

PETITION
TO
DELTA SIGMA PI
INTERNATIONAL BUSINESS
FRATERNITY

SUBMITTED BY
DELTA SIGMA FRATERNITY
OF
BOWLING GREEN STATE UNIVERSITY

To The Grand Council of The International
Fraternity of Delta Sigma Pi

Greetings

We, the undersigned Brothers of Delta Sigma Pi Chapter
numbered _____ petition for a charter to establish a Chapter
of the International Fraternity of Delta Sigma Pi on the campus
of Bowling Green University, Bowling Green, Ohio

Delta Sigma Pi was formed as a total men's pilot organization
and has grown impressively through the active promotion and
interest demonstrated by its members. Unanimous approval
of the petitioning of Delta Sigma Pi reflects the enthusiasm for
affiliation.

In pursuit of this affiliation, the Brothers of Delta Sigma
pledge to uphold the rules and regulations as set forth in the
Constitution and By-Laws of the International Fraternity of
Delta Sigma Pi and further to carry out its traditions and pro-
grams.

WITNESSED OUR SIGNATURES

LETTERS OF RECOMMENDATION

LETTERS OF RECOMMENDATION

Form No. 100-100-100

Date: _____

Page: _____

Mr. Charles L. Farnet, Executive Director
International Fraternity of Delta Sigma Phi
One National Office
210 South Cooper Avenue
Oxford, Ohio 45056

Dear Mr. Farnet:

It is a great opportunity for me to recommend to you and your national organization, our local men's club organization, Delta Sigma Phi.

The young men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi, are the men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi.

LETTERS OF RECOMMENDATION

The young men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi, are the men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi.

The young men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi, are the men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi.

The young men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi, are the men who have benefited from the character and leadership training, both organizational and personal training, in the chapters of Delta Sigma Phi.

BOWLING GREEN STATE UNIVERSITY

BOWLING GREEN, OHIO

COLLEGE OF BUSINESS ADMINISTRATION
OFFICE OF THE DEAN

February 19, 1970

Mr. Charles L. Farrar, Executive Director
International Fraternity of Delta Sigma Pi
The Central Office
330 South Campus Avenue
Oxford, Ohio 45056

Dear Mr. Farrar:

It is a real opportunity for me to recommend to you and your national organization, our local men's pilot organization, Delta Sigma.

The young men who have organized this chapter are among the outstanding leaders, both organizationally and scholastically, in the College of Business Administration. Several of the members are serving on the Dean's Advisory Council: Phillip Weller, President of D.A.C., Vice President of Beta Gamma Sigma, serving on the Presidential Selection Committee; Daniel Dugan, President of the Insurance Club, member of the Appeals Committee of the College; Randy Barnes, member of the Awards and Scholarship Committee of the College, and also president of the pilot group, Delta Sigma. These outstanding students and others of similar caliber have formed the nucleus of the organization, and have endowed the group with the kind of performance and goals that portend future excellence.

We in our office are happy to have been of service to these students in their organizing agonies, and will continue to back their work in every way possible. My only regret is that I can help only indirectly. Perhaps in the future the changing composition of colleges of business may suggest a certain broadening of your membership base!

The Bowling Green chapter of Delta Sigma Pi should be an asset to your national organization.

Sincerely,

Marie R. Hodge

Marie R. Hodge
Assistant to the Dean

COLLEGE OF BUSINESS ADMINISTRATION
OFFICE OF THE DEAN

February 11, 1970

Mr. Charles L. Farrar
Executive Director
International Fraternity of Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio 45056

Dear Charles:

Tom Depler and Randy Barnes have requested that I endorse the request of Delta Sigma Fraternity here at Bowling Green to become affiliated with Delta Sigma Pi. I am indeed delighted to do so.

Fall a year ago when we initiated discussions regarding the possibilities of establishing a Bowling Green Chapter of Delta Sigma Pi, faculty reaction was, at best, lukewarm. Earlier attempts to stimulate institutional interest had not proved successful. What occurred in the past, might well be predicated of the future.

Notions of the future have proven false. As you remember, an organizational meeting held about this time was marked by numbers of students far exceeding even optimistic expectations. This was hard evidence that students here were interested in Delta Sigma Pi. Interest has now evolved to the degree that students want to affiliate with Delta Sigma. Paranthetically I might note that this decision was made only after various alternatives were considered (some of which took me by surprise).

Coupled with great student enthusiasm to affiliate and to participate in fraternity activities is a leadership cadre consisting of exceptionally good students. Tom and Randy, for two, possess the necessary leadership qualities to insure that a local Chapter of Delta Sigma starts off on a solid foundation. I am not as yet personally acquainted with other leaders; however, faculty colleagues who do tell me that they are bright, sharp young chaps who, apparently like Tom and Randy, wear the leadership mantle well.

