plans. In 1928 Clarence H. Geist of Philadelphia, purchased the Mizner assets and spent more than \$8,000,000 in adding rooms and other improvements to Cloister Inn, making it one of America's most magnificent resorts, the Boca Raton Hotel and Club.

Boca Raton became a city in 1925, and the first mayor was J.G. Brown. With advent of World War II, the hotel and 5,000 acres of Boca Raton property was taken over to be used by the United States Army Air Force

Radar School.

Mizner's dreams for Boca Raton are coming true, and as one wanders the curving, tree covered roads, gazes in awe at the Boca Raton Hotel & Club with its turreted spires, visits both the pretentious and modest homes in the town, one cannot but give thanks to the visions of the great men of Boca's past.

FLORIDA ATLANTIC UNIVERSITY

Florida Atlantic University was established in 1961 by an act of the State Legislature. The institution is a public university and is one of the state institutions of higher learning in the popularly known state system of Florida. Florida Atlantic University is one of seven state universities to be established in Florida, but it is the first in the nation to combine both freshman and sophomore classes. As an upper division university it offers studies at the junior and senior years of the undergraduate program and graduate studies in selected areas.

The mission given to the faculty of Florida Atlantic University calls for dedication to the **FLORIDA ATLANTIC UNIVERSITY** philosophy of educating great numbers of students, to the task of developing the potential in the teaching-learning relationship, and to the responsibility of preparing students to live meaningful lives in an era when the only certainty is the certainty of change.

The Charter class of students was admitted in September 1964, and enrollment has been increasing steadily each semester. The student body now numbers over 1,300. Over 380 students have been awarded the degree of bachelor of arts, 100 degrees of science, and about 200 have earned the master of education degree. The 1970 enrollment projection is for 17,000 students.

The university is organized into five colleges. They are the College

HISTORY OF
FLORIDA ATLANTIC UNIVERSITY

Florida Atlantic University was established in 1961 by an act of the State Legislature, the culmination of years of dedicated effort on the part of civic leaders, government officials and educators to bring a state institution of higher learning to the populous lower east coast of Florida. Florida Atlantic University is one of seven state universities to be established in Florida, but it is the first in the nation to forego freshman and sophomore classes. As an upper division university it offers studies at the junior and senior years of the undergraduate program and graduate studies in selected areas.

The mission given to the faculty of Florida Atlantic University calls for dedication to the ideal of superiority, to the challenge of educating great numbers of students, to the task of developing new patterns in the teaching-learning relationship, and to the responsibility of preparing students to live meaningful lives in an era when the only certainty is the certainty of change.

The Charter Class of students was admitted in September 1964, and enrollment has been increasing steadily each trimester. The student body now numbers over 3,500. Over 384 students have been awarded the degrees of bachelor of arts, 276 bachelor of science, and over 343 have received the master of education degree. The 1970 enrollment projection is for 10,000 students.

The university is organized into five Colleges. They are the College

of Business and Public Administration, the College of Education, the College of Humanities, the College of Science and the College of Social Science. Each College is headed by a Dean and comprises several departments. The Department of Ocean Engineering admitted its first class in 1965, thus inaugurating the first undergraduate program of its kind in the free world.

In all instances, the organizational structure is designed to make it possible for a student to cross departmental and Colleges lines in planning a program to serve his special talents and interests. The Dean of Academic Affairs, serving directly under the President, is responsible for the development of the entire instructional program. Together with the Deans of the Colleges, he guides the educational development of the students.

Each College operates under University-wide policies. However, a distinctive feature of Florida Atlantic University is that within this general framework, each College is granted the widest latitude and encouraged to develop unique programs designed to best serve the student in the disciplines within its jurisdiction.

Florida Atlantic University is located on a 1200 acre site in Boca Raton just a few miles west of the Atlantic Ocean. The campus is midway between Palm Beach on the North and Fort Lauderdale and Miami to the south and is easily accessible from major north-south highways.

The buildings now in use and nearing completion are valued at \$15,000,000. They include a five-story Library, the TV-radio production building, two science laboratory buildings, the humanities building in-

cluding a magnificently-equipped theatre, the student cafeteria-lounge, the physical education and recreation complex, and residence halls for men and women.

Landscaping is gradually enhancing the campus, restoring the natural beauty of the South Florida area.

Although less than five years have passed since Florida Atlantic University came into being, several colorful and historic events have taken place which mark significant points in the growth of the University.

When Dr. Kenneth R. Williams, president, assumed his new role, his office was in a temporary wooden building left over from World War II when the campus site was an air base. In December, 1962, Groundbreaking Ceremonies were held at which time then-Governor Farris Bryant called the event "...a moment of high drama."

Construction continued on the first five of the University buildings while the increasing staff and faculty established offices in Boca Raton. The move to the campus was made in July 1964, and the first students were admitted in September of that year.

On October 25, 1964, President Lyndon B. Johnson paid a visit to the campus and delivered the principal address at Dedication Ceremonies. The honorary degree of Doctor of Humane Letters was conferred upon him in this first full academic convocation for the University. A crowd of 15,000 was in attendance for the ceremonies held out of doors on the east side of the Library.

