SPECIAL RECOGNITION

TO THE BOARD OF DIRECTORS OF
THE INTERNATIONAL FRATERNITY OF
DELTA SIGMA PI

Gentlemen:

We, the undersigned members of Sigma Sigma Chi Colony hereby petition that a chapter of The International Fraternity of Delta Sigma Pi be established at Savannah State College's School of Business.

It is with our deepest sincerity that we make this plea for an organization of this nature to become part of our historic foundation.

We agree wholeheartedly to abide by all rules and regulations of The International Fraternity of Delta Sigma Pi, and the rules and regulations set forth by the Bylaws Committee of Sigma Sigma Chi Colony.

The students, faculty, and staff of the Savannah State College family and the community of Savannah, Georgia shall all benefit greatly from an affiliation with The International Fraternity of Delta Sigma Pi.

We appreciate the opportunity of being allowed to petition for a local chapter because we know that affiliation with The International Fraternity of Delta Sigma Pi is an affiliation with the best of business professionals.

Mrs. Swannie Richards
School of Business
Savannah State College

Dear Mrs. Richards:

I am pleased to write you and endorse your efforts, and those of interested students and faculty in the School of Business, toward the establishment of Delta Sigma Pi International Fraternity at Savannah State College.

Please rest assured that the Office of Student Affairs is supportive of this commendable work.

Sincerely yours,

ATTENTION: Mr. Mark Roberts

Dear Sir:

As Dean of the School of Business at Savannah State College, I am happy to say that the interest of the students in Delta Sigma Pi has made the writing of this letter a pleasure. Therefore, I hereby give my endorsement and welcome Delta Sigma Pi to the School of Business at Savannah State College. I know that this new relationship will prove beneficial to the students and to the School of Business faculty.

Sincerely yours,

Dr. Leo G. Parrish

The Grand Council
INTERNATIONAL FRATERNITY OF DELTA SIGMA PI
330 South Campus Avenue
Oxford, Ohio 45056

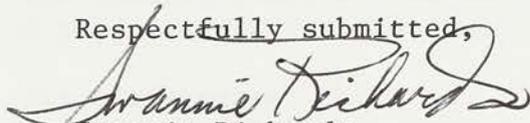

Gentlemen:

It is with great pleasure and a deep sense of pride that I recommend our Sigma Sigma Chi Chapter for consideration as a member chapter of the International Fraternity of Delta Sigma Pi.

Having served as coordinator of the counseling program for students in the School of Business at Savannah State College for the past three years, I have been very gratified to see capable leadership develop in this group of young aspiring students to attract an outstanding group of business majors committed to the goals of Delta Sigma Pi. Sigma Sigma Chi has planned and carried out organization and programming efforts which make me very gratified to be associated with them as adviser. Some of the activities have included fund raising, plant tours, guest speakers, independent activities and meetings, and contacts with both faculty and the external business community.

The faculty and administration actively support our petition as verified in the recommendation letters attached. I am sure Sigma Sigma Chi will be an asset to the goals of Delta Sigma Pi and Savannah State College. I recommend, without reservation, acceptance of our petition for membership and charter.

Respectfully submitted,

Swannie Richards
Assistant Professor and
Faculty Adviser to Sigma Sigma Chi

THE GRAND COUNCIL
International Fraternity of Delta Sigma Pi
330 South Campus Avenue
Oxford, Ohio 45056

Dear Council:

May I respectfully recommend favorable consideration of the interest group for Delta Sigma Pi in the School of Business at Savannah State College.

The young people have worked so dilligently to accumulate all of the necessary funds, projects, and qualifications for a Charter. I am very proud of their activities and commend them very highly for their stickto-itiveness sincerety in getting the group organized and working.

As Chairman of the Division of Business Administration at Savannah State College from 1969-1981, and then Associate Dean of the recently organized School of Business, it was my philosophy to encourage young people in developing co-curricular activities to further augment the pursuit of excellence in all of their undertakings. I firmly believe that quality co-curricular activities are an essential part of a quality program in business, and the establishment of a chapter of Delta Sigma Pi would greatly enhance this goal.

I am sure the Savannah State College Chapter will make a great contribution to the national organization in the furtherance of your goals, to the School of Business in the continual development of a quality program for students, and to the entire College student body as a whole in setting a good example for others to follow.