The Dean's Office believes that the establishment of a campus Chapter of Delta Sigma Pi is important. I would plan to use the local Chapter as a sounding board - testing out new ideas regarding curriculum development and instructional approaches - as well as means of developing a better understanding of the student point of view.

In short, Charles, I am endorsing the students' application for affiliation with Delta Sigma Pi because of demonstrated enthusiasm for affiliation, leadership strengths (and the expectation that a soundly functioning leadership cadre will be developed from within), and the belief that a campus Chapter of Delta Sigma Pi serving as a communication carrier would assist in improving the administration of the College of Business.

Cordially,

MARATHON OIL COMPANY FINDLAY OHIO 45840

February 6, 1970

Mr. Charles Farrar
Delta Sigma Pi
International Headquarters
Oxford, Ohio

Dear Mr. Farrar,

Since we are not acquainted, please permit me to introduce myself. I have been with Marathon Oil Company 14 years in the areas of Finance, Computer Programming, Systems Analysis and presently as Computer Science Instructor involved in training new people in our Computer Organization.

Last May I had the opportunity to speak to the Delta Sigma professional fraternity at Bowling Green State University. The subject of the presentation was "The Future of Computers".

I was very favorably impressed with the members of the fraternity in their organizational and business conducting capabilities as well as in the informal discussions which were held following the presentation. I suggest that they would be a welcome addition to the Delta Sigma Pi National Organization.

Sincerely,

Paul B. Jackson

OFFICE OF THE PRESIDENT

February 19, 1970

Mr. Charles Farrar
Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio

Dear Mr. Farrar:

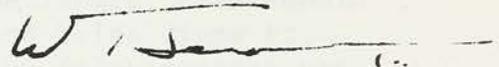

Dean Karl Vogt of our College of Business Administration has told me of the interest of Bowling Green's chapter of Delta Sigma Fraternity in affiliating with Delta Sigma Pi.

This fraternity has given responsible leadership in developing a professional program which has brought leading business administrators and business-oriented speakers to the campus. The participation and interest of its members has been outstanding.

Thus I would like to recommend Bowling Green's chapter of the Delta Sigma Fraternity to you. We would be most pleased if this group is accepted as a chapter of Delta Sigma Pi.

Best wishes.

Cordially,

Wm. Travers Jerome III
President

43402

COLLEGE OF BUSINESS ADMINISTRATION
OFFICE OF THE DEAN

February 2, 1970

Mr. Charles L. Farrar
Delta Sigma Pi
330 South Campus Ave.
Oxford, Ohio
45056

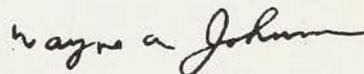

Dear Mr. Farrar:

Delta Sigma has indicated to me that they intend to go national. I'm very glad to hear this as I feel we have a very active group here, and that they would be an asset to the national organization.

They have had a well-balanced group of speakers in so far; one man on investments from Merrill, Lynch . . . , another individual concerned with Systems Analysis and their next meeting will be taken up with a presentation by a union official. I think the students as a whole benefit from the diversity present in these programs. It also represents the proper College-wide spirit that is so necessary in a Business Fraternity such as Delta Sigma Pi.

If the number of students the local chapter has been able to attract is any indication of the future, this should prove to be one of the larger chapters of Delta Sigma Pi. Considering the general charges of apathy filed against the BGSU campus, it appears that this group has found a way around the problem - they are anything but apathetic. Instead, they appear to be highly motivated and very active in promoting the chapter, as well as the field of business.

Sincerely,

Wayne A. Johnson
Assistant Dean

TEAMSTERS

Office of the President

joint council no. 44

February 25, 1970

Mr. Charles Farrar
Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio

Dear Mr. Farrar:

Recently, I had the pleasure of speaking to the Delta Sigma professional fraternity on the campus of Bowling Green State University. My presentation was concerned with the organization and function of unions.

The students in this organization impressed me as being very interested in the field of business. The questions asked during the presentation stimulated a most interesting conversation.

Please accept my recommendation for affiliation of this group with Delta Sigma Pi. Delta Sigma should prove to be a very valuable addition to your organization.

Sincerely,

Paul L. Steinberg,
President

March 18, 1970

Mr. Charles Farrar
Delta Sigma Pi
Oxford, Ohio 45056

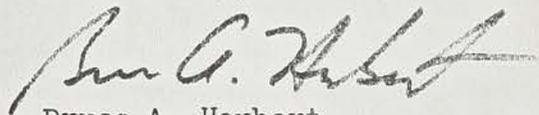

Dear Mr. Farrar:

In early December 1969, Mr. William Sims and I had the opportunity of speaking before the Delta Sigma Chapter of Bowling Green State University. We were quite impressed with the group of men that we met and they appeared to be well organized and strongly motivated by their interest in the business field.