November 12, 1964 marked the formal inauguration of Dr. Williams as first president. Hundreds of delegates from colleges and universities throughout the nation came to the campus to mark the occasion. Governor Bryant, under whose administration higher education in Florida had made

rapid progress, was awarded the honorary degree of Doctor of Laws.

In April of 1965, Florida Atlantic University held its first commencement exercises in honor of its Charter Graduating Class. The number has increased steadily since then. Bachelor of Arts and Bachelor of Science degrees are awarded in each of the Colleges and the Master of Education degree was conferred for the first time in April, 1966.

The first building on the campus to be officially named is the Stanton D. Sanson Science Building. The ceremony was held on December 18, 1965. Mr. Sanson, a resident of Miami, Florida gave distinguished service to the cause of education in Florida.

ACCREDITATION

Florida Atlantic University is a full member of the State University system and is fully accredited by the State Board of Education. Florida Atlantic University is a member of the National Commission on Accrediting and has applied for membership in the Council of Graduate Schools.

Furthermore, the Florida State Board of Accounting has ruled that our graduates, majoring in Accountancy, are qualified and eligible to take the Certified Public Accountant Examination, hitherto a privilege that has been only extended to universities with full accreditation.

On December 1, 1965 the southern Association's Commission on Colleges recommended, and the 416 member College Delegate Assembly unanimously approved, a resolution that Florida Atlantic University be officially designated as a "candidate for membership". The designation "candidate for membership" is interpreted to mean that major qualifying standards have been met. As a result of our candidateship, our graduating seniors are considered for graduate admission to Universities outside of the State of Florida on the basis of academic qualification alone.

The future of Florida Atlantic University is indeed bright and with strong leadership from school organizations, such as the Business Club and other organizations, our university will become an institution of distinction.

Dr. Kenneth R. Williams

President of FLORIDA ATLANTIC UNIVERSITY

Dr. Kenneth R. Williams

Dr. Williams received his B.A. and M.A. at the University of Florida, and his Ph.D. at the University of Chicago. President Williams has served in many educational positions, among them; Dean of Students, and later Dean of College of Education at the University of Georgia, Director of War Training (AAF and ASTP), University of Florida, Director of Instruction Air University, United States Air Force. He has also been President of Central Florida Junior College and Miami Dade Junior College and has served as a consultant on higher education to India and Indonesia.

While serving in the field of Education, Dr. Williams has continuously contributed to the betterment of his community. He is a member of the Executive Council, Florida Committee on Rehabilitation Through Education and Hospitalization of Returning Servicemen and Women, and past president of the Gainesville Junior Chamber of Commerce and Ocala Rotary Club. For his civic service, he received the Distinguished Service Award from Florida Junior Chamber of Commerce. In 1951, he received Official Commendation for a Meritorious Civilian Service from the Department of the Air Force. Dr. Williams has been listed in Who's Who in America, Leaders in American Education, and Who's Who in American Education.

Honor Fraternity Memberships include Phi Kappa Phi, Phi Delta Kappa, Kappa Delta Pi, Alpha Phi Epsilon and Scabbard and Blade. Currently, Dr. Williams is Chairman of E. T. V., Task Force of the Florida Educational Television Commission, President of Florida Association of Public Junior Colleges. Member Florida Council of 100, and Director of the First Bank and Trust Company of Boca Raton.

OFFICE OF THE PRESIDENT

October 7, 1966

Grand Council
Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio

Gentlemen:

It is a distinct pleasure for the administration of Florida Atlantic University to write in support of the affiliation petition of the Business Club.

Our University has offered a program in business administration since our opening in 1964. The College of Business and Public Administration is our second largest college with a present enrollment of 600 students. The students may choose a major in a number of areas within the College, such as, accounting, finance, management, marketing, administrative science, and general administration.

Our institution is unique in that we are the only Senior Division University in the country. Our students come to us from numerous lower division educational institutions. We graduate our students with a Bachelor's degree while offering them a continuation of their studies on the graduate level leading toward a Master's degree.

The Business Club has attracted a high level of students interested in associating themselves with an organization dedicated to fostering the highest ideals in the field of business and commerce between students and the business community.

It would be fitting and proper for this organization to be affiliated with a nationally prominent organization such as Delta Sigma Pi.