Sincerely yours,

(Dr.) Mary Clay Torian
Former Chairman, Division of Business
Savannah State College

The Grand Council
Delta Sigma Pi Professional
Business Fraternity
330 South Campus Avenue
Oxford, Ohio 45056

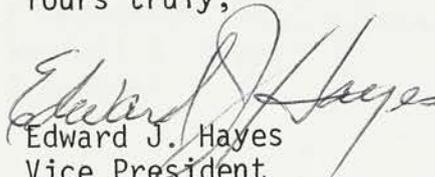

Dear Sirs:

I have been asked to write a letter of support for the petition submitted by the members of Sigma Sigma Chi for a charter from the National Delta Sigma Pi Professional Fraternity. I do so with some delight and great responsibility. The delight comes from the enthusiasm and dedication that permeates the entire membership who has petitioned.

Clearly, the students in our School of Business deserve the opportunity to have a chapter of Delta Sigma Pi on campus. They are mature, dedicated students who will benefit from the affiliation with such a professional organization.

I vigorously support their petition for a charter, and hope that one will be granted.

Yours truly,

Edward J. Hayes
Vice President
for Academic Affairs

SAVANNAH STATE COLLEGE

A UNIT OF THE UNIVERSITY SYSTEM OF GEORGIA

SAVANNAH, GEORGIA 31404

April 20, 1983

OFFICE OF
THE PRESIDENT

The Board of Directors
International Fraternity of
Delta Sigma Chi
330 South Campus Avenue
Oxford, Ohio 45053

Gentlemen:

Savannah State College endorses and supports the colony of Sigma Sigma Chi in their petition for a charter by Delta Sigma Pi.

The students at our College endeavor to augment their classroom instruction through involvement with the business community of Savannah and the larger business world. They are eager to promote the study of business throughout the College, the City of Savannah, and the State of Georgia. Membership in Delta Sigma Chi will enable our faculty and students in the School of Business to achieve their scholarship and service goals.

Savannah State College is pleased to have Sigma Sigma Chi among the organizations on our campus. We certainly welcome the recognition our students will receive when they are granted a charter.

Sincerely,

A handwritten signature in cursive script that reads "Wendell G. Rayburn".

April 23, 1983

The Board of Directors
International Fraternity of Delta Sigma Pi
c/o The Central Office
330 South Campus Avenue
Oxford, Ohio 45056-0230

Dear Brothers:

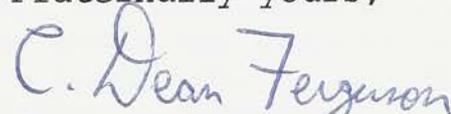

For the past year, District Director Stephen A. Jones and I have had the opportunity to work with the students and faculty at Savannah State College. We have found them to be extremely capable individuals determined to bring the finest business fraternity to their campus. Their dedicated efforts make it a pleasure to recommend that a chapter charter be issued to the members of Sigma Sigma Chi Colony.

Since January, Sigma Sigma Chi Colony has conducted itself in a manner equal to if not exceeding the professional program of our collegiate chapters. Seven speakers, two tours, and an accounting seminar will have been conducted prior to the end of the Spring Term. Numerous business meetings and fund raising activities have been held and the level of participation by colony members has been quite good.

Excellent support has been provided the colony by the school administration with special efforts being given by Dean Leo G. Parrish, Jr., Mrs. Swannie M. Richards, and Ms. Zelda M. James. District Director Stephen A. Jones has coordinated our expansion efforts on behalf of the fraternity. To summarize, the chapter has received outstanding guidance and encouragement which has helped it excel in all it has attempted.

It is an honor indeed to recommend the installation of this fine group of students as a chapter in the International Fraternity of Delta Sigma Pi.

Fraternally yours,

C. Dean Ferguson
SE Regional Director

HISTORY OF SAVANNAH

On February 12, 1733, General James Edward Oglethorpe and 120 colonists, having crossed the Atlantic from Gravesend, England on the good ship ANN, arrived at Yamacraw Bluff on the Savannah River to found the colony of Georgia in America. The purposes of the colony, the 13th and last of the English colonies in the New World, were to aid the poor in England, to increase imperial trade and navigation and to serve as a protective buffer between Spanish Florida and the more motherly English colonies.

Carefully arranging blocks of five symmetrical 60x90 foot lots facing parks. Oglethorpe arrived at the basic layout for Savannah, America's "First Planned City". This system of public squares, intended as central areas of fortification as well as social areas for the colonists, has since been designated a National Historical Civil Engineering Landmark. Each family received a house a lot on one of the squared and beyond the city, a 5-acre garden plot. Still father out were the 45-acre farm lots.

From the outset Savannah was an important seaport, sending to England the products of its agriculture and trade with the Indians. Once diked rice paddies virtually surrounded Savannah, but in the 1820's and 30's wet rice culture was eliminated because of the scourge of yellow fever which swept the city in 1820. By that time cotton had become the dominant export crop and for nearly a century, the factors trading in the Cotton Exchange on Savannah's waterfront set world cotton prices.