It has come to my attention that Delta Sigma is seeking national affiliation. Based on what I have seen of this group, I feel that they would be a very worthwhile addition to a nationally based business organization.

Please feel free to contact me if I can provide you with any other information on the Delta Sigma Chapter at BGSU.

Yours truly,

Bruce A. Herbert
Account Executive

THE HISTORY OF THE CITY OF BOWLING GREEN

The city of Bowling Green was founded in 1803 by James W. Brown, a pioneer and settler of the Ohio Territory. It was the first city in the territory to be laid out on a grid plan. The city was named in honor of the Duke of Wellington, who had just defeated Napoleon at the Battle of Waterloo. The city was the first to have a public library, a public school, and a public hospital. It was also the first to have a city government.

The city was incorporated as a city in 1816. It was the first city in the Ohio Territory to be incorporated as a city. The city was the first to have a city government. The city was the first to have a public library, a public school, and a public hospital. It was also the first to have a city government.

BOWLING GREEN UNIVERSITY

Bowling Green was originally a small town of about 100 people. It was the first city in the Ohio Territory to be laid out on a grid plan. The city was named in honor of the Duke of Wellington, who had just defeated Napoleon at the Battle of Waterloo. The city was the first to have a public library, a public school, and a public hospital. It was also the first to have a city government.

The city was the first to have a public library, a public school, and a public hospital. It was also the first to have a city government.

The history of Bowling Green is a story of a city that was founded by a pioneer and settler. It was the first city in the Ohio Territory to be laid out on a grid plan. The city was named in honor of the Duke of Wellington, who had just defeated Napoleon at the Battle of Waterloo. The city was the first to have a public library, a public school, and a public hospital. It was also the first to have a city government.

HISTORY OF THE UNIVERSITY

Bowling Green University is located in Northwest Ohio, 23 miles South of Toledo and 15 miles South of the Ohio Turnpike. The campus contains nearly 1,100 acres and 80 academic buildings and residence halls, with more under construction, and modern equipment and facilities for conducting an accredited University program.

Bowling Green's history began on January 24, 1910, when John H. Lowry, representative from Henry County, introduced a bill in the Ohio General Assembly "to provide for the appointment of a commission to establish two normal schools and to provide for the maintenance thereof".

The bill was passed May 10, 1910, and approved by Governor Judson Harmon nine days later. On November 22, that year, the city of Bowling Green was officially notified that it had been chosen as the site for the normal school in Northwest Ohio.

Classwork began in September, 1914, but it was not until the following year that the first two buildings--the Administration Building (now University Hall) and William Hall--were ready for use. In the meantime, classes met in the Armory in Bowling Green and the old Central High School in Toledo.

The faculty numbered 21; the enrollment was 304. Full-time faculty members now total 540 (On campus).

Bowling Green's expansion into a fully-accredited university has been rapid. It has grown from 4,800 students on campus in 1957 to more than 12,400 in 1969. Nearly, 1,200 other students attend classes at the University's academic centers in Bryan, Fostoria, Fremont and the Firelands campus in Huron. Enrollment is expected to reach 15,000 within the next three years.

Courses of instruction leading to degrees are organized within the College of Education, the College of Liberal Arts, the College of Business Administration, and the Graduate School.

The Graduate School is probably the fastest growing area at Bowling Green. More than 1,000 students are enrolled in the University's 36 masters and five doctoral programs.

There's one thing that has not changed at Bowling Green--it's still educating a great number of teachers. Bowling Green ranks 11th in the nation and second in Ohio in training certified teachers.

Many other phases of the University, especially its physical appearance, are changing dramatically. One of the first things a visitor notices is the \$4.5 million, ten-story library in the center of campus. President Jerome calls it "the most important building we've built". The ultra-modern structure, equipped with automated gear to accelerate library operations, contains up to 640,000 volumes.

Also added to the campus in recent years have been two 1,400 bed residence centers and a \$4.5 million life sciences building. Two more

buildings are in various stages of construction, including a general science and psychology buildings. Several others are on the drawing board.

Complementing the impressive architecture is the importance university officials place on the continuing development of Bowling Green's faculty. Recent appointments have included a number of scholars with national and international reputations.

To insure a quality education for its students, the University also has launched a \$10 million development program entitled "Bowling Green's Mission: Expanding Horizons". All "Mission" funds have been earmarked for improving and expanding programs, recruiting top-notch faculty and for student scholarships.