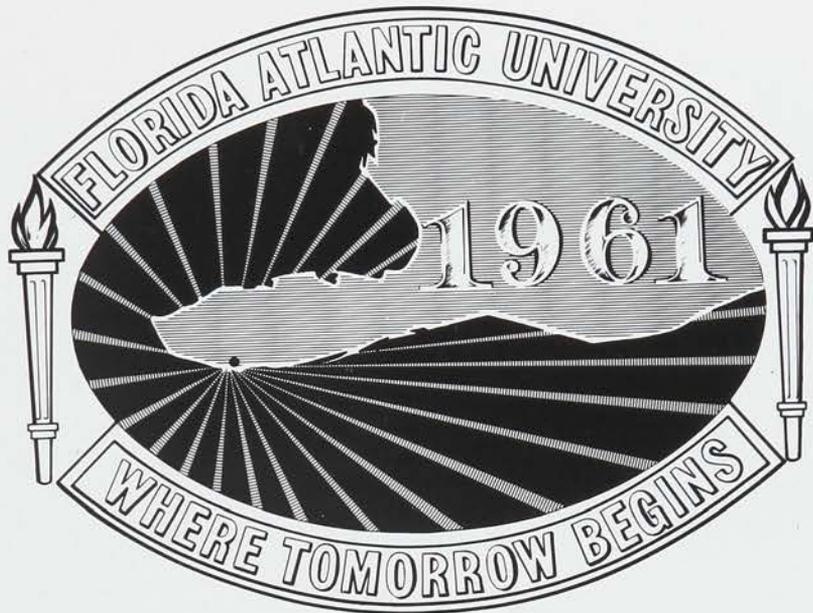

The administration of Florida Atlantic University pledge themselves to the support of this affiliation and to the program of the Business Club.

Sincerely,

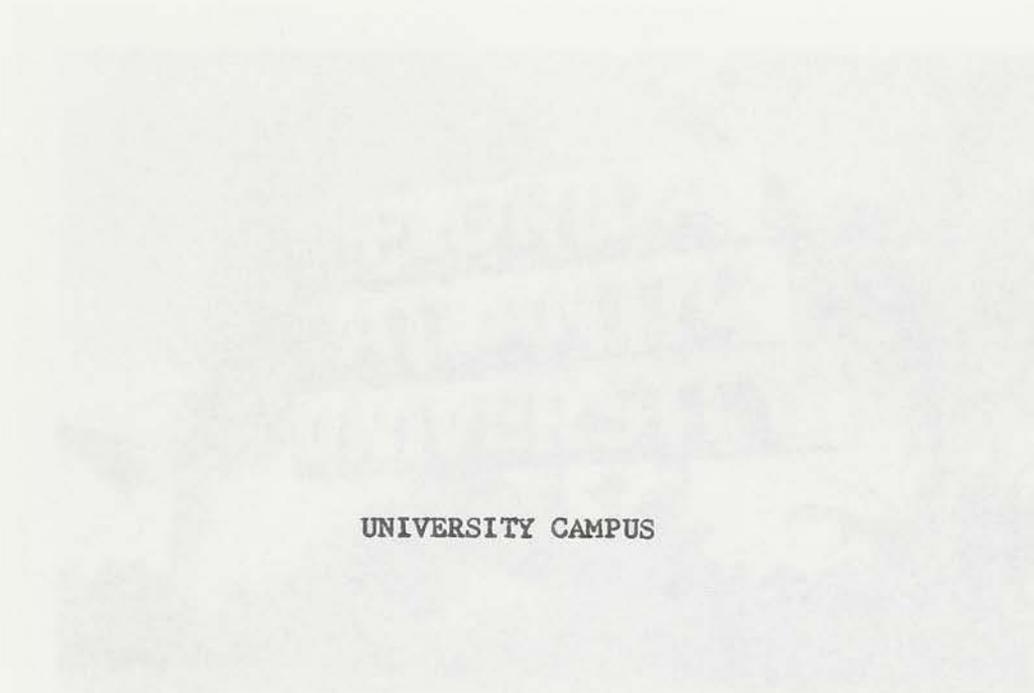

Kenneth R. Williams
President

DEAN OF MEN

Grand Council
Delta Sigma Phi
330 S. Campus Avenue
Oxford, Ohio

To Whom It May Concern:

I have been asked to send you a letter of recommendation for the Florida Atlantic University Business Club. This is a very pleasant assignment for me. Since the inception of this fine club on our campus, there projects have been handled in an orderly manner by mature young men. Of all the student organizations on our campus, our Business Club rates one-two-three in effectiveness. All student organizations have had some difficulty in these early days of our University's existence because of the fact that we had no guidelines or traditions. However, the Business Club proceeded in such a manner to make my office particularly proud of them.

National recognition by Delta Sigma Phi for their fine work would be welcome in the South Florida area. I would urge a representative of the National organization to meet with these fine young men for the purposes of establishing a chapter at Florida Atlantic University at the earliest possible date.

Sincerely yours,

R. L. Breitenstein

Gentlemen:

It gives me a great deal of pleasure to recommend to you one of the finest clubs on our campus.

Individually, the men of this Business Club have been most cooperative, hard-working, earnest and effective. Collectively, as the Business Club, they have been performing an invaluable service for the University.

They are responsible for running a social evening every Thursday night. This effort includes arranging for the room, the band, and refreshments; creating interest through advertising, posters and announcements; and leaving the room in the same condition as they found it.

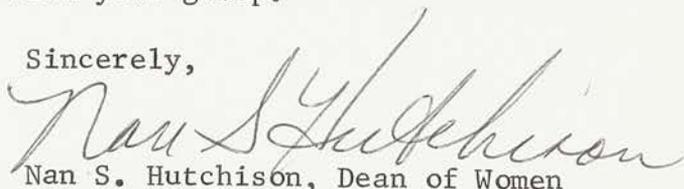

They take care of the School Calendar collecting information from various sources and publishing it regularly so as to keep the calendar up to date at all times.