Savannah saw military action during the Revolution when the city was taken by Colonial insurgents at the outset of the war. In 1778 the British recaptured it. The following year the American army laid siege to Savannah in an unsuccessful effort to retake the city.

Although Savannah was not captured until rather late in the Civil War, it suffered because of the Union navy's coastal blockade. Rather than risk utter destruction Savannahians surrendered their city to Sherman on December 22, 1864, and the General sent his famous message to President Lincoln: "I beg to present to you as a Christmas gift, the City of Savannah with 150 heavy guns and plenty of ammunition and also about 25,000 bales of cotton."

Savannah's growth and prosperity endured numerous setbacks caused by devastating fires in 1796 and 1820, epidemics of yellow fever and cholera, economic depressions and the collapse of cotton prices in 1895.

The ensuing fifty years brought Savannah to low spirits-culturally, economically and historically. Her preeminence as a world cotton trade center ended and left the beauty and elegance of the Golden Age of King Cotton to a city no longer able to support her expensive tastes. Trustees' Garden, Savannah's first "subdivision" became her first slum. Former mansions, designed and built by world famous architects, gave way to decay. The once Golden

Age turned to tarnished brass, suffering first neglect and later, commercial callousness. Throughout the city fine old townhouses were allowed to deteriorate or were razed as a "new progress" took shape. The razing of Savannah was of more than local significance as evidenced by the official vandalism which ran rampant as demolition marched on. For example, the doorway of the Gibbons' house on West Broad Street was salvaged and found its way to New York to be installed as the entrance to the Early American Wing of the Metropolitan Museum of Art. The city of grace and beauty seemed doomed to life bereft of the splendor of years gone by.

Perhaps it was the National Park Service's restoration of nearby Fort Pulaski in the 1920's and 30's which revived the old civic pride which had lain dormant since Reconstruction. At any rate a few farsighted Savannahians began to feel that salvaging the remaining symbols of a bygone elegance was not a step backward in time, but rather the first real progress seen in Savannah during the century.

Since that resurgence, Savannah's restoration efforts have gained national attention and acclaim.

Though the glow of the Golden Age ended and Savannah suffered sorely, she retained her spot in the maritime industry as a major Atlantic port. Since that time, the Port of Savannah has grown to become a center of international trade and shipping as the largest port on the South Atlantic and the 10th largest port in the United States.

SAVANNAH FIRSTS

Capitol of 13th Colony and later of Georgia, 1733

First city planned on a system of squares in North America, 1734

First agricultural experimental garden in North America, 1734 Trustees' Garden, laid out by General Oglethorpe, was North America's first economic garden or agricultural experiment station. In the 10-acre plot were cultivated and natured trees, herbs and other plants from all over the world, including the cotton and peaches that made Georgia a leading agricultural producer in later years.

First Silk Exportation from America, 1735

In 1735, Savannah exported the first silk from North America. The mulberry trees on which the silkworms lived were nurtured in the Trustees' Garden. Ultimately, the silk experiment failed.

First Moravian Church in America, 1735

First church in North America organized by the Christian Communion, founded in Bohemia by the followers of John Huss and John Wycliffe. John Wesley's contact with the Moravians in Savannah was one of several events that led to his final break with the Anglican Church and his founding of Methodism. The Moravians left Savannah in 1740 for Pennsylvania.

First English Hymnal in America, 1736

John Wesley, then rector of Christ Church, published the first English hymnal in America.

First Sunday School in America, 1736

The Sunday School classes organized at Christ Church by John Wesley, the founder of Methodism, are thought to represent the first Protestant Sunday School in the world.

First Lighthouse on South Atlantic Coast, 1736

General Oglethorpe had the first aid to navigation in the South erected near the present Tybee Island Light. The first tower apparently was never lighted and served as a daymark. A second tower, built

in 1742 and lighted in 1748, was the third lighthouse in America.

First Horserace in Georgia, 1740

First Cattle Exportation in Georgia, 1755

First Newspaper in the Colony. GEORGIA GAZETTE, 1763

First Negro Baptist Congregation in U.S., 1788
The first Black Baptist congregation was organized at Brampton Plantation Outside Savannah with direct descendants today in First African Baptist Church and First Bryan Baptist Church.

First Public School in Georgia, 1788

First Cotton Gin, 1793
While serving as a tutor on General Nathaniel Greene's Mulberry Grove Plantation outside Savannah, Eli Whitney, a Connecticut school teacher, invented the first cotton gin. This invention revolutionized the South, making it possible to raise cotton on a large scale.