Another area receiving considerable attention is student life. Stronger guidance and counseling systems are being developed and completion of the circular \$2 million Student Services Building in September, 1968, is helping integrate students' non-academic and academic interests.

To encourage recreational activities that bring students, faculty and townspeople together, a variety of facilities which can accomodate large numbers of participants have been constructed. A nine-hole golf course, platform tennis courts, an ice arena, and football stadium are the most popular.

The orderly development of the fast-growing campus has been one

of the University's main concerns. A nationally-known counseling firm and a team of specialists in college long-range planning has worked with University faculty and staff in setting guidelines to help Bowling Green plan for an enrollment of 15,000 by the early 1970's. This master plan was released in September, 1966.

Also initiated at Bowling Green under Dr. Jerome, who became president in 1963, have been a University Honors Program to give top-ranked students the opportunity for independent study outside the classroom, and a semester abroad program to put language students in direct contact with the people and culture of the country they are studying. The expansion of the International Student Program is in keeping with the President's belief that American and foreign students can and do learn much from each other.

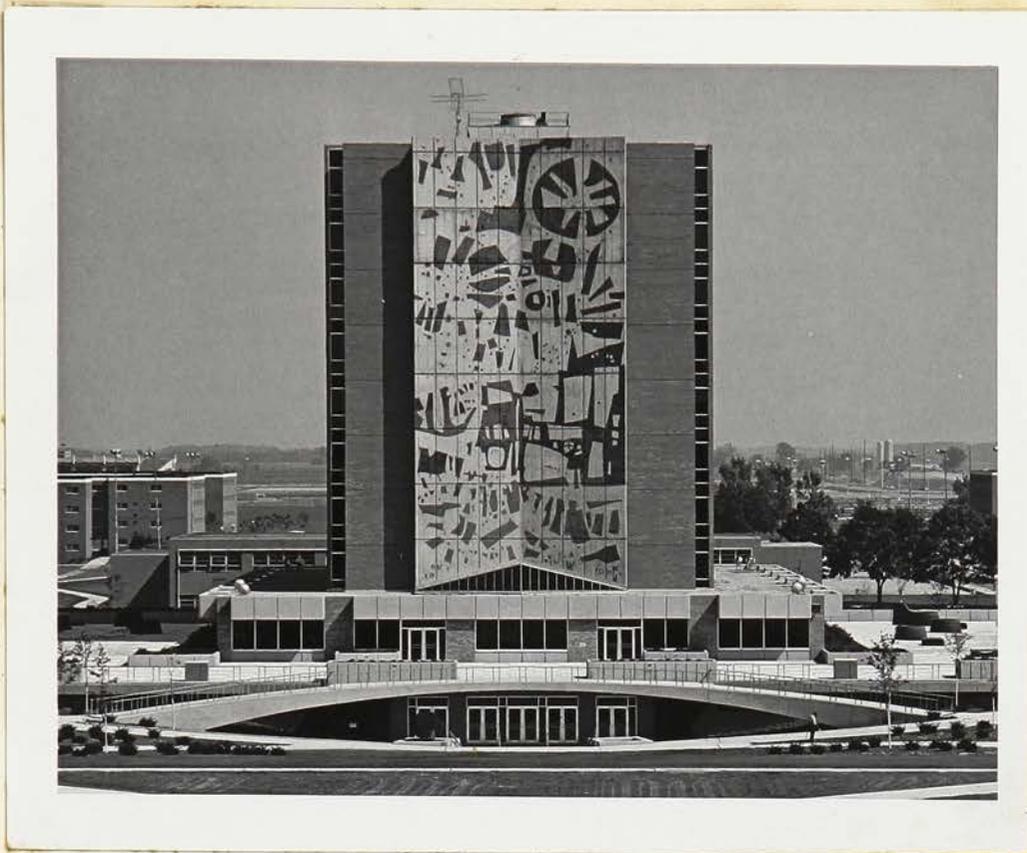

BOWLING GREEN UNIVERSITY UNION

The Bowling Green Students Union, opened in 1958, is an excellent example of the building type. The structure is a modernist design with a central tower and wings. The building was designed by the architect, Paul Nelson. With its modernist design, the building is a landmark in the University's history. With expanded facilities, the Bowling Green Union will continue to provide a most significant role.

BOWLING GREEN UNIVERSITY UNION

The Bowling Green University Union, opened in 1958, is an outstanding example of the building type. Its numerous accommodations leave little to be desired and many of its facilities are exceptional. The Union, with its emphasis on service, has contributed to the University image. With expanded facilities, the University Union will continue to perform a most significant service.