They did an outstanding job in organizing an Organizations and Club Coffee for our Orientation Week. They had tables set up for each club and organization with appropriate signs so the interested students could readily find the club of their choice and sign with them. This was the liveliest and most popular event of Orientation Week.

They are also in charge of keeping the books for the student newspaper, The Atlantic Sun.

This Club proceeds under its own motivation and has displayed resourcefulness, responsibility and initiative in handling its affairs. It has been a source of pride and satisfaction to me, personally, as Director of Student Activities and I know you would be more than pleased to have such outstanding students affiliated with your group.

Sincerely,

Nan S. Hutchison, Dean of Women
and Director of Student Activities

Section 17

The Board of Trustees of the University of Florida

In 1960, Florida State University was created by an act of the Florida State Legislature. As part of the State University System, it was established as a public institution of higher learning. The University of Florida, through its Board of Trustees, is authorized to provide for the education of students in the State of Florida. The Board of Trustees is responsible for the overall management and operation of the University of Florida, including the establishment of policies and procedures for the University. The Board of Trustees is also responsible for the financial management of the University and for the appointment and removal of the President of the University.

COLLEGE OF BUSINESS & PUBLIC ADMINISTRATION

The College of Business & Public Administration is a part of the University of Florida. It is authorized to provide for the education of students in the State of Florida. The College of Business & Public Administration is responsible for the overall management and operation of the College, including the establishment of policies and procedures for the College. The College of Business & Public Administration is also responsible for the financial management of the College and for the appointment and removal of the Dean of the College. The College of Business & Public Administration is authorized to provide for the education of students in the State of Florida. The College of Business & Public Administration is responsible for the overall management and operation of the College, including the establishment of policies and procedures for the College. The College of Business & Public Administration is also responsible for the financial management of the College and for the appointment and removal of the Dean of the College.

HISTORY OF
THE COLLEGE OF BUSINESS AND PUBLIC ADMINISTRATION

In 1961, Florida Atlantic University was created by an act of the Florida State Legislature. Backed by the then Governor Ferris Bryant, this act was a culmination of many years of dedicated effort on the part of civic leaders, government officials, and educators to bring a state institution of higher learning into the heavily populated lower east coast of Florida.

Although the fifth state university to be established in Florida, it is the first in the nation to forego the traditional freshman and sophomore classes. Thus, as an upper division university, it fills the void created by the junior college movement across the nation - that of "giving every American boy and girl all the education from which he could meaningfully profit" (Pres. L. B. Johnson).

Experience at Florida Atlantic University amply demonstrates there is a logical division following the first two years of general education. Students transferring from colleges and universities throughout the nation have brought with them a high degree of maturity, dedication to academic goals, and a readiness to carry the major share of responsibility for their own education. This readiness for independent study and research, and the many opportunities given them under close supervision and guidance by the faculty provides them with outstanding preparation for graduate studies and the ability to cope with an ever-changing world.

In order to meet the high productivity ratio which was established at Florida Atlantic University, there has been considerable sacrifice on the part of the faculty members. Experimentation, innovation, and refinement of courses to meet the constantly exploding volume of knowledge confronting the serious scholar takes time for planning and execution, yet time could not be given. However, the challenge to successfully teach students while developing new programs, new techniques, and essential research programs has been met squarely with outstanding success.

Where five years ago we were confident that the experiment could succeed, we can now unequivocally say that it is succeeding and with far fewer problems than might be expected in a new and experimental venture.

Knowing that tomorrow's executive must learn to work through and with people to achieve cooperation and communication in large and small businesses, government, or a wide variety of related fields, the College of Business Administration changed its name in 1966. The new name, The College of Business and Public Administration more accurately reflects the scope of studies which it provides. Integrated programs of Accounting, Administrative Sciences, Business Education, Finance, International Business, Management, Marketing, Public Administration, and Training and Development reflect the determination to innovate curricula that would provide the very best in education for administration.

Built into the organizational structure of the University is a flexible planning program designed to make it possible for a student to

cross departmental and College lines in planning a program to serve his personal talents and interests. Together with the Deans of the Colleges, the Dean of Academic Affairs (directly under the President) develops and guides the educational development of the students. Although the College of Business and Public Administration operates under University-wide policies, it is granted wide latitude in designing unique programs within its jurisdiction as a means of better serving its students.

Thus, the College of Business and Public Administration shows recognition that, "Where Tomorrow Begins," the practice of administration is not confined to business, but can be successfully learned and applied in an expanding number of administrative situations that require an understanding of leadership, communication, and human relations. Thus, the College of Business and Public Administration adopted its own slogan, "Education for Tomorrow's Administrator."

Showing student support for this insight into the needs of the professional administrator, majors in the College of Business and Public Administration graduated forty-five men and women who earned the bachelor of science degree.