First Steamship to Cross an Ocean, the S.S. SAVANNAH, 1819
From May 22 to June 20, 1819, the SS SAVANNAH, a sailing vessel with auxiliary steam power, crosses from Savannah to Liverpool, England. Two weeks prior to the historic voyage, President James Monroe, the second president to visit Savannah, made an excursion on the vessel into Tybee Sound.

First Hospital for Negroes in U.S., Georgia Infirmary, 1832

First Commercially Successful Iron Steamship, The SS JOHN RANDOLPH, 1862

First Use of Rifled Cannon in Modern Warfare, at Fort Pulaski, 1834
On April 10-11, 1862, FEDERAL ARTILLERY FORCES shelled Fort Pulaski into submission and surrender in just 30 hours. Fort Pulaski had been thought to be an impenetrable fortress, but its quick demise signaled the end of brickwork and masonry

forts and the beginning of a new era in warfare.

First Art Museum In Southeast, 1886

Savannah's Telfair Academy of Arts and Sciences, built in 1820 as a mansion for Alexander Telfair, was bequeathed to the Georgia Historical Society in 1875. Jefferson Davis was among the notables at its dedication as a museum in 1886. Its permanent collection contains many fine works by American and European artists, as well as the largest collection of the paintings and drawings of Kahil Gibran, author of THE PROPHET.

First U.S. Building Built Entirely over a Public Street, 1886

Using the principle of air rights, the Savannah Cotton Exchange was built over Factors Row. It was the first time in America that any building was erected entirely over a public thoroughfare.

First Motorized Fire Department in U.S., 1911

First Girl Scout Troop, 1912

On March 12, 1912, in the Colonial Dames House at 325 Abercorn Street, Juliette Gordon Low formed the first Girl Scout troop in the U.S., founding the Girl Scouts in America. Mrs. Low's birthplace at the corner of Oglethorpe Avenue and Bull St., is maintained by the Girl Scouts as a museum and as their national program center. This house was Savannah's first Registered National Historic Landmark, designated as such in 1965.

First Nuclear-powered Merchant Ship, the N.S. SAVANNAH, 1962

SAVANNAH TODAY

Recognition as a trend setter in the preservation arena notwithstanding, Savannah has that and much, much more to offer her residents. A well balanced economy helps assure community growth even in uncertain times. Four main areas comprise her economic base as follows:

1. The Port and its modern harbor facilities.
2. A rapidly expanding tourism and convention business.
3. A position as the retail trade center for Coastal Georgia and adjacent parts of South Carolina.
4. A sizeable and varied industrial base.

PORT FACILITIES

Savannah's continued economic growth is based to a large degree on an important and growing seaport. The Port is the 10th largest in the United States and ranks first in South Atlantic ports in international cargo handled. Shipping traffic is strong and has a broad base of both imported and exported products. Major export items are clay, paper and paper products, woodpulp, peanuts, fertilizer and fertilizer minerals. Heavy fuel oils, gypsum, plaster and limestone, crude petroleum, natural and manufactured gas, and raw sugar are principal imports. Twenty-three shipping companies and 23 foreign freight forwarders serve over 100 shipping lines from most countries in the world. A record 1,789 ships with a net vessel tonnage in excess of 17 million tons moved through the harbor during 1979. Almost \$108 million dollars was assessed on cargoes for custom duties in 1979.

In the past five years over \$100,000,000 dollars has been expended in Port facilities. Ongoing construction projects will greatly enhance the port's ability to attract and handle outsized cargoes and project shipments.

A newcomer to Savannah, Southern Energy Company, owns and operated a liquified natural gas regasification facility at Elba Island, located in the Savannah River. When fully operational the facility, a major energy milestone in the United States and the South, receives on tanker of LNG (liquid natural gas) each week from Algeria-annual volumes supply approximately 15% of Southern Natural Gas Company's annual deliveries. Southern Energy Company is a wholly-owned subsidiary of Southern Natural Gas Company, the major supplier of energy in the Southeast.

TOURISM

Tourism is a very active and fast-growing area of Savannah's economy. Overall, tourism is Savannah's second largest industry. In 1979, nearly one and a half million tourists spent over \$80 million dollars locally and generated more that \$1.5 million dollars in tax receipts. Most visitors are attracted by the magnificent restoration in the downtown Historic District, Savannah's natural beauty and mild, coastal climate.

Major hotel/motel expansion projects are underway which will increase the number of hotel/motel rooms in the Savannah area to more than 3600 by nearly 1981. Nearly 4,000 persons are employed in travel related jobs with nearly \$17 million dollars in wages earned annually during 1979.