LIBRARY

A ten story building in the center of campus, the ultramodern structure is equipped with automated gear to accelerate library operations. Built in 1966, the University Library, with its 370,000 volumes, 200,000 government documents, 242,000 microfilms, and 3000 current periodicals, provides a research source for the University and its surrounding communities.

STUDENT SERVICES BUILDING

Completed in 1967, the Student Services Center is a unique contribution to the creation of a climate for learning on the Bowling Green campus. Circular in shape, a saucer-like open forum underneath, and a dome capping the student court chambers, the architect's conception has been exhibited and applauded at national meetings of school administrations as uniquely designed to support an innovative educational philosophy and program.

HAYES HALL

Formerly the Practical Arts Building, Hayes Hall has been centralized quarters for the Departments of Accounting, Business Administration, Business Education, Economics, Marketing, and Finance and Insurance. A new College of Business Administration Building is to be completed by August of 1972.

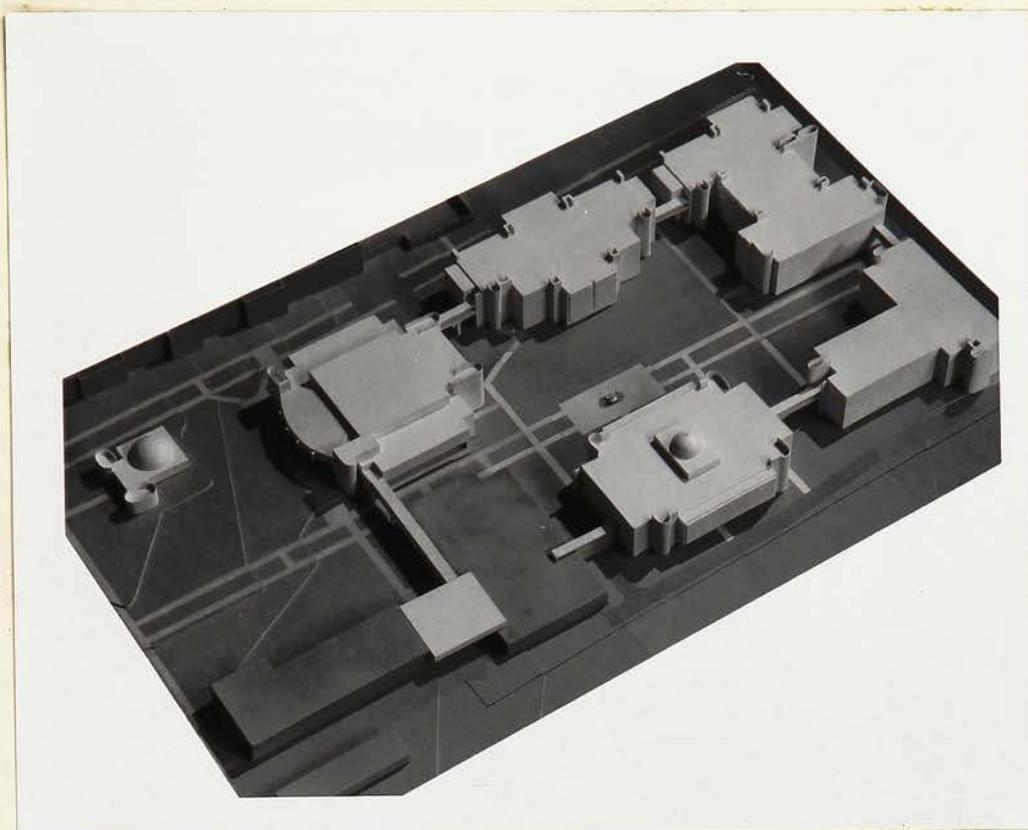

UNIVERSITY HALL

One of the older buildings on campus, University Hall is located in the center of campus and contains the University Auditorium and the Joe E. Brown Theatre.

EDUCATION BUILDING

A showcase for innovative teaching, and a forward thrust for experimentation in education, the five story building was completed in 1966. Rooms represent a variety of dimensions from lecture halls to seminar and conference rooms, and invites experimentation with large sections, small discussion groups, and team teachers.

SCIENCE COMPLEX

Located on the northwest corner of the campus, the science-research complex is among the new structures on Bowling Green's campus. It includes the Life Science, Behavioral Sciences, and the Science-Mathematics Lecture Buildings, the latter three being part of the five-phase science-research complex. A Physics-Chemistry Building and a Life Sciences Research Building will complete the complex.