Because of the fortunate high calibre of scholars and businessmen within the College of Business and Public Administration, the College has been able to attract and retain significant support for research and assistance in its field. Also, many local businessmen, active, semi-retired, and retired, have contributed much high-calibre active support

for the College with lectures, research, equipment, support personnel, student assistantships providing "On the Job Training", travel money, and many other expenses which are critically needed but for which the state had not provided funds. Again, the amount of student financial aid available to students has increased, with nearly one-half of the students in the University receiving a total of \$393,695 in scholarships, loans, and student assistantships during the past two years.

In keeping with its slogan of making available all possible profitable "Education for Tomorrow's Administrator," the College of Business and Public Administration is now developing plans for a master of business administration degree and, in cooperation with the College of Social Science, for a master of public administration degree. This graduate program is expected to expand in the near future to include other offerings, including those at the doctorate level.

To materially improve the approach toward realism in what could otherwise be a sterile classroom situation, the College of Business and Public Administration has taken full advantage of the learning resources center - an integral part of Florida Atlantic University. The experience of two years of operation demonstrates that students do make extensive use of the new kinds of media and technology.

The calibre of independent research, role playing, gaming, simulation, decision laboratories, remote computer access, televised case studies, and other devices in use or in planning show that the College of Business and Public Administration, and the University, is not interested in gadgetry and is not a pushbutton school. These resources are

no more gadgets than books are, but are tools for learning and exploration of the many new avenues to learning in this rapidly changing society in which we live.

Services of the College of Business and Public Administration are expanding as rapidly as funds are being made available. One television course has already been assembled and televised through the facilities of a local commercial television station as a result of the effort of a highly qualified group of professionals, skilled technicians, and professors within the College. Many more courses are in the process of preparation.

One of the new buildings to grace this 1200 acre World War II air base will be the planned four-story College of Business and Public Administration building, to be completed within the next two years. The building will house the faculty of the college, have television facilities in all classrooms, special classrooms for simulation and computer instructional techniques, large laboratories for business education and administrative sciences, and specifically designed student seminar rooms and independent study stations with the most advanced technical learning resources to assist the student's independent study desires and requirements.

To enable students in the accelerated learning program to assist and work with faculty members engaged in administrative research, as well as to create a depository for the latest developments and advancements in the field of administrative research, Mrs. Alex D. Henderson made

a memorial gift, in the memory of her late husband, of \$750,000. This gift will be used in the construction of a University Laboratory School to be opened by September 1967. This will certainly enhance the depth of research in administration not only at the University, but throughout the world. Also, it will further serve those students, both graduates and undergraduates, desiring additional study in study in selected areas.

The College of Business and Public Administration is experimental, it is innovative, it is unafraid. It is growing rapidly and adjusting to serve ever-increasing numbers of students on and off campus. Within its walls are housed the talents that will build for Florida, the nation, and the world, a great university. With the support of local, national, and worldwide leaders in business and in education, it cannot help but succeed in repaying those who have confidently entrusted the College in the education of our youth and so the future of our world.

Dr. John W. Sullivan

Professor and
Dean of the College of Business and Public Administration

Dr. John W. Sullivan

Dr. John William Sullivan came to Florida Atlantic University in 1965. Dr. Sullivan received his B.S., M.S. and PH.D. in Public Administration at the University of Southern California. From 1962 to 1964, he was associated with Wayne State University and attained the position of Chairman of the Administrative Science Department.

Dr. Sullivan has been instrumental in the introduction of Electronic Data Processing to use in the field of Education. He organized and introduced Electronic Data Processing curricula at the University of Southern California, Wayne State University and Florida Atlantic University. For his contribution to this field, he was named Automation Educator of the Year in 1966 by Business Automation. Dean Sullivan has served on the Governors Conference Educational Steering Committee for the State of Florida and is Vice Chairman of the Palm Beach County Governmental Study Commission. Publications include Introduction to Electronic Data Processing, Curriculum for E. D. P., and over thirty articles published in professional publications. Recent articles include "Re-Training the White Collar Worker". Professional memberships include: American Management Association, Society of Automation in Business Education, Systems and Procedures Association (International Director 1962-64) and The Association for Educational Data Systems.

Florida Atlantic University

A STATE UNIVERSITY IN BOCA RATON, FLORIDA 33432

College of Business and Public Administration

October 10, 1966

Grand Council
Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio

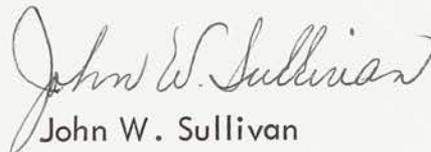

Gentlemen:

The student officers of our local business club have requested that I write concerning their application for affiliation with your fraternity. I am pleased to comply with this request.

Florida Atlantic University's business program has grown explosively since its inception in September 1964 and now serves over 600 students. These students need a professional fraternity of national status to further professionalism and to assist in the inculcation of ethical standards during their undergraduate years. Your organization offers this needed stimuli to the achievement of the above goals.