The Chamber's active Convention and Visitors Bureau, now in its fourth year of operation, is funded partially by a 3% hotel/motel room tax. The Bureau's aggressive involvement in a wide variety of sales programs in convention, group tour and retail travel areas has played a large part in the tremendous growth of the industry locally. The Savannah area has enjoyed a 14%-17% tourism increase for each of the past four years. The Bureau's highly competitive sales programs have made rapid progress in establishing the credibility of the Savannah area as a visitor and convention destination. One of the Bureau's most visible efforts is the operation of the Savannah's Visitor Center which serves as the hub for area visitors. Trained hosts greeted more than 125,000 visitors during 1979 alone.

RETAIL TRADE AREA

The Chatham County SMSA (Standard Metropolitan Statistical Area) also includes Bryan and Effingham counties in Georgia. The retail trade area extends within a 50-mile radius from the city with more than 300,000 persons residing in the area. A fine interstate network makes a 75-mile radius trade area reasonable. More than 500,000 persons live within that area and represent a retail market of about 2 billion dollars (Source: Geostats, 1979).

Savannah's retail community has prospered for many years with retail sales figures showing a continuous increase over and above the inflation rate. This success is largely due to a low unemployment rate (usually well below the state and national average), a position as the only large metropolitan area in coastal Georgia and a broad, based, well balanced economy. This growing retail trend is strengthened by the broad employment base of the community and a strong manufacturing sector. There are approximately 4,600 employees in wholesale and 15,000 employees in the retail trade.

MANUFACTURING

Manufacturing facilities have long played a significant role in growth of the local economy. Production of building materials (asphalt shingles, wallboard, plywood, pigments) and all types of wood and paper products, food production, chemical companies and aircraft manufacturing are major contributors to Savannah's manufacturing stability. The total manufacturing employment for 1979 was approximately 16,500 with an estimated \$240 million dollars paid in wages. Savannah aggressively solicits new industry and business. Detailed analyses of the City's industrial profile (available from the Chamber's Business Development Department) indicates that over 60% of local industrial employment is concentrated in steady growth industries such as food, paper, chemicals, and fuels.

HISTORY of SAVANNAH STATE COLLEGE

By Act of the General Assembly on November 26, 1890, The State of Georgia "established in connection with the State University, and forming one of the departments thereof, a school for the education and training of Negro students. "A commission was appointed to procure the necessary grounds and buildings, and to prescribe a course of study that would include those studies required by the Morrill Land-Grant Acts of 1862 and 1890.

The Commission on the School for Negro Students was designated as the Board of Trustees for the School, with perpetual succession subject to the general Board of Trustees of the University of Georgia. The Chancellor to the University of Georgia was given general supervision of the school.

A preliminary session of the school was held between June 1 and August 1, 1891, at the Baxter Street School building in Athens, Georgia. Richard R. Wright, the first principal, and three other instructors comprised the faculty. In the following year the school was moved to its present site, which is approximately five miles southwest of the Courthouse of Savannah, Georgia, partly in Savannah and partly in Thunderbolt. The school was given the name "The Georgia State Industrial College for Colored Youths," and its faculty consisted of Major Wright as President, instructors in English, mathematics, and natural sciences, a superintendent of the mechanical department, and a foreman of the farm.

During the thirty years that Major Wright served as President of the College, enrollment increased from 8 to 585 and the curriculum was expanded to include a normal division in addition to four years of high school. Training in agriculture and the mechanical arts also was begun.

The first women students were admitted as boarders in 1921; the first summer session was conducted in 1922; and in 1925 the governing body of the College was changed from a Commission with "perpetual succession" to a Board of Trustees whose members were appointed for four year terms. All of these changes occurred during the presidency of C. G. Wiley, the first alumnus of the College to become president, who served from 1921 to 1926.

Under President Benjamin F. Hubert (1926-1947), the entire academic program was reorganized. The high school and normal departments were discontinued and the school became a four-year college. In 1931, when the University System was placed under a Board of Regents, the College began to offer bachelor's degree programs with majors in English, the natural sciences, social sciences, and business administration, as well as in agriculture and home economics.

Until 1947, the College served as the State land-grant institution for Negroes. In that Year this function was assumed by Fort Valley State College.

During the administration of President James A. Colston (1947-1949), the faculty was strengthened and improvements were made in the physical plant. Among the programs that were launched at this time were the Alumni Scholarship Drive, Campus Chest, Annual Men's Day, Religious Emphasis Week, Freshmen Week, and the Cultural Artists Series. Expanded programs of students personnel services, and public relations, a reading clinic, and an audiovisual aids laboratory were instituted under the leadership of President Colston.