THE HISTORY OF THE COLLEGE OF BUSINESS ADMINISTRATION

The history of the University of North Carolina, the College of Business Administration, and the Department of Business Administration, is a story of growth and achievement. The present success and the future promise of the NC State College of Business Administration may be traced to the original long-range planning of President Hargett, first Dean of the College, and to those men who were associated with him during the early years. They set up the foundation program which has inspired through the years a number of outstanding business leaders and administrators. The following is a brief history of the College of Business Administration.

COLLEGE OF BUSINESS ADMINISTRATION

The College of Business Administration was established in 1916 as the first business school in the South. It was the result of a long and arduous struggle for recognition and respectability. The college has since that time been a leader in the development of business administration education in the South and the nation.

The college has grown from a small department in 1916 to a large and respected institution today. It has been a pioneer in the development of business administration education in the South and the nation. The college has since that time been a leader in the development of business administration education in the South and the nation.

The college has since that time been a leader in the development of business administration education in the South and the nation. The college has since that time been a leader in the development of business administration education in the South and the nation.

THE HISTORY OF THE COLLEGE OF BUSINESS ADMINISTRATION

Youngest of the University's three colleges, the College of Business Administration looks to the future. Much, however, of the present success and the future promise of the BGSU College of Business Administration may be traced to the original far-sighted planning of President Harshman, first Dean of the College, and to those men who were associated with him during the formative years. They set up an academic program which has endured through over a quarter of a century of revolutionary change in business organization, problems, and personnel needs.

President Harshman witnessed the growth of the College almost from its inception, and had a hand in that growth. When he was appointed to the University faculty in 1936, he was assigned the task of developing a permanent curriculum.

Authority for establishing the BGSU College of Business Administration was granted by legislation in 1935, and the University immediately set up an academic program patterned after those of some well-known colleges. The BGSU College began in two rooms and an office in what is now Hayes Hall.

In the first University Catalog in which the College of Business Administration appears, only two pages were required to list all the

general information regarding the College. The date was May, 1936. The President of the University was Homer B. Williams, and there was a blank to be filled in later with the name of the Dean of the College. The two pages have grown to 27 and the College is directed by its fourth dean: Karl E. Vogt. The years 1936-38 were those when the basic policy of the College was formulated, its direction determined, and curriculum stabilized.

Combining in his own background of experience the knowledge of theory and practical experience that he was to look for in appointing faculty members, Dr. Harshman bequeathed to the College faculty standards which may represent its greatest asset today. From the beginning, he organized courses of study which emphasized knowledge of broad principles underlying business operation and organization, leaving the specifics of practice and procedures for on-the-job orientation. In this he was at least a decade ahead of his time.

Business administration students at BGSU received a liberal education, and at least 50% of the program was in non-business subjects. When the College was admitted to the national accrediting association for collegiate schools of business nearly 20 years later, one of the prime requirements was that no less than 40% of the work should be accomplished in non-business areas. The College still maintains its original 50-50 ratio, however.

The typical business administration student today may take

93 hours of non-business subjects, 32 hours of core business subjects, 26 hours of free electives, and 32 hours in his specialized area, for a total of 183 hours. BGSU students were among the first business students to be required to study high school mathematics and to take college mathematics for the degree in business administration.

The first permanent College curriculum equipped students to adjust to a variety of practices of individual business corporations and to move more rapidly toward decision-making positions, before the term became popular. Flexible courses permitted instructors to make frequent adjustments to keep pace with changing business organization and needs. First major and minor areas were in accounting, finance, marketing, and secretarial science. Although the College continued to add special areas, it never lost sight of the original nucleus of liberal arts subjects and general business courses which still provide the foundation for the education of all students in the College.

The BGSU College was among the first to teach the principles of business law, rather than a narrow type of commercial law; and to help students understand the theory of writing business contracts and the relationship of government in business. One of the first courses in the country in Social Control of Business was offered to BGSU students preparing for business careers.

Fully expecting growth in the College, Dr. Harshman did not

expect the College to grow as rapidly as it did. Since 1951, enrollment has increased from nearly 800 to more than 2200 students. The College was admitted to membership in the National Association of Collegiate Schools of Business in the spring of 1954. The dean at this time was Benjamin Pierce. A little over 100 of more than 600 colleges, schools, or departments offering business specialization in the United States are accredited by the group. Increases in the number of departments and special programs has accompanied the growing enrollment of the BGSU College. In 1952 the Departments of Journalism and of Air Science were added. In 1954, one of the first majors - accounting - became a separate department. Curricula within departments of the College now total 22, and the student who satisfactorily completes on these curricula receives the degree Bachelor of Science in Business Administration.