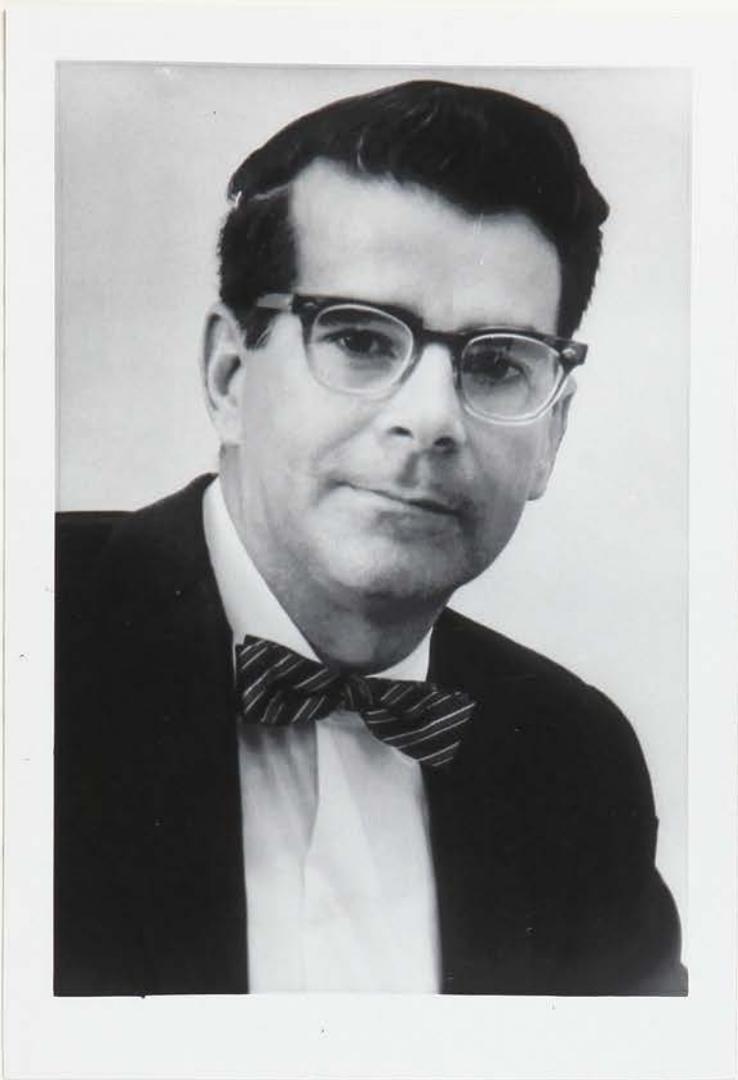

For my part, I wish to give assurances that we shall always be ready to assist the local fraternity and the Grand Council in their endeavors.

Sincerely,

John W. Sullivan
Dean

JWS/mfh

Dr. Gordon E. Bell

Professor and
Chairman, Accounting and Finance Department

Dr. Gordon E. Bell

A Certified Public Accountant in Maryland and North Carolina, Dr. Bell received his B.B.A. from The University of Miami, graduating Magna Cum Laude in 1948; his M.B.A. in Accounting, from the University of Florida in 1950; and his Ph.D. in Economics from the University of Florida in 1964.

Dr. Bell is currently active in the Municipal Finance Officers Association and in various accounting organizations in Florida.

In addition to holding a partnership in a public accounting firm, his past experience includes a wide variety of industrial and governmental positions, both full time and consulting. Among these were Chief, Accounting Advisory Section, North Carolina Government Commission and the U. S. General Accounting Office in Washington.

Dr. Wallace H. Best

Professor and
Chairman, General Administration Department

Dr. Wallace Best

Dr. Wallace Best received his A.B. in Political Science at Occidental College. He continued his studies at the University of Southern California where he received his A.M. and Ph.D.. For the past three years, he has been a lecturer on Public Administration at Harvard School of Public Administration and has become one of the well recognized academic figures in this field.

Prior to joining the staff of Florida Atlantic University, he spent 2½ years in Pakistan as an advisor for the National Institute of Public Administration as a director and consultant for the University of Southern California School of Public Administration which maintains a faculty there under a State Department Technical Assistance Contract. Dr. Best instructed and lectured in the Public Administration and Political Science Departments of the University of Southern California, in the University of Maryland overseas program and at Long Beach State College. He has served as a consultant to the California's Governor's Committee on Medical Aid and to the Mangore Corporation. Currently, he is involved in a Department of Commerce feasibility study of Auto Train Tourism Service in Florida.