Dean W. K. Payne became acting president of the College on September 1, 1949. The Regents of the University System of Georgia changed the name of the College from Georgia State College to Savannah State College on January 18, 1950. Dr. Payne became the fifth President of the College on March 1950; he served in this capacity until his death on July 26, 1963.

Timothy C. Myers served as acting president from the time of Dr. Payne's death until November 1, 1963. Myers had served as dean of the faculty since September, 1953.

Under the leadership of Dr. Howard Jordan, Jr. (November 1, 1963 through January 31, 1971), significant, far-reaching and innovative programs were initiated in all aspects of the College's development. Curricula improvements in the general education program in teacher education, and in business administration, as well as other areas, were carried forward. A graduate studies program in elementary education was initiated in the summer of 1968. The mantle of educational leadership at Savannah State College passed from Dr. Jordan to Dr. Prince A. Jackson, Jr., on February 1, 1974.

Many of the improvements and innovations begun during President Jordan's administration came to fruition during the first year of Dr. Jackson's tenure. The three engineering technology programs -- civil, electronics, and mechanical -- were accredited by the Engineers' Council for Professional Development in 1973. Dr. Jackson served until March 27, 1978, when he was succeeded by Dr. Clyde W. Hall, who at the time of his appointment as acting president was serving as Chairman of the Division of Technical Sciences.

In September 1979, due to the desegregation plan mandated by the Department of Health, Education and Welfare, the faculty and students in the Division of Education at Savannah State College were transferred to Armstrong State College and Savannah State College received the faculty and students in the Division of Business from Armstrong State College in a historic program swap. This program swap resulted in the creation of a new School of Business at Savannah State College during the 1979-80 academic year.

Additionally, on April 13, 1980 the Board of Regents of the University System of Georgia approved a new Administrative organization plan for Savannah State College for 1980-81. Under the plan Savannah State was reorganized into three schools -- Business;

Humanities and Social Sciences; and Sciences and Technology. On September 15, 1980, Dr. Wendell G. Rayburn became the eighth president of Savannah State College.

INSTITUTIONAL AND PROFESSIONAL ACCREDITATIONS

Institutional Accreditation: Southern Association of Colleges and Schools, Commission of Colleges

Professional Accreditation: Engineering Technology Programs in civil, electronics and mechanical engineering—Engineers' Council for Professional Development.

The College hold institutional memberships in the following organizations

Association of Collegiate Registrars and Admissions Officers
Georgia Association of College Registrars and Admissions Officers
Southern Association of College Entrance Examination Board
American Library Association
Southern Library Association
Association of Institutional Research
College Research and Library Association
Georgia Library Association
National Business Education Association
Southern Business Administration Association
American Assembly of Collegiate Schools of Business
American Conference of Academic Deans
The Mathematics Association of America
The American Mathematical Society
Cooperative Education Association

Buildings and Grounds

The campus, comprising 136 acres, presents a unique setting of natural beauty. Among its 34 buildings are two that were constructed during the administration of Major Richard R. Wright: Hill Hall (1901), and Hammond Hall (1915), both of which have been extensively renovated in recent years. Hill Hall is occupied by most of the Federal Programs and Extended Services; and Hammond Hall is the present site of the Department of Home Economics.

W.K. Payne Hall, a two-story air conditioned building, is a main classroom building. In addition to its fifteen classrooms, it also provides office space for thirty-two instructors (including four departmental offices), data processing facilities, a secretarial center, a language laboratory, a reading clinic and the Learning Resource Center. Most of the classes in the English, Social Sciences, Modern Languages, and Special Studies Departments are held in this facility.

Other class room buildings, and the Departments that each house are Herty Hall (1937) -- Mathematics and Physics; Hubert Technical Sciences Center (1960) -- Engineering Technology and Chemistry; Morgan Hall (1936) and Morgan Hall Annex; J. F. Kennedy Fine Arts Center(1967) -- Fine Arts; The Griffith-Drew Center for the Natural Sciences (1971) -- Biology; and Wiley-Wilcox Gymnasium Complex -- Physical Education.

Completing the physical facilities of the campus are those buildings used for activities that are auxiliary to the instructional process, those used as student residence halls and those used to house the maintenance and operational staffs. The Martin Luther King-Varnetta Frazier Student Center Complex (1969) houses the Student Counseling Offices, the College Dining Hall, the Post Office, and the offices directly involved in student life and student activities. Adams Hall (1931), formerly used as the dining hall, is now an annex of the Student Center, while Powell Hall, constructed in 1932 as the Laboratory School for the College, is now a Nursery School Kindergarten, and serves as the laboratory for the Early Childhood Education Program. Powell Hall also houses the student-created Ethnic Culture Center.