Growing out of a course in machine accounting, electronic data processing equipment has been acquired and located in a laboratory devoted to business data processing. The College obtained one of the first university installations of basic IBM equipment solely for instructional purposes in 1954, and has recently added an IBM 360/50 computer, replacing an IBM 1620 model. In the fall of this year, CPS terminals were purchased and were made available to the students for the first time.

Completion of work in eight groups now is required of each candidate for a degree. The first five are in non-business areas:

communication arts; mathematics, science, and quantitative measurements; social science; humanities; and non-business electives. The sixth group contains the common core of subjects to give each student a breadth of knowledge in business subjects, and the seventh group is for the student's specialized area. Group eight is reserved for free electives. The original proportion of one-half of the work in non-business subjects and the other half in business courses is incorporated in the group requirements of the College.

A Master's degree program in business administration (M. B. A.) to qualify men and women for creative leadership in an increasingly complex and dynamic business society, is offered by the College of Business Administration. It is fully accredited by the American Association of Collegiate Schools of Business. The degree program was initiated under dean William Schmeltz, the third dean of the College. Designed to meet the needs of students as business executives during the next decade of continued rising business complexity, the program has been organized to comply fully with the standards for accreditation of the American Association of Collegiate Schools of Business.

The M. B. A. degree program is interdepartmental in scope. It consists of a core curriculum of four courses, and a second group of two courses in each of five functional fields of accounting, management, marketing, finances, and statistics. The degree candidate will take the core courses and elect two of the functional fields. The balance provides for electives in the social environment

of business. The candidate may also elect courses on the 500 level elsewhere in the Graduate School if they meet his needs.

Because of the initial strength of the M. B. A. degree program, it is believed that many students will be challenged to continue work toward the doctorate at other universities, since the demand is great and rewards high in business for holders of the doctorate. The broad, integrated curriculum of the degree program provides the student with an understanding of the major facets of business operations. It includes work in the theoretical and historical foundations of business, quantitative controls and research methodology, decision-making through the development of advanced functional skills, and knowledge of the social environment of business.

The faculty in the College consists of teachers who are researchers, scholars, and consultants to business and industry. A high percentage hold advanced degrees in their specialties. Instructional approaches vary upon on the particular subject to be learned and include case study, simulation, role playing, and seminars. At present most of the departments in the College are housed in Hayes Hall. A new College of Business Administration Building is scheduled to be completed by August of 1972.

The business world has grown in complexity in recent years. Significant developments in quantitative decision theory, the behavioral sciences, and computer technology have made it necessary for those contemplating career objectives in administrative positions to

be adequately prepared in a wide variety of related disciplines.

The College of Business Administration provides this preparation.

HISTORY OF DELTA SIGMA

The formation of Delta Sigma began in February of 1953 when Mr. Charles Ferrer of Delta Sigma Pi spoke at an organizational meeting. A steering committee was formed and in March, Delta Sigma's constitution and by-laws were adopted. Officers were elected and in May a pledge program was proposed. Mr. Paul Jackson of Marathon Oil Company gave a talk on computers for the last program of the school year.

During the summer members of the executive council attended the Delta Sigma Pi National Convention at Mackinac Island. In October, Kevoy Barnes gave his report on the National Convention. It was decided to investigate other alternatives before considering affiliation.

DELTA SIGMA

The first pledge program was held in the fall. A program in November featured speakers from Westall, Lynch, Pfeiffer, Pepper, and Smith, the largest stock brokerage firm in the world. In January the pledge program was successfully concluded. Representatives of Alpha Kappa Psi spoke to Delta Sigma members concerning affiliation. Members decided

HISTORY OF DELTA SIGMA

The formation of Delta Sigma began in February of 1969 when Mr. Charles Farrar of Delta Sigma Pi spoke at an organizational meeting. A steering committee was formed and in March, Delta Sigma's constitution and by-laws were adopted. Officers were elected and in May a pledge program was proposed. Mr. Paul Jackson of Marathon Oil Company gave a talk on computers for the last program of the school year.

During the summer members of the executive council attended the Delta Sigma Pi National Convention at Mackinac Island. In October, Randy Barnes gave his report on the National Convention. It was decided to investigate other alternatives before considering affiliation.

The first pledge program was begun in the fall. A program in November featured account executives from Merrill Lynch, Pierce, Fenner, and Smith, the largest stock brokerage firm in the world. In January the pledge program was successfully concluded. Representatives of Alpha Kappa Psi spoke to Delta Sigma members concerning affiliation. Members decided

unanimously to approve the motion to petition Delta Sigma Pi.

Mr. Paul Steinberg, of the Teamsters, led a discussion on labor and unionism in February. The election of officers was held in March.