Dr. Theodore S. Kliston

Associate Professor and
Acting Chairman
International Business and Public Administration

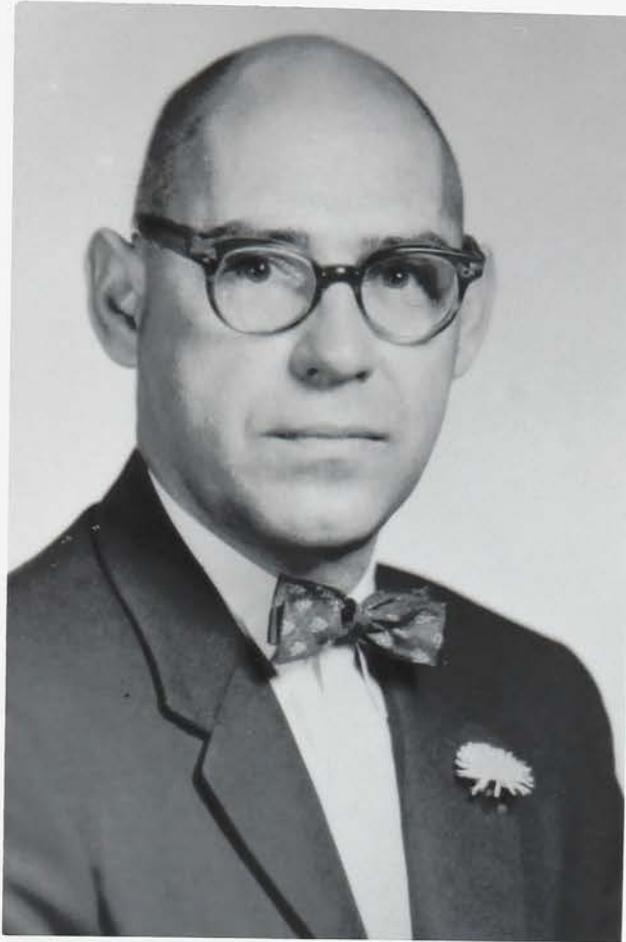

Dr. Theodore S. Kliston

A former resident of New York, Dr. Kliston worked his way to Boca Raton via Wall Street, Washington, and Miami.

In 1938, Dr. Kliston received his B.B.A. in Economics and Business Administration from the College of the City of New York. His M.B.A. was granted in 1936 from the Wall Street Division of the Graduate School of New York University and he obtained his Ph.D. in 1956 from American University in Economics, Finance, Labor Relations.

Formerly head of a New York investment banking firm, he also served in various capacities in the Federal Government in Washington, including the Securities and Exchange Commission. His most recent industrial affiliation was as President and Director of two Florida construction firms and as Vice President of the Kratter Corporation.

His experience in the field of insurance and finance include service in two insurance firms of national standing as director and as Vice President of one.

• JUN • 64

Dr. Richard G. Domey

Professor and
Chairman, Administrative Sciences Department

Dr. Richard G. Domey

Dr. Domey came to Florida Atlantic University in 1964 after 12 years of academic teaching and 7 years of full time research. During his years in research, Dr. Domey was associated with the Harvard School of Public Health, Division of Environmental Health Sciences and Engineering. His work consisted of measurement of human performances in both laboratory and field conditions. He received his B.S. from Boston University, Ed.M. at Harvard University and his Ed.D. at the University of Colorado.

In the field of industry, he has served as a consultant to Curfiss-Wright Corporation, The Sylvania Company, the A.D. Little Company and the Unives Corporation. As a consultant and researcher in the field of Community Health, he has served on the National Commission on Community Health Services Inc., as a sponsor of the American Public Health Association and National Health Council, and studied the public health organization of the State of Maryland.

On a voluntary basis, Dr. Domey serves on the Steering Committee for general conference on Population Study of the Blind and Blind Deaf for the American Foundation of the Blind. He is also a consultant to the Department of Labor and a member of the Night Vision Committee, National Academy of Sciences. Publications include over thirty, both nationally and internationally on the subjects of Constitutional Psychology, Perception and Vision, Public Health and Human Engineering.

Dr. Domey is a member of many organizations, among them are The Governors Committee Study of Higher Learning in Florida, American Psychological Association, Massachusetts Public Health Association, Human Factor Society, System and Procedures Association, Kappa Delta Pi and Phi Delta Kappa.

APR • 64 • O

Dr. Joel E. Ross

Professor and
Chairman, Management and Marketing Department

Dr. Joel E. Ross

Dr. Joel E. Ross, professor and chairman of the Management and Marketing Department of Florida Atlantic University's College of Business and Public Administration, is a graduate of Yale University and earned his Master's and Doctoral degrees at George Washington University.

Before joining the faculty at Florida Atlantic University, he was Professor and Director of The Division of Business Administration at Merrimack College, Andover, Mass., where he administered a program for 400 students and 13 faculty members. Prior to his association with Merrimack, he was a lecturer at the Universities of Rhode Island and Virginia.

A retired U. S. Navy Commander, Dr. Ross had considerable administrative experience while in service. Among his assignments was that of special assistant to the Chief of the Bureau of Supplies and Accounts where he conducted special studies for the Chief, including one for the redesign of the Navy's inventory control and support activity system. For four years he was assistant and later head of a unit that maintained financial control of a \$200 million annual foreign aid program, a position that entailed frequent travel abroad.

Dr. Ross has been a speaker or participant in many local and national management groups. He is currently consultant to the Computer Command Control Company, Washington, D. C.. At present, he is considering the possibilities of open circuit Television courses in Management, for academic credit, to originate from Florida Atlantic University.