Three new buildings were completed in 1976. A new library, destined to be the first circular-shaped library in the state, was occupied that year and serves as the hub for the other buildings located on the southern portion of the campus. Adjacent to the new library is the Helen Adele Whiting Hall. This building houses the School of Business. The third new building in the NROTC Armory located adjacent to the stadium. A portion of this building serves as an athletic field house.

Residence halls include two recently completed ones: Smith-Bowen for women (1971) and Melvin Bostic Men's Residence Hall (1972). Both dormitories are air-conditioned, as is A.E. Peacock Hall (1967) and Lockette Hall (1965). Peacock Hall accommodates 180 men and Lockette

Hall, 180 women. Lester Hall used for housing accommodations. Camilla Hall (1938) has been converted to married student housing. Wright Hall (1951), a former dormitory, is being utilized to provide additional academic and administrative office space. The studio for FM radio station WHCJ is also in Wright Hall. Asa Gordon Hall (1959) was recently renovated and converted into the Administration Building.

Most of the Plant operations are directed from the Medgar Evers Plant Operations Complex, a modern facility that houses the main offices for Plant Operations and the College Warehouse. Housekeeping services are now housed in the former field house.

HISTORY OF THE SCHOOL OF BUSINESS

The School of Business was formed during the 1979-80 academic year with the transfer of the Department of Business from Armstrong State College to Savannah State College and its merger with the Division of Business of Savannah State. The main purpose of the School of Business is to provide for students a sound educational foundation for socially effective and gainful employment in the business world. Through carefully designed curricular offerings, supervised work experience, co-curricular activities, and individual counseling for careful selection of courses in sequence, and in accordance with student aptitudes and interests, the School of Business prepares students for positions of leadership and responsibility in the business environment.

The School of Business presently offers majors in Accounting, Business Administration, Economics, Finance, Information Systems, and Office Administration. A joint program between Savannah State College and Armstrong State College was also authorized by the Board of Regents for a Masters degree in Business Administration (M.B.A.) The M.B.A degree requires up to six pre-requisite courses in business and 12 graduate courses. The current coordinator of the M.B.A. program, Dr. William D. McCarthy was appointed by Dr. J. Gordon Gilkey who was named Acting Dean early in 1981. Upon his appointment, Dr. Mary Clay Torian, (Former head of the Division of Business), was named as Acting Associate Dean. Effective December 15, 1981, Dr. Leo G. Parrish took the position of Dean of the School of Business. Presently, the School of Business houses the Small Business Development Center which was established in cooperation with the Savannah Area Chamber of Commerce early in 1982. The center is under the direction of Mr. R.D. Franks. The School of Business has also been awarded a grant to establish a computer based system of study.

HISTORY OF SIGMA SIGMA CHI

At the June 3 meeting of the faculty of the School of Business, Stephen Jones, the District Director of Delta Sigma Pi spoke on the advantages of having a Delta Sigma Pi chapter at Savannah State College. In this meeting Mrs. Swannie M. Richards, an assistant professor in the School of Business, volunteered to discover the level of interest students might have in a new organization in the School of Business.

On October 14, 1982 a meeting was held in Whiting Hall Auditorium for all students interested in Delta Sigma Pi. Approximately sixty (60) students attended. At this meeting Stephen Jones gave a brief description of what Delta Sigma Pi represents and the procedures the necessary to become a chapter.

On October 25, 1982 a second meeting of the interest group of Delta Sigma Pi was held. At this meeting Mr. Mark Roberts, Director of the Central Office, reinforced what Mr. Jones said in the previous meeting. Members of the Delta Sigma Pi Chapter at Georgia Southern and their advisor attended this meeting and spoke on their experiences and joys of being a member of Delta Sigma Pi. At this time, the interest group was given the greek name -- Sigma Sigma Chi and voted to petition the National Office of Delta Sigma Pi for a charter membership.

On February 28, 1983 Sigma Sigma Chi met and elected officers. These officers consisted of the following: President, Senior Vice President, Vice President of Professional Activities, Vice President of Pledge Education, Treasurer, Secretary, Chancellor, Chapter Index Efficiency Index Chairman, and the Advisors. Attending this meeting was Dean Ferguson the Southeastern Regional Director of Delta Sigma Pi. He again reinforced the procedures we had to follow in order receive a charter.