Concerning membership, over one-half of Delta Sigma is comprised of sophomores. The remaining are juniors and seniors. The fields of Accounting, Finance, Marketing, and General Business include the majority of members. Delta Sigma members have a combined point average of 3.12.

March 7 -- Requirements for organizing a local business fraternity including operative and financing plans were discussed. Delta Sigma was chosen for the local chapter. A constitution and by-laws were adopted. Various committees were also formed.

April 13 -- Election of Officers

| Secretary | Tom Repler |
| Treasurer | Randy Schupp |
| Chancellor | Mike Stockhouse |
| Historian | Joe Gerschauer |

Dr. Haas and Dr. Chittle were introduced as advisors to Delta Sigma.

May 14 -- A summary of the proposed fall pledge program was presented. President Randy Barnes spoke on the Delta Sigma Pi National Convention to be held at Mackinac Island. Representatives to the convention were then elected. Mr. Paul Jackson from Marathon Oil Company gave a talk on "Computers Use in the Future".

CALENDAR OF ACTIVITIES

1969

February 23 -- Mr. Farrar of Delta Sigma Pi spoke at an organizational meeting. Mr. Farrar was introduced by Dr. Johnson and Dean Vogt of the College of Business Administration. A steering committee was formed with the members including Randy Barnes, Tom Depler, Gary Merkle, and Monty Meiss.

March 9 -- Requirements for organizing a local business fraternity including operation and financing plans were discussed. Delta Sigma was chosen for the local chapter. A constitution and by-laws were adopted. Various committees were also formed.

April 13 -- Election of Officers:

| | |
|--------------------|-----------------|
| President | Randy Barnes |
| Sr. Vice President | Mike Ward |
| Vice-President | Ron Vollmar |
| Secretary | Tom Depler |
| Treasurer | Randy Schuck |
| Chancellor | Mike Stackhouse |
| Historian | Joe Oberhauser |

Dr. Haas and Dr. Chittle were introduced as advisors to Delta Sigma.

May 18 -- A summary on the proposed fall pledge program was presented. President Randy Barnes spoke on the Delta Sigma Pi National Convention to be held at Mackinac Island. Representatives to the convention were then elected. Mr. Paul Jackson from Marathon Oil Company gave a talk on "Computers Use in the Future."

- October 5 -- The fall pledge program was explained. A presentation of President Barnes' report on the Delta Sigma Pi National Convention followed. Delta Sigma members resolved to have officers investigate alternatives for national affiliation.
- October 12 -- A general business meeting was held.
- October 13 -- A pledge meeting was held and pledges signed up for committees.
- October 19 -- Eighteen new pledges were welcomed into Delta Sigma. President Barnes spoke on a meeting held with the Dean's Advisory Council.
- November 2 - A pledge report, the treasurer's report and the historical committee's report were presented.
- November 11- The election of pledge class officers was held.
- November 14- An informal pledge meeting was held with the aim of having pledges get to know each other better.
- November 16- A general meeting was held. Afterwards, Mr. William Sims and Mr. Bruce Herbert, account executives at Merrill Lynch, Pierce, Fenner & Smith of Toledo, spoke on stock brokerage and general market conditions.
- November 21- An informal pledge and active meeting was held. Members discussed some possible speakers Delta Sigma should attempt to obtain for the winter quarter program. A decision was made to contact Mr. Steinberg, head of Toledo Ohio's Local Teamsters Union.

1970

- January 5 -- A general meeting was held. Afterwards, representatives from the national business fraternity, Alpha Kappa Psi spoke to Delta Sigma members. The treasurer gave a financial report also.
- January 18 -- Mr. Charles Farrar of Delta Sigma Pi gave an informative speech encouraging Delta Sigma to affiliate nationally.
- January 25 -- After some debate, Delta Sigma members unanimously approved the motion to petition Delta Sigma Pi.
- February 15 - Pictures for Delta Sigma were taken. Discussion and voting on proposed amendments to the Delta Sigma by-laws followed. Mr. Paul Steinberg, head of the Toledo Local Teamsters Union, presented the program for the evening.
- March 1 -- Election of new officers:
- | | |
|--------------------|-----------------|
| President | Mike Ward |
| Sr. Vice President | Tom Depler |
| Vice-President | Joe Oberhauser |
| Secretary | Bob Daugherty |
| Treasurer | Claude Neslund |
| Chancellor | Mike Stackhouse |
| Historian | Dennis Cesen |
- March 11 -- Pictures were retaken for the background data needed for affiliation.

Mr. Paul Steinberg, head of the Teamsters Local
in Toledo, leading a discussion of Unionism.

Delta Sigma members listening to a program presented earlier in the year.