Dr. James B. Montgomery

Assistant Professor of Administration and
Business Club Advisor

Dr. James B. Montgomery

Dr. James B. Montgomery joined the faculty of Florida Atlantic University in 1964 and holds the rank of Assistant Professor of Administration. Since 1956, he had been with private accounting firms. Prior to joining the College of Business and Public Administration, he had been with the Bureau of Economic and Business Research at the University of Florida, where he also served as interim instructor. He is a graduate of Miami (Ohio) University and took his M.B.A. and Ph.D. at the University of Florida.

While at the University of Florida, Dr. Montgomery conducted an economics study of Sarasota, the result of which were summed up in two publications, "The Unique Economy of Sarasota" and "An Economic Analysis of a Locally Orientated Community". He is a consultant to the Tax and Budget study sub committee of the Resources Department Board of Palm Beach County.

Dear Brothers:

It gives me great pleasure to recommend the Business Club for your consideration as a member of Delta Sigma Pi.

It has been my pleasure to be an advisor to the Club for the past year. As a former member of Alpha Upsilon Chapter, I can appreciate the opportunities that membership can give a young man.

The Business Club is composed of outstanding young men. Their activities this past year have been invaluable to the University, The College of Business and Public Administration, and to the members.

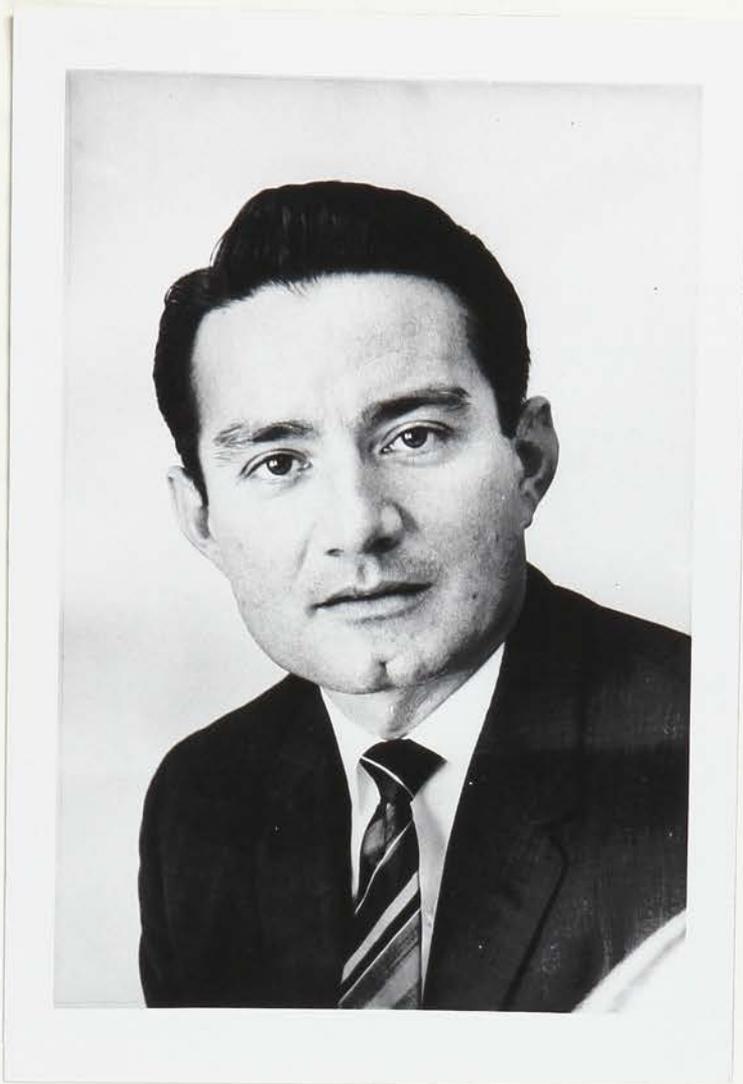

It is my earnest hope that you receive their petition for affiliation favorably.

Fraternally yours,

Dr. James B. Montgomery
Admissions Officer

Mr. Michael Pantya

Instructor in Administration and
Business Club Advisor

Mr. Michael Pantya

Michael Pantya came to Florida Atlantic University in 1964 after receiving his Bachelor's and Master's Degrees and teaching at the University of Miami. For thirteen years he was associated in various capacities with stock brokerage firms in Miami and Fort Lauderdale. He is an Instructor of Administration in the College of Business and Public Administration. Mr. Pantya is a charter member of Beta Omega Chapter of Delta Sigma Pi at the University of Miami.

Dear Brothers:

It gives me great pleasure to recommend the Business Club for your consideration as a chapter in the faculty of Delta Sigma Pi.

It has my pleasure to support the Club with the ultimate objective of affiliating with the Fraternity. As a former charter member of Beta Omega Chapter, I can appreciate the opportunities that membership can give a young man.

The Business Club is composed of above-average students. Their participation in activities this past year has been a source of value both to the University and to the Club.

It is my sincere hope that you will give their petition for affiliation the necessary