The first business meeting was held on March 31, 1983. At this meeting, plans were formulated for the completion of the Bylaws and emphasis was placed on the need to begin immediately on the completion of the petition. Fund raising activities (candy sales, hotdog sales, and raffles) were held to help defer the cost of the member fees. A tour of the United States Post Office and discussion period was held by the Vice President of Finance. Three (3) professional speakers have been heard by the group and others have been scheduled.

On April 8 and 11, 1983 the Sigma Sigma Chi Colony (43 members) was officially pledged in a ceremony conducted by Mr. Stephen Jones. The Pledge Education classes will begin on Friday, April 22, 1983 and end on May 23. The Sigma Sigma Chi Colony official installation ceremony was held on June 4, 1983.

OBJECTIVES OF SIGMA SIGMA CHI COLONY

The objectives of Sigma Sigma Chi Colony are:

1. To establish and maintain a chapter affiliated with The International Fraternity of Delta Sigma Pi;
2. To broaden members' understanding and appreciation of business;
3. To develop members' ability to cope with the unexpected, change, new situations and unfamiliar concepts;
4. To foster an attitude of professionalism among member and nonmember students;
5. To develop the ability to formulate objective opinions and express these objective opinions effectively;
6. To provide each member the opportunity to utilize and improve their individual skills and abilities;
7. To constantly promote a positive image of Savannah State College.

S I G M A S I G M A C H I C O L O N Y M E M B E R S H I P

LEO G. PARRISH JR.

Dr. Parrish is presently the Dean of the School of Business at Savannah State College. Before coming to Savannah State in 1981, Dr. Parrish was Head of the Department of Management at Georgia Southern College in Statesboro, Georgia. Dr. Parrish also was a graduate teaching assistant at Georgia Institute of Technology. Dr. Parrish has been employed by American Telephone and Telegraph as a District Operations Manager and Texas Instruments Incorporated as an Associate Engineer. Dr. Parrish also served in the United States Army Signal Corps as a lieutenant. Dr. Parrish received his Ph.D, M.S.I.M. and B.E.E. degrees from Georgia Institute of Technology. Dr. Parrish is affiliated with Delta Sigma Pi, Operations Research Society of America, The Institute of Management Sciences, Association for Business Simulation and Experimental Learning, American Institute for Decision Sciences. Dr. Parrish has written several articles and essays that have appeared in various professional journals.

DR. THOMAS R. EASON

Presently, Dr. Eason is Professor of Economics in the School of Business at Savannah State College. Dr. Eason was formerly Co-Head of the School of Business and MBA Coordinator at Savannah State College and Head of the Business Program at Armstrong State College and Troy State University. Dr. Eason has been employed by Convair as a Production Scheduler and has served in the military. Dr. Eason received his Ph.D. and M.B.A. degrees from the University of Mississippi, and he received his B.S. degree from Union University, in Jackson, Mississippi. Dr. Eason is a member of The American Economic Association, The Southern Economic Association, The Eastern Finance Association, The Savannah Board of Realtors, and The Savannah Appraisal Association.

MRS. SWANNIE M. RICHARDS

As our advisor, Professor Richards is always there when we need her. She is the force behind the organization of Sigma Sigma Chi Colony and has been from the start.

Before joining the faculty of Savannah State College in 1980, Professor Richards was the coordinator of the Evening/Weekend and Swing Program at Savannah State College. Prior to coming to Savannah State College in 1978, Professor Richards served as an Education Service Officer, rank GS-11, for the United States Department of the Army. She received her B.S. and M.S. degrees from North Carolina Central University at Durham, North Carolina. Professor Richards is a member of the National Business Education Association, Phi Delta Kappa, and has served as area chairman for the American Heart Association and the American Cancer Society. She has received the Service Award of 1983 from the Savannah Chapter of the Top Ladies of Distinction and the Certificate of Appreciation as Instructor of the year in 1981.

ZELDA M. JAMES

Although Ms. James has a very busy work schedule, she has been a devoted and dedicated contributor to Sigma Sigma Chi Colony before and after the election of officers. Ms. James is currently employed at Savannah State College where she holds the position of Administrative Assistant of the Title III Program (Governmental funded program to establish a computer based system in the School of Business). In 1979 Ms. James received her B.S. degree in Accounting with a minor in Business Administration and Economics from Savannah State College. She is an alumni member of Phi Beta Lambda and serves as a Trustee and Assistant Financial Secretary in her church. She also serves as a member of the choir, hospitality club, and Mission-In-Action. Among her achievements, Ms. James has been named one of the Outstanding Young Women of American in 1981 and in 1982.
